Making Of An American Psychologist An Autobiography:

The Making of an American Psychologist Seymour Bernard Sarason, 1988 **Jews and the American Soul** Andrew R. Heinze, 2021-03-09 What do Joyce Brothers and Sigmund Freud Rabbi Harold Kushner and philosopher Martin Buber have in common They belong to a group of pivotal and highly influential Jewish thinkers who altered the face of modern America in ways few people recognize So argues Andrew Heinze who reveals in rich and unprecedented detail the extent to which Jewish values often in tense interaction with an established Christian consensus shaped the country's psychological and spiritual vocabulary Jews and the American Soul is the first book to recognize the central role Jews and Jewish values have played in shaping American ideas of the inner life It overturns the widely shared assumption that modern ideas of human nature derived simply from the nation's Protestant heritage Heinze marshals a rich array of evidence to show how individuals ranging from Erich Fromm to Ann Landers changed the way Americans think about mind and soul The book shows us the many ways that Jewish thinkers influenced everything from the human potential movement and pop psychology to secular spirituality It also provides fascinating new interpretations of Sigmund Freud Alfred Adler and Western views of the psyche the clash among Protestant Catholic and Jewish moral sensibilities in America the origins and evolution of America's psychological and therapeutic culture the role of Jewish women as American public moralists and more A must read for anyone interested in the contribution of Jews and Jewish culture to modern America **Handbook of Psychology, History of Psychology** Donald K. Freedheim, 2003-01-03 Includes established theories and cutting edge developments Presents the work of an international group of experts Presents the nature origin implications and future course of major unresolved issues in the area The Morals and Politics of Psychology Isaac Prilleltensky, 1994-01-01 This book explores the moral social and political implications of dominant psychological theories and practices The analysis entails the therapeutic uses of psychoanalysis cognitive behavioral and humanistic psychology as well as the practice of clinical school and industrial organizational psychology It is argued that applied psychology strengthens the societal status quo thereby contributing to the perpetuation of social injustice Most discussions of morality in psychology deal with the ethical repercussions of practices on individual clients This book is unique in that it deals with the social ethics of psychology that is with the social morality of the discipline It is also unique in that it offers a comprehensive critique of the most popular psychological means of solving human problems The author does not stop at the level of critique but provides a vision for including the values of self determination distributive justice collaboration and democratic participation in psychology He shows how some of these values have already been adopted by feminist and community psychologists Given the prominence of psychology in contemporary society The Morals and Politics of Psychology should be of interest to mental health professionals and their clients as well as to people concerned with morality and social justice Six Community Psychologists Tell Their Stories James G Kelly, Anna Song, 2014-07-16 Six Community Psychologists Tell Their Stories History Contexts and Narrative

presents the unique opportunity to examine how culture and social norms have combined with chance coincidence and serendipity to form the professional identities of men and women who were among the first generation trained to work in the field of community psychology. The book's contributors, disciples of those who founded the sub-field, provide insights into the factors: social status, family history, education, social environment, cultural events, important ideas that furthered their professional development in an emerging field. Their stories still works in progress go far beyond facts, figures, dates and details to document what they've done with their lives and why. Six esteemed community psychologists, three men who began their careers as the field was established in the mid 1960s and three women who took part in the increased opportunities available in the 1970s, recall how important events and social movements affected them as they fulfilled their personal and professional goals. They discuss the effects of family values and styles, class, ethnic status, gender, racism, anti-Semitism, the power of social settings, supportive education and work settings and the impact of post World War II government programs on their education, including the G I Bill and the establishment of United States Public Health Service fellowships. Their stories touch on many common themes including social marginality and sex discrimination, making personal discoveries in response to educational experiences, the significance of fate and the experience of gaining a new or renewed sense of self through meaningful events, occasions and people. These Six Community Psychologists Tell Their Stories: Dr Jean Ann Linney, University of South Carolina, whose experiences involve a combination of idealism, supportive contexts and good fortune; Dr Julian Rappaport, University of Illinois at Urbana-Champaign, who views himself as an insider-outsider whose personal and professional identity crosses traditional boundaries; Dr N Dickon Reppucci, University of Virginia, who became a community psychologist by accident, an outgrowth of his involvement with social protest in the 1960s; Dr Marybeth Shinn, New York University, whose story reflects her interest in the social contexts of neighborhoods and community settings; Dr Edison J Trickett, University of Illinois at Chicago, who writes of the life experiences that have influenced both his work and his longtime involvement in folk music; Dr Rhona S Weinstein, University of California at Berkeley, whose work in the dynamics of self-fulfilling prophecies in educational settings developed early in her career. Insightful commentary on their recollections is provided by two distinguished scholars: Henrika Kuklick, Science Historian at the University of Pennsylvania, and Dan McAdams, Professor of Psychology at Northwestern University. **Six Community Psychologists Tell Their Stories: History, Contexts and Narrative** is a unique resource for community psychologists, autobiographical researchers and anyone interested in the history of psychology. **Routledge Encyclopaedia of Educational Thinkers** Joy Palmer Cooper, 2016-05-20. The Routledge Encyclopaedia of Educational Thinkers comprises 128 essays by leading scholars analysing the most important, influential, innovative and interesting thinkers on education of all time. Each of the chronologically arranged entries explores why a particular thinker is significant for those who study education and explores the social, historical and political contexts in which the thinker worked. Ranging from Confucius and Montessori to Dewey and

Edward de Bono the entries form concise accessible summaries of the greatest or most influential educational thinkers of past and present times Each essay includes the following features concise biographical information on the individual an outline of the individual s key achievements and activities an assessment of their impact and influence a list of their major writings suggested further reading Carefully brought together to present a balance of gender and geographical contexts as well as areas of thought and work in the broad field of education this substantial volume provides a unique history and overview of figures who have shaped education and educational thinking throughout the world Combining and building upon two internationally renowned volumes this collection is deliberately broad in scope crossing centuries boundaries and disciplines The Encyclopaedia therefore provides a perfect introduction to the huge range and diversity of educational thought Offering an accessible means of understanding the emergence and development of what is currently seen in the classroom this Encyclopaedia is an invaluable reference guide for all students of education including undergraduates and post graduates in education or teacher training and students of related disciplines

A Quality of Life Approach to Career Development Geoffrey S. Peruniak, 2010-01-01 A highly original text with broad theoretical appeal to several disciplines A Quality of Life Approach to Career Development also includes exercises and case studies

Clinical Psychology Since 1917 Donald K. Routh, 2013-11-21 This book is dedicated to my wife Marion W Routh In her way she has been informally involved in clinical psychology organizations for as many years as I have She has also served for many years as the first reader of almost all manuscripts I have written including the one for this book I can always depend on her to tell me straight out what she thinks When she found out I was writing this book she was afraid that the mass of detailed factual information I was gathering would be dull to read Therefore when I actually started writing I laid aside all notes and just told the story in a way that flowed as freely as possible I went back later to fill in the documentation and to correct factual errors that had crept in When she looked over the first draft of the book her comment was It is not as boring as I thought it would be Her frankness is so dependable that I knew from these words that there was hope but that I had my work cut out for me in the revision process By the middle of the second draft she grudgingly had to admit that she was getting hooked on the book and kept asking where the next chapter was

The Skeptical Visionary Seymour Bernard Sarason, 2003 Seymour Sarason in the words of Carl Glickman is one of America s seminal thinkers about public education For over four decades he has been a voice of much needed skepticism about our plans for school reform teacher training and educational psychology Now for the first time Sarason s essential writings on these and other issues are collected together offering student and researcher alike with the range depth and originality of Sarason s contributions to American thinking on schooling As we go from debate to debate on issues such as school choice charter schools inclusive education national standards and other problems that seem to drag on without solution Sarason s critical stance on the folly of many of our attempts to fix schools has always had at the center a concern for the main players in our educational institutions the students the teachers and the parents Any plans that cannot

account for their well being are doomed to failure And in the face of such failure the clarity of Sarason s vision for real educational success is a much needed antidote to much of the rhetoric that currently passes for substantial debate A wide ranging and comprehensive selection of Sarason s most significant writings *The Skeptical Visionary* should find a prized space on any student s or teacher s bookshelf Author note Robert Fried is Associate Professor in the School of Education at Northeastern University and is the author of *The Passionate Teacher A Practical Guide* and *The Passionate Learner How Teachers and Parents Can Help Children Reclaim the Joy of Discovery* Seymour Sarason is Professor Emeritus in the Department of Psychology at Yale University He is the author of over forty books and is considered to be one of the most significant researchers in education and educational psychology in the country

Fifty Modern Thinkers on Education

Family and Human Development Across Cultures Cigdem Kagitibasi, 2014-03-05 The culmination of 15 years of research by a Turkish psychologist who was educated in the West this volume examines both the theoretical and practical aspects of cross cultural psychology It takes a contextual developmental functional approach linking the child family and society as they are embedded in culture A refreshingly different view the author presents a portrait of human development from the other side from the perspective of the majority world In a world seemingly dominated by American psychology she proposes the cross cultural orientation as a corrective to the culture boundedness of much of Euro American psychology Analyzing human development in context while avoiding the pitfalls of extreme relativism this work studies development with an inclusive holistic and ecological perspective focusing on the development of the self and of competence In so doing it also attempts to combine cultural contextualism with universalistic standards and psychological processes It proposes a theory of family change which challenges some commonly held modernization assumptions and links theory and application while examining the role of psychology in inducing social change

The Roots of Modern Psychology and Law Thomas Grisso, Stanley L.

Brodsky, 2018-03-01 Psychology s formal interaction with law began early in the twentieth century though little in the way of

substantive scholarly and professional development occurred until several decades later The emergence of psychology and law as a modern field of scholarship was marked by the founding of the American Psychology Law Society AP LS in 1969 now approaching its 50th anniversary The scientific foundation upon which the modern field now rests was established by a small group of psychological researchers legal scholars and clinicians The Roots of Modern Psychology and Law A Narrative History reveals how the field developed during the first decade following the founding of the American Psychology Law Society The contributors to this edited volume widely considered to be among the founders of the field were responsible for establishing and nurturing many of the subfields and topics in psychology and law or forensic psychology that flourished across the next fifty years In each chapter these leaders explain in narrative form how and why the field and the Society developed in its early years through the recounting of key professional events in their careers during the 1970s In some cases this was their first major research study using psychology applied to legal issues In others it was their development of seminal ideas or organizational innovations that had a later impact on the field s development The volume chronicles how an emerging AP LS and field of psychology and law were shaped by these psychologists and how their own initial work was in turn shaped by the organization
