**Development** David C. Engerman, 2025-05-30 The battle against global poverty that began after World War II was a major undertaking engaging economists engineers and organizations Featuring front and centre were six remarkable economists Amartya Sen Manmohan Singh Mahbub ul Haq Jagdish Bhagwati Rehman Sobhan and Lal Jayawardena all born as colonial subjects in the British Empire and studied at Cambridge University They represented a new figure on the world scene the Third World development expert and played a crucial role in global debates about poverty and development Apostles of Development examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones The lives of these apostles reveal how development did not begin with textbooks but with real world attempts to solve very specific and pressing problems Finally the book emphasizes that development was a Global South project first and foremost aiming to improve the conditions of the world's poorest countries It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works The fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read      **Law and Regulation of Commercial Mining of Minerals in Outer Space** Ricky

Lee, 2012-03-05 This monograph addresses the legal and policy issues relating to the commercial exploitation of natural resources in outer space It begins by establishing the economic necessity and technical feasibility of space mining today an estimate of the financial commitments required followed by a risk analysis of a commercial mining venture in space identifying the economic and legal risks This leads to the recognition that the legal risks must be minimised to enable such projects to be financed This is followed by a discussion of the principles of international space law particularly dealing with state responsibility and international liability as well as some of the issues arising from space mining activities Much detail is devoted to the analysis of the content of the common heritage of mankind doctrine The monograph then attempts to balance such interests in creating a legal and policy compromise to create a new regulatory regime      International Financial Policy

FitzGerald,2003-07-08 E V K FitzGerald takes a fresh approach to the macroeconomics of developing countries based on the influence of global markets on domestic savings private investment firm behaviours employment levels and income distribution He suggests that a Keynesian approach is still relevant today when reformulated to reflect open economies heterogeneous firms poverty reduction objectives and volatile financial markets The study concludes with clear recommendations as to how global capital markets might be reconstructed in order to better support economic development
