The Rise of Interactive Governance and Quasi-Markets S.A. Denters, Oscar van Heffen, J. Huisman, P.J. Klok, 2013-06-29 It has taken a long time to make this book Many initial drafts of the chapters published in this book were presented in November 2000 during a two day conference on Interactive governance towards a post parliamentary democracy held in Enschede The Netherlands The Netherlands Institute of Governance NIG sponsored the conference After this conference the organisers discussed the possibility of making a book on the basis of papers presented at this event In the end it was agreed that such a publication would indeed be worthwhile provided the initial papers were fundamentally revised Moreover it was agreed that also supplementary chapters should be included in order to strengthen the international comparative perspective On this basis authors of the conference papers chapters and envisioned new chapters were invited to re submit drafts The completion of the book however was unexpectedly halted by the tragic sudden death of our co editor and dear friend Oscar van Heffen In his lifetime he was the driving force behind this project Without his efforts insightful comments and helpful suggestions this book in its present form would never have been published As such we dedicate this volume to his memory the completion of the book being an honorary debt to our friend and his wife Mirjan

Governing a Common Sea Marko Joas, Detlef Jahn, Kristine Kern, 2012-05-16 This is a very welcome volume and it will reach a large audience and readership among those involved in these issues from a truly multidisciplinary perspective in essence a much needed book Erik Bonsdorff professor of marine biology at Åbo Akademi University Finland This timely volume provides a thorough account of how the highly advanced industrial societies seek to govern and manage the Baltic Sea The way they proceed and the degree to which they succeed provide valuable lessons for riparian states seeking to avoid tragedies of their commons Lennart J Lundqvist professor of environmental policy and administration University of Gothenburg Sweden How is a natural common pool resource such as a sea which is shared by several countries best governed The potential for international conflict is immense as each country may have different agendas with regard to issues such as exploitation and environmental protection This book uses a case study of the Baltic Sea Region to examine this complex problem The sea itself has been highly vulnerable to pollution and recently the bordering nations have begun to change their mode of cooperation to tackle this issue by establishing several new forums to manage the sea Administrative and political structures developed in

the region are reviewed and shown to provide a model that could be applied to other seas and natural resource systems elsewhere in the world

Good Governance in Asia Linda Chelan Li, 2016-03-22 The international aid community has advocated governance reforms as a necessary complement to economic aid to developing countries The resultant Good Governance Agenda has been criticised for its ahistorical bias The empirical case studies reported in this book further illustrate the limitations by showing the complex logics of governance reforms and their relations with development in the Asian context The analysis highlights the importance of taking full notice of the Asian reform experiences in the ongoing reflection over the global institutional and development agenda The message is not to deny the need for governance reforms or the utility of international learning and sharing of experiences Global development will benefit however from a better understanding of the linkages between governance reforms and the diverse historical conditions they are embedded in both developing or the advanced economies This book was published as a special issue of Journal of Contemporary Asia

Lessons for the Big Society: Planning, Regeneration and the Politics of Community Participation Denis Dillon, Bryan Fanning, 2016-05-13 This book provides concrete examples of the ways in which shifting academic debates policy and political approaches have impacted on a specific place over the past 30 years It offers a critical analysis of the history politics and social geography of the high profile London Borough of Haringey in the decades prior to the 2011 Tottenham riots The Haringey case study acts as a lens through which to explore the evolution of theoretical and policy debates about the relationship between local institutions and the communities they serve Focusing on the policy areas of planning and regeneration it considers the local implementation and outcome of central government strategies that have sought to achieve such accountability and responsiveness through community participation strategies It examines how the local authority responded to central government aspirations for greater community involvement in planning in the 1970s and regeneration from the late 1980s onwards before looking in detail at the implementation of New Labour neighbourhood renewal and local governance policy in the borough In doing so the book provides a longitudinal case study on how various central government community empowerment agendas have played out at a local level It offers important lessons and indicates how they might work more effectively in future

Federalism in Asia Harihar Bhattacharyya, 2010-02-25 This book analyzes the successes and failures of various federal measures adopted in India Pakistan and Malaysia for the political accommodation of diversity Bhattacharyya then assesses their comparative significance for other countries in Asia In particular he examines growing tensions between nation and state building in ethnically plural societies modes of federation building in Asia persistent ethno nationalist tensions in federations and the relationship between federalism and democracy and federalism and decentralization Since ethno nationalist conflict remains unresolved in most countries of Asia this book should of interest to those seeking long term solutions of problems of order and stability in ethnically diverse countries in Asia

Planning and Decentralization Victoria A. Beard, Faranak Miraftab, Christopher Silver, 2008-06-04 The first in

depth study of the impact of economic and political decentralization on planning practice in developing economies this innovative volume using original case study research by leading experts drawn from diverse fields of inquiry from planning to urban studies geography and economics explores the dramatic transformation that decentralization implies in responsibilities of the local planning and governance structures It examines a range of key issues including public and private finance local leadership and electoral issues planning in post conflict societies Offering unique insights into how planning has changed in specific countries paying particular attention to South East Asian economies India and South Africa this excellent volume is an invaluable resource for researchers graduate students and planners interested in urban planning in its international political and economic context

Urbanization and Urban Governance in China Lin Ye, 2017-11-29 This book explores the process of urbanization and the profound challenges to China's urban governance Economic productivity continues to rise with increasingly uneven distribution of prosperity and accumulation of wealth The emergence of individual autonomy including demands for more freedom and participation in the governing process has asked for a change of the traditional top down control system The vertical devolution between the central and local states and horizontal competition among local governments produced an uneasy political dynamics in Chinese cities Many existing publications analyze the urban transformation in China but few focuses on the governance challenges It is critical to investigate China's urbanization paying special attention to its challenges to urban governance This edited volume fills this gap by organizing ten chapters of distinctive urban development and governance issues

Urban Governance in Southeast Asia Ambe J. Njoh, 2024-07-30 The book draws from regulation theory to explain urban planning policies and outcomes in Southeast Asia as a function of governance structures and processes A considerable portion of the book is spent re tracing the historical roots of planning dispositives including the totality of institutional entities which together constitute an apparatus of government in South East Asian polities Therefore of essence in the book are the institutional structures and administrative principles that were introduced by colonial authorities and inherited by their post colonial successors in South East Asia The book seeks to demonstrate the role of the policies and commensurate implementation institutional frameworks in accounting for important dynamics in the contemporary urban domain in the region In analyzing the institutional framework for urban planning and governance the book is doing due diligence to a hitherto neglected subject namely governmentality in the discourse on the political economy of urban management in Southeast Asia Thus the book is intended to acknowledge the importance of institutions in determining the success of urban development policies The notion of institutions or governmentality as will be used in the book includes de facto governance structures government and parastatal agencies and the formal rules and regulations they are charged with implementing The book is based on the premise that knowledge of institutions and their functions is critical in explaining phenomena in economic geography This is particularly true in Southeast Asian countries because of the dominant and overarching role of the state or government agencies in the economy

councillors Colin Copus,2015-12-01 By using qualitative research from a number of related projects the book examines the roles functions and responsibilities of councillors and the expectations placed upon them by citizens communities and government OECD Multi-level Governance Studies Making Decentralisation Work in Chile Towards Stronger Municipalities OECD,2017-09-19 This report provides a comprehensive analysis of the challenges confronting Chile s centralised growth model and recommendations towards developing a more integrated territorial approach Localism and the Design of Political Systems Rick Harmes,2020-12-31 This book examines localism as a political idea and policy approach and explains what localism is about why it is growing in importance and how it relates to other themes in politics Illustrated with case studies from the United Kingdom mainland Europe and the Indian sub continent the book analyses localism in conceptual and theoretical terms and locates it within the overall landscape of political thought Key themes covered in the book include place space and scale decentralization and devolution multi level governance public value democracy and empowerment and political design With the focus on the bottom up constructivist aspects of localism the book argues that localism is most likely to work successfully in a political order where sovereignty is distributed across various social spheres and levels of government It offers a comprehensive view of localism by synthesizing its various strands and creating a distinctive framework for design and evaluation This book will be of particular interest to scholars students and practitioners of localism particularly within local and regional government public administration and policy human and political geography and urban studies *Governance for Harmony in Asia and Beyond* Julia Tao,Anthony B. L. Cheung,Martin Painter,Chenyang Li,2009-12-18 Harmony has become a major challenge for modern governance in the twenty first century because of the multi religious multi racial and multi ethnic character of our increasingly globalized societies Governments all over the world are facing growing pressure to integrate the many diverse elements and subcultures which make up modern pluralistic societies This book examines the idea of harmony and its place in politics and governance both in theory and practice in Asia the West and elsewhere It explores and analyses the meanings mechanisms dimensions and methodologies of harmony as a normative political ideal in both Western and Asian philosophical traditions The book argues that in Western political thought which sees politics as primarily concerned with resolving social conflicts and protecting individual rights the concept of harmony has often been neglected In contrast since earliest times harmony or he has been a profound theme in Confucian thought and current leaders of many East Asian governments and the Chinese government have explicitly declared that the realisation of a harmonious society is their aim The book also assesses how harmony is pursued jeopardized or deformed in the real world of politics based upon empirical analysis of a variety of different cultural social and political contexts including China Hong Kong Singapore Malaysia Singapore Vietnam Denmark Latin America and the Scandinavian countries It shows how harmony as an organizing concept can help to promote new thinking in governance and overcome problems of modern day governance like distrust adversarial conflicts hyper individualism coercive state intervention and free market alienation

It also discusses the potential problems posed by the pursuit of harmony in particular in the grave threat of totalitarianism and considers how these risks could best be mitigated *Globalisation and Governance in India* Harihar Bhattacharyya, Lion König, 2015-07-24 This book examines the impact of globalization on some vital aspects of Indian politics its structures and processes and identifies the challenges to globalization itself in order to highlight India's complex and fascinating story In 1991 India officially embraced the policy of neo liberal reforms by signing the GATT agreement which exposed the country its society culture and institutions to the various forces of globalization Globalization as such may not be new to India for the country has been embracing the influence of external cultures and civilisations for millennia but the post 1991 reforms policy marked a significant shift from a predominantly social welfare state and a command economy to a predominantly market driven one Through a range of disciplinary perspectives the authors analyse how India's version of secularism communal harmony nationhood the public sphere social justice and the rights of aboriginal communities came under attack from the forces of the new dispensation The book goes on to show how globalisation in India has posed fresh challenges to political economy democracy federalism decentralization parliamentary system judiciary and the parliamentary Left Critically reflecting on themes in the context of India's globalisation that are local regional national and global this book will be of interest to those in the fields of South Asian Politics Globalisation and International Relations **Municipal**
