Macroeconomic Analysis in the Classical Tradition James C W Ahlert-Dorfs, 2021-03-23 *Macroeconomic Analysis in the Classical Tradition* explains how the influence of Keynes's macroeconomics, including his changed definitions of some key macroeconomic concepts, has impeded many analysts' ability to readily resolve disputes in modern macroeconomics. Expanding on his earlier work *Macroeconomics without the Errors of Keynes* (2019), the author delves into more aspects of macroeconomic theory and argues for a revision of Keynes's contribution to the field. Attention is given to theories and concepts such as Say's Law, the quantity theory of money, the liquidity trap, the permanent income hypothesis, 100% money and the Phillips curve analysis. The chapters work to build a careful critique of Keynes's economics and make the case that the classical macroeconomics of Smith, Say, Ricardo, Mill and others could help resolve present day policy disagreements and redefine macroeconomic priorities. This book provides essential reading for advanced students and scholars with an interest in the foundations of Keynes's theories and current debates within macroeconomic policy.

What do Economists Know? Robert F. Garnett Jr., 2002-01-04 A provocatively rethink of the questions of what, how and for whom economics is produced. Academic economists in the twentieth century have presumed to monopolise economic knowledge, seeing themselves as the only legitimate producers and consumers of this highly specialized commodity. This has encouraged a narrow view of economics as little more than a private dialogue among professionally licensed knowers. This book recasts this narrow view.

Financial Stability in the Aftermath of the 'Great Recession' P. Arestis, E. Karakitsos, 2013-08-29 The financial crisis and the ensuing great recession are primarily caused by the excessive liquidity that was created in the last thirty years or so of inequality that benefited greatly the financial sector, deregulation and financial liberalisation as well as financial innovation.
