How Forests Think Eduardo Kohn, 2013-08-03 Can forests think Do dogs dream In this astonishing book Eduardo Kohn challenges the very foundations of anthropology calling into question our central assumptions about what it means to be human and thus distinct from all other life forms Based on four years of fieldwork among the Runa of Ecuador s Upper Amazon Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world s most complex ecosystems Whether or not we recognize it our anthropological tools hinge on those capacities that make us distinctly human However when we turn our ethnographic attention to how we relate to other kinds of beings these tools which have the effect of divorcing us from the rest of the world break down How Forests Think seizes on this breakdown as an opportunity Avoiding reductionistic solutions and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself In this groundbreaking work Kohn takes anthropology in a new and exciting direction one that offers a more capacious way to think about the world we share with other kinds of beings

Lavinia Fontana's Mythological Paintings Liana De Girolami Cheney, 2020-08-18 This volume investigates emblematic and art historical issues in Lavinia Fontana s mythological paintings Fontana is the first female painter of the sixteenth century in Italy to depict female nudes as well as mythological and emblematic paintings associated with concepts of beauty and wisdom Her paintings reveal an appropriation of the antique a fusion between patronage and culture and a humanistic pursuit of Mannerist conceits Fontana s secular imagery provides a challenging paragone with the male tradition of history painting during the sixteenth century and paves the way for new subjects to be depicted and interpreted by female painters of the seventeenth century

Bonvillian,Nicole Kissane Lee,Tracy T. Dooley ,Filip T. Loncke ,2020-07-30 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike **Sign of the Qin** Laura Geringer Bass,Laura Geringer,2004 In long ago China Prince Zong the mortal young Starlord chosen to save humankind from destruction joins the twin outlaws White Streak and Black Whirlwind to fight the Lord of the Dead and his demon hordes **Key Works in Radical Constructivism** Ernst von Glasersfeld,2007-01-01 Key Works on Radical Constructivism brings together a number of essays by Ernst von Glasersfeld that illustrate the application of a radical constructivist way of thinking in the areas of education language theory of knowledge and the analysis of a few concepts that are indispensable in almost everything we think and do Ernst von Glasersfeld s work opens a window on how we know what we know The present work grew out of a desire to make more accessible this line of thought to highlight its originality and consistency and to illustrate its fecundity in the domains of cognition and learning The first three parts of this book contain texts by Glasersfeld that outline the constructivist approach and explicate the frequently drastic reconceptualizations he has suggested Both the last part and the postscript consist of

commentaries by Edith Ackermann Jacques D sautels G rard Fourez Leslie P Steffe and Kenneth Tobin scholars in the fields that Glasersfeld has been concerned with They examine a number of critical aspects pertaining to radical constructivism s current and future development often tracing out paths that warrant further exploration and reflection in particular concerning the sociopolitical dimension of knowledge Key Works on Radical Constructivism is intended as a reference book for researchers educators and students of education and for anyone interested in grasping or deepening their grasp of radical constructivism s tenets ambitions and concerns Readers will discover in this collection of firsthand contributions the contours of a bold contemporary debate about a most compelling current of thought

Touch Monkeys Marnie Parsons, 1994-01-01 All too often Nonsense is relegated to the nursery Marnie Parsons argues that rather than being mere child s play nonsense is a major force in poetic language In Touch Monkeys she presents us with an original approach to a much maligned linguistic pursuit Parsons distinguishes between nonsense language and Nonsense the genre Her major chapters work towards a vision of nonsense language as palimpsestic as involving the overlaying of several ways of making meaning on a verbal sense system and the consequent disruption of that system This reading of nonsense is itself an intersection bringing together historical and contemporary criticism of literary Nonsense and a wide range of poetic and literary theories Using Carroll and Lear as examples of Nonsense Parsons provides a survey of existing Nonsense criticism in English and then extends and elaborates nonsense in theoretical directions set by Gilles Deleuze and Julia Kristeva among others and by the poetics of such writers as Charles Olson Charles Bernstein Ron Silliman Steve McCaffery Louis Zukofsky and Daphne Marlatt Following each chapter is a close reading of work by writers as varied as Rudyard Kipling Colleen Thibodeau Adrienne Rich and Lyn Hejinian These readings provide practical applications

of nonsense theory and establish the interdependence of theory and practice Nonsense inhabits and challenges traditional forms simultaneously in Touch Monkeys Parsons enters into the spirit of the genre
