Monitoring the Comprehensive Nuclear-Test-Ban-Treaty: Hydroacoustics Catherine de Groot-Hedlin, John Orcutt, 2012-12-06 In September 1996 the United Nations General Assembly adopted the Comprehensive Nuclear Test Ban Treaty CTBT prohibiting nuclear explosions worldwide in all environments The treaty calls for a global verification system including a network of 321 monitoring stations distributed around the globe a data communications network an international data centre IDC and on site inspections to verify compliance A global hydroacoustic monitoring system is being planned and implemented for verification of the CTBT Much of the research conducted over the past several decades on acoustic surveillance of the oceans formerly driven by the need to detect and track submarines is now being applied to the development of effective monitoring methods to verify compliance with the CTBT The aim of this volume on Hydroacoustic Monitoring of the CTBT is to summarize the research being conducted in this field and to provide basic references for future research Much of the new research emphasizes major advances in understanding the coupling of ocean acoustic waves with elastic waves in the solid Earth Topics covered include source excitation detection and classification of events generating hydroacoustic signals discrimination between underwater explosions and naturally occurring events as well as topics in coupling of acoustic to seismic wavefields *Monitoring the Comprehensive Nuclear-Test-Ban Treaty* Catherine de Groot-Hedlin, John Orcutt, 2001-06 In September 1996 the United Nations General Assembly adopted the Comprehensive Nuclear Test Ban Treaty CTBT prohibiting nuclear explosions worldwide in all environments The treaty calls for a global verification system including a network of 321 monitoring stations distributed around the globe a data communications network an international data centre IDC and on site inspections to verify compliance A global hydroacoustic monitoring system is being planned and implemented for verification of the CTBT Much of the research conducted over the past several decades on acoustic surveillance of the oceans formerly driven by the need to detect and track submarines is now being applied to the development of effective monitoring methods to verify compliance with the CTBT The aim of this volume on Hydroacoustic Monitoring of the CTBT is to summarize the research being conducted in this field and to provide basic references for future research Much of the new research emphasizes major advances in understanding the coupling of ocean acoustic waves with elastic waves in the solid Earth Topics covered include source excitation detection and classification of events generating hydroacoustic signals discrimination between underwater explosions and naturally occurring events as well as topics in coupling of acoustic to seismic wavefields *Analytical Methods for Nonproliferation* Edward C. Morse, 2016-04-04 This book is intended to be used as a textbook and research reference for the field of nuclear nonproliferation The book is primarily technical and focussed on methods of detecting clandestine nuclear material that might be illicitly transported The book also touches on nuclear forensics i e methods for identification attribution and establishment of transport pathways for illicit nuclear material Also covered are topics of methods used for arms control and

treaty verification and an assessment of technologies under development for all of the above A description of the government and international agencies involved in nuclear terrorism prevention nuclear safeguards and arms control is also included
