Money and Liberty in Modern Europe William M. Reddy, 1987-01-30 The concept of class along with its correlates in class interest class conflict class consciousness remain indispensable tools of historical explanation Yet research over the last twenty five years especially on the histories of England France and Germany has revealed an increasingly poor fit between these concepts and the reality they purport to explain Some historians have reacted by rejecting class others have proposed bold revisions in our understanding of it that enable it to encompass new research findings This study does neither Instead building on interpretive method Professor Reddy proposes to replace class with an alternative concept that seeks to capture from a new angle the fundamental relations of exchange and authority that have shaped social life in modern Europe

Kinship in Europe David Warren Sabean, Simon Teuscher, Jon Mathieu, 2007-10-01 Since the publication of Philippe Ariès's book *Centuries of Childhood* in the early 1960s there has been great interest among historians in the history of the family and the household A central aspect of the debate relates the story of the family to implicit notions of modernization with the rise of the nuclear family in the West as part of its economic and political success During the past decade however that synthesis has begun to break down Historians have begun to examine kinship the way individual families are connected to each other through marriage and descent finding that during the most dynamic period in European industrial development class formation and state reorganization Europe became a kinship hot society The essays in this volume explore two major transitions in kinship patterns at the end of the Middle Ages and at the end of the eighteenth century in an effort to reset the agenda in family history

Rethinking Labor History Lenard R. Berlanstein, 1993 The fundamentals guiding labor historians are under scrutiny today as never before The field has attempted to uncover the socioeconomic conditions that produced labor militancy and class consciousness with scholars focusing on proletarianization the loss of control over the production process as the key to class conflict Currently this entire approach is being questioned In *Rethinking Labor History* nine well known French labor historians join the debate Advocates of both revisionist Marxism and discourse analysis are represented and examples of empirical research emerging from the theoretical disputes are included

Masters and Lords Shearer Davis Bowman, 1993-04-29 Among the regional landed elites in the Western World of the mid 1800s the two most

formidable were the owners of slave plantations in the Southern states of the U S and the proprietors of manorial estates in the provinces of Prussian East Elbia Masters and Lords surveys the economic social and political histories of the two classes from the seventeenth and sixteenth centuries respectively and pays particular attention to planters during the secession crisis of 1860 61 and to Junkers during the revolutionary crisis of 1848 49 In the process Bowman grapples with such ambiguous and contentious concepts as capitalism conservatism and paternalism Despite very different labor systems antebellum planters and contemporaneous Junkers alike presided over landed estates that functioned as both autocratic political communities and agricultural enterprises exporting valuable commodities to industrializing England This book also highlights important geographic demographic and political contrasts between the South and East Elbia as regional societies Bowman concludes that the crucial distinction between the two landed elites is to be found in the Junkers militarist and statist monarchism versus the planters libertarian but racist republicanism

Samuels, 2011-09-12 This book examines the use principally in economics of the concept of the invisible hand centering on Adam Smith It interprets the concept as ideology knowledge and a linguistic phenomenon It shows how the principal Chicago School interpretation misperceives and distorts what Smith believed on the economic role of government The essays further show how Smith was silent as to his intended meaning using the term to set minds at rest how the claim that the invisible hand is the foundational concept of economics is repudiated by numerous leading economic theorists that several dozen identities given the invisible hand renders the term ambiguous and inconclusive that no such thing as an invisible hand exists and that calling something an invisible hand adds nothing to knowledge Finally the essays show that the leading doctrines purporting to claim an invisible hand for the case for capitalism cannot invoke the term but that other nonnormative invisible hand processes are still useful tools In Proximity Melvyn New, Robert Bernasconi, Richard A. Cohen, 2001 In a world in which everything is reduced to the play of signs detached from what is signified Levinas asks a deceptively simple question Whence then comes the urge to question injustice By seeing the demand for justice for the other the homeless the destitute as a return to morality Levinas escapes the suspect finality of any ideology Levinas's question is one starting point for In

Proximity a collection of seventeen essays by scholars in eighteenth century literature philosophy history and religion and their readings of Spinoza Kant Goethe Wordsworth Behn Defoe Fielding Sterne Diderot Laclos and Mendelssohn The title In Proximity alone speaks volumes about Levinas s philosophy and its relevance today If it is true that we are through technology moving closer and closer to one another writes editor Melvyn New then the importance of proximity and our response to it cannot be overstated For the contributors to this volume the question of whether we may ethically appropriate the object of study for our own causes has become vital Levinas asks us to see ourselves our own reading in proximity to what is not ourselves not our understanding of the world The dialogue created among the essays themselves establishes an enormous diversity of texts and ideologies to which Levinas can contribute something of significant value At a time when the secondary literature on Levinas and his work is expanding explosively the cross disciplinary voices gathered together in In Proximity come at precisely the right time Liberalism and Hegemony Michel Ducharme, Jean-François Constant, 2009-01-01 The essays collected here explore the possibilities and limits presented by The Liberal Order Framework for various segments of Canadian history and within them the paramount influence of liberalism throughout the nineteenth and twentieth centuries is debated in various contexts **Forging Nations** David Blaazer, 2023 Forging Nations considers the relationships between money power and nationality in England Scotland and Ireland from the Union of the Crowns in 1603 to the present day Blaazer examines how struggles over monetary power have continued to shape arguments and attitudes in recent debates over the Euro Scottish independence and austerity **The Navigation of Feeling** William M. Theodossopoulos, 2019-04-02 Does populism indicate a radical crisis in Western democratic political systems Is it a revolt by those who feel they have too little voice in the affairs of state or are otherwise marginalized or oppressed Or are populist movements part of the democratic process Bringing together different anthropological experiences of current populist movements this volume makes a timely contribution to these questions Contrary to more conventional interpretations of populism as crisis the authors instead recognize populism as integral to Western democratic systems In doing so the volume provides an important critique that exposes the exclusionary essentialisms spread by populist rhetoric while also directing attention to local views of political accountability and historical consciousness that are key to understanding this paradox of democracy *Women, Accounting and Narrative* Rebecca E.
