Mommy Stayed In Bed This Morning Helping Children Understand Depression:

Mommy Stayed in Bed This Morning Mary Wenger Weaver, 2002 David confronts the trauma of his mother's depression and its effects on the family

Mommy Stayed in Bed This Morning Mary Wenger Weaver, 2001-06 This unique book shows the impact of a parent's struggle with depression through the eyes of a child. The sensitive and honest portrayal provides talking points and identifies sources of support for children and family. Rarely do books for children 4-8 years old deal with the problem of mental illness in the family. This story follows preschool David as he confronts the trauma of his mother's depression and is helped to resolution. Always viewed through David's eyes, the scenes depict symptoms of depression and therapeutic interventions for children. Readers see David's range of emotions and the many people who help him find the way to happiness and security, including the spiritual dimension. The book helps children recognize their fears and anxieties and then points to ways of discovering health and wholeness. Healing from mental illness is an ongoing process; the book has a realistic but satisfying ending.

American Book Publishing Record, 2002

A Candle for the Children Jennifer Zomar, 2008-11 A multigenerational memoir of recovery and healing. A Candle for the Children tells the candid story of Zomar's upbringing by abusive parents, her own challenges with alcoholism and drugs, the trials of raising a child with attention deficit disorder as a single mother, and the struggles to advocate for her grandson Steven. Taking Care of Mom, *Not Much Longer Now* Julie Wheeler Mayfield, 2022-06-24 In 2005 and again in 2014 my husband Will and I found ourselves reeling from unimaginable tragedies that would take the life of my mother as well as the lives of Will's mother and father. It was the stuff of movies, nightmares, and prime time news stories—things we never imagined could happen in our families. Our faith was put to the test. How could God allow these things to happen? Did he care? These events led to many years and sleepless nights spent wrestling with God and wondering where he was in the midst of our pain. We did indeed find him; he had been right there with us in our suffering all along, pointing us to the hope of heaven.

Out of the Darkened Room William R. Beardslee, 2009-06-27 Depression spreads like a contagion through families, affecting everyone's lives, especially children's. The spouses of people with depression are several times more likely to become depressed themselves; their children are four to six times more likely. Drawing from a comprehensive long-term study of resilient children from depressed families, *Out of the Darkened Room* outlines a wide array of prevention strategies, from the family meeting to open and sustained communication on the subject of mental illness. Dr. Beardslee weaves together his own personal and clinical experiences with the emerging scientific research, the key theoretical concepts, and the steps families need to take in order to make sense of the illness. This is the first book to look at depression as an illness that affects the entire family, not just the individual. Just as *The Unexpected Legacy of Divorce* tracked the impact of divorce on children, *Out of the Darkened Room* examines the long-term effects of parental depression. Major depression is one and a half to three times more common among

immediate family members than among the general population Beardslee's 20 year longitudinal study has established the accepted protocol for treating families struggling with a parent who is depressed

Catherine E. Ross,2017-07-05 A core interest of social science is the study of stratification inequalities in income power and prestige Few persons would care about such inequalities if the poor powerless and despised were as happy and fulfilled as the wealthy powerful and admired Social research often springs from humanistic empathy and concern as much as from scholarly and scientific curiosity An economist might observe that black Americans are disproportionately poor and investigate racial differences in education employment and occupation that account for disproportionate poverty A table comparing additional income blacks and whites can expect for each additional year of education is thus as interesting in its own right as any dinosaur bone or photo of Saturn However something more than curiosity underscores our interest in the table Racial differences in status and income are a problem in the human sense Inequality in misery makes social and economic inequality personally meaningful There are two ways social scientists avoid advocacy in addressing issues of social stratification The first way is to resist projecting personal beliefs values and responses as much as possible while recognizing that the attempt is never fully successful The second way is by giving the values of the subjects an expression in the research design Typically this takes the form of opinion or attitude surveys Researchers ask respondents to rate the seriousness of crimes the appropriateness of a punishment for a crime the prestige of occupations the fair pay for a job or the largest amount of money a family can earn and not be poor and so on The aggregate judgments and variations in judgments represent the values of the subjects and not those of the researcher They are objective facts with causes and consequences of

interest in their own right This work is an effort to move methodology closer to human concerns without sacrificing the scientific grounds of research as such The
