Monetary Policy In Our Times:

The Restructuring of Capitalism in Our Time William K. Tabb, 2012-01-03 Actions taken by the United States and other countries during the Great Recession focused on restoring the viability of major financial institutions while guaranteeing debt and stimulating growth Once the markets stabilized the United States enacted regulatory reforms that ultimately left basic economic structures unchanged At the same time the political class pursued austerity measures to curb the growing national debt Drawing on the economic theories of Keynes and Minsky and applying them to the modern evolution of American banking and finance William K Tabb offers a chilling prediction about future crises and the structural factors inhibiting true reform Tabb follows the rise of banking practices and financial motives in America over the past thirty years and the simultaneous growth of a shadow industry of hedge funds private equity firms and financial innovations such as derivatives He marks the shift from an American economy based primarily on the production of goods and nonfinancial services to one characterized by financialization then shows how these developments perspectives and approaches not only contributed to the recent financial crisis but also prevented the enactment of effective regulatory reform He incisively analyzes the damage that increasing unsustainable debt and excessive risk taking has done to our financial system and expands his critique to a discussion of world systems and globalization Revealing the willful blind spots of mainstream finance theory Tabb moves beyond an economic model reliant on debt expansion and dangerous levels of leverage proposing instead a social structure of accumulation that places economic justice over profit and more practically institutes an inclusive sustainable model for growth

The Financial Crisis of Our Time Robert W. Kolb, 2011-01-28 In 2006 residential real estate prices peaked and started to fall then threatened the world's financial institutions in 2007 and confronted the global economy with disaster in 2008 In the past few years millions of people have lost very substantial portions of their wealth And while the markets have rebounded considerably they are still far from a full recovery Now professional economists policy experts public intellectuals and the public at large are all struggling to understand the crisis that has engulfed us In *The Financial Crisis of Our Time* Robert W Kolb provides an essential comprehensive review of the context within which these events unfolded arguing that while the crisis had no single cause housing finance played a central role and that to understand what happened one must comprehend the mechanism by which the housing industry came into crisis Kolb offers a history of the housing finance system as it developed throughout the twentieth century and especially in the period from 1990 to 2006 showing how the originate to distribute model of mortgage financing presented market participants with a clockwork of perverse incentives In this system various participants simply by pursuing their narrow personal interests participated in an elaborate mechanism that led to disaster The book then gives a narrative of the crisis as it developed and analyzes all of the participants in the housing market from the home buyers to investors in collateralized debt obligations CDOs At each step the book explains in a nontechnical manner the essential relationships among the market participants and zeroes in on the

incentives facing each party The book also includes an extensive glossary and a detailed authoritative timeline of the subprime financial crisis Offering a unique look at the participants and incentives within the housing finance industry and its role in the biggest financial catastrophe in recent history Robert W Kolb provides one of the most comprehensive and illuminating accounts of the events that will be studied for decades to come as the financial crisis of our time

progressive politics has achieved in recent decades he inspires us with a vision of what it might yet achieve Riveting expert and highly personal this historic memoir is an invaluable insight into our times **A Life in Our Times** John Kenneth Galbraith, 2019-07-31 In his memoirs John Kenneth Galbraith recalls amusingly even brilliantly the important and low moments in his life the men and women he met who were great only interesting entertaining or even absurd Galbraith studied agriculture in his native Canada and agricultural economics at UC Berkeley He taught at the University of California served briefly in FDR's administration and went on to Harvard In Cambridge England he discovered the new economics of John Maynard Keynes During World War II in Washington he held the key job of organizing and administering the system of wartime price controls After the war Galbraith directed the survey that interrogated former Nazi leaders to assess the effects of the air war on the German economy He then worked for the State Department as administrator for economic affairs in the occupied countries and served as an editor of Fortune when the magazine employed some of the best writers around Galbraith returned to Harvard in 1948 and wrote three of the most influential books on economics of his time *The Affluent Society* *The New Industrial State* and *Economics and the Public Purpose* In these lively memoirs the author relates all of this and more his two major political campaigns with Adlai E Stevenson for whom he was adviser and speech writer and John F Kennedy for whom he campaigned across the country his years as ambassador in India and his long opposition to the Vietnam war And he shares the lessons learned from these experiences On every subject Mr Galbraith is succinct and witty The book is full of strong opinion and proceeds by the vehicle of anecdote The serious business of the book is to trace the steps of its author's astonishingly varied and useful life Mr Galbraith's vigor of expression as well as an account of a period of gloom and psychotherapy prevents the writing from ever sounding impersonal That serious business is also to set the record straight on what his books were about and how he evolved his theory of *The Affluent Society* and *The New Industrial State* as two of his most important works were named on why the bombing of Germany during World War II was less than useless why it was patently unnecessary to wage atomic warfare on Japan and why he came to be a dissenter on the war in Vietnam On inflation On the secular priesthood that once presided at the State Department And enchantingly on such movers and shakers he came to know well as the New Dealer Leon Henderson Paul Baran the most interesting economist I have ever known Bernard M Baruch Adlai E Stevenson John F Kennedy and Lyndon B Johnson Christopher Lehmann Haupt *The New York Times* As a raconteur and a literary stylist Galbraith stands with the best As entertainment the book is a total success Its charm comes from the combination of Mr Galbraith's smooth comic timing and his not always charitable wit James Fallows *The New York Times* Galbraith ranks with the most entertaining and provocative political writers in America in this century Without Galbraith the political literature of our time would be far drearier Gaddis Smith *Foreign Affairs* Galbraith has assembled a well nigh complete record of what he has been up to professionally at least since leaving his family's Ontario farm The account is fascinating The narrative consistently holds the distinctive Galbraith style that makes all his books read
