Ethical Transformations for a Sustainable Future Olivier Urbain, Deva Temple, 2011-12-31 It has become increasingly apparent that humanity's complex social political and economic systems are incompatible with the finite capacity of the Earth to replenish resources and absorb wastes If the planet is to continue to be habitable for the myriad web of other creatures that make life possible humans must transform their systems so that they are aligned with natural systems One thing is sure it will not be Nature's laws the delicate interdependence that characterizes Earth's ecosystems that change The change must begin within each person and from there permeate throughout our social political and economic structures The contributors to this volume believe that such transformations are urgently needed and possible and they offer specific examples They suggest solutions that call for new perspectives in our ethics beliefs traditions economy business gender relations education and technology They show that human beings have the power to implement changes in all natural and social environments The chapters in this book have been organized around three keywords Reconnecting Reframing and Rethinking The contributors argue that we need to reconnect with the Earth and nature as well as with each other and parts of ourselves that we have ignored for too long We need to reframe the way in which people prioritize choices in the economy the way we do business and pursue development

The Necessary Transition Malcolm McIntosh, 2017-09-08
Life on Earth for humanity and our ecosystems is at a point of great change. There is much to be learnt about previous great disruptions. The key words are adaptation and transformation. Most international companies operate across multiple social and environmental geographies so they know this intellectual and practical landscape. And for many governments the challenges of social and environmental justice are also paramount, not least because equitable societies are best for business and best for human well-being. The Necessary Transition addresses the many transitions taking place around the world from high to low carbon economies from gross inequality to egalitarianism from massive human rights abuses to socially just societies and from high corruption to societies with high social cohesion and integrity. The book brings together leading international researchers and practitioners to share their knowledge and expertise and offers answers to many of the pressing questions that must be addressed in the journey towards a sustainable enterprise economy, an absolutely necessary transition for humanity. Contributors include Sara Parkin, Founder, Director and Trustee of the UK's Forum for the Future, Bill Champion, Managing Director, Rio Tinto Coal Australia and Mark Swilling, co-author of Just Transitions and Academic Director of the Sustainability Institute, South Africa. The key question is: Is a transition to a sustainable future possible within the logic of conventional capitalism and 20th century models of development? This book provides radical perspectives from varying entry points and is essential reading for academics and practitioners interested in how we plan, speed and scale such necessary transitions.

Toward Self-Sufficiency George Hunt, 2018-11-16
George Hunt spent more than fifty years as a community planner and landscape architect. This included hands-on work in impoverished and low-income areas which helped him understand the dynamics that hold us back from achieving self-sufficiency. In this book he outlines a sustainable community project that seeks to solve social problems that most community planners overlook. The pilot project includes numerous ways to make communities self-sufficient and while it's geared for those in middle and lower income brackets, anyone can use its concepts. He explains how multiple purpose buildings can be used to house a diversity of people, ways to launch a business within the community by collaborating and sharing with others, how to obtain a vocational work study program offered on-site and more. The book is also a reference manual on transition community design, creating a purpose, the meaning of happiness, sustainable agricultural practices, how to live without stuff and how to reduce anxiety and depression.

Earth Capitalism Patrick Petit, 2017-09-29
Today a deepening global recession is causing economic hardships for all kinds of businesses. Earth Capitalism attributes the crisis to inappropriate macroeconomic policies and excessive expansion of financial institutions in blind pursuit of profit, lack of self-discipline among financial institutions and the failure of supervision and regulation to keep up with financial innovations. Collectively these are some of the main causes of the current global economic malaise. Petit argues that human greed and insatiability are the true source of disparities around the world. Greed is the reason why we are depleting the Earth's natural resources and destroying its ecosystems. He argues that instead a good

life should be based on balanced give and take When we take something from society or the Earth we have to maintain a balance by giving something equivalent back Happiness is founded on gratitude for what one has and one should engage in an overall appraisal of life not what one lacks He believes the same principle should be applied to management of the Earth's natural resources and goods The current global crisis impels us to create a responsible capitalism one that benefits all living beings on this planet It reminds us to live a simpler life based on true well being and life satisfaction but simple living is not about living in poverty As its subtitle suggests Earth Capitalism's contributors present leading edge economic concepts business models and best practices that show the path toward creation of responsible capitalism a viable scenario emerging from the current global economic and financial crisis

reassurance in these challenging times **Cultural Crowdfunding** Vincent Rouzé, 2019-11-29 This new book analyses the strategies usages and wider implications of crowdsourcing and crowdfunding platforms in the culture and communication industries that are reshaping economic organizational and social logics Platforms are the object of considerable hype with a growing global presence Relying on individual contributions coordinated by social media to finance cultural production and carry out promotional tasks is a significant shift especially when supported by morphing public policies supposedly enhancing cultural diversity and accessibility The aim of this book is to propose a critical analysis of these phenomena by questioning what follows from decisions to outsource modes of creation and funding to consumers Drawing on research carried out within the Collab programme backed by the French National Research Agency the book considers how platforms are used to organize cultural labour and or to control usages following a logic of suggestion rather than overt injunction Four key areas are considered the history of crowdfunding as a system whose interests crowdfunding may serve the implications for digital labour and lastly crowdfunding s interface with globalization and contemporary capitalism The book concludes with an assessment of claims that crowdfunding can democratize culture **Sustainable Society** Rudolf Isler, 2014-10-06 Western society has faced many challenges in the last few years Economies have come under extreme pressure and so have governments and business with obvious knock on effects for wider society The battle between regulation and the free market has never been fiercer Looking for guidance and sustainable ways to get society back on track Rudolf Isler considers ideas from unorthodox thinkers including Silvio Gesell Henry George and Rudolf Steiner exploring everything from regional currencies to land reform Steiner proposed a threefold social structure which Isler teases out exploring the implications of this approach for our modern societies He finds a surprisingly practical system with potential for immediate implementation in small steps along with longer term rethinking This is a down to earth open minded book which helps us explore viable alternatives to the current situation **Fixing the System** Adrian Kuzminski, 2008-06-01 In the current climate of dissatisfaction with democratic Western political and economic systems this is a timely book that demonstrates a true political Third Way Populism is distinguished from other political movements by its insistence on two things conspicuously missing from modern systems of political economy genuine democracy based on local citizen assemblies and the widespread distribution among the population of privately owned economic capital Fixing the System offers a comprehensive historical account of populism revealing the consistent and distinct history of populism since ancient times Adrian Kuzminski demonstrates that populism is a tradition of practice as well as thought ranging from ancient city states to the frontier communities of colonial america all places where widely distributed private property and democratic decision making combined to foster material prosperity and cultural innovation In calling for a wide distribution of both property and democracy populism opposes the political and economic system found today in the united states and other Western countries where property remains highly concentrated in private hands and where representatives chosen in impersonal mass elections

frustrate democracy by serving private monied interests rather than the public good As Kuzminski demonstrates as one of very few systematic alternatives to today s political and economic system populism offers a pragmatic program for fundamental social change that deserves wide and serious consideration Populism is a genuine third way in politics a middle path between the extremes of corporate anarchy and collective authoritarianism As America takes stock of her current situation and looks toward the future in the 2008 election year Fixing the System offers a trenchant and timely study of this deep rooted movement
