dismay at what has become of the United States in the post Cold War era He depicts the decline of the country from its former status as the world's model nation to its current one as global pariah He attributes this decline not to mischievous foreign powers or even to wicked politics at home but rather to the Americans themselves He describes how the pervasive culture of consumerism and overweening ignorance of Americans have left them incapable of engaging in the kind of enlightened public discourse a genuine democracy demands He considers the decline irreparable and he has come to believe that he has lost his country After a lifetime of service to America his loss is personal and painful In Chapters I III and V he recounts some personal episodes in his life as a diplomat He was a hostage to terrorists twice once in the Near East and once in the United States Senate On an earlier occasion as a brand new junior diplomat he was fired for slugging a journalist JFK saved his career but in a heart rending way Not long after that Courtney helped his Turkish secretary in Istanbul pursue an illicit affair with the result that interlocking sexual and political betrayals disrupted the Soviet Union's espionage operations throughout the Near East A few years later in Calcutta he was encouraged by the CIA no less to fall into a Soviet sex trap He concludes his personal reminiscences by describing his friendship with a man who probably was the KGB station chief in London but who in 1992 was seeing his world turn upside down This poignant tale and those preceding it capture the Cold War world that was They also foreshadow the world that was to come

[Handbook of Regional Conflict Resolution Initiatives in the Global South](#) Jeronimo Delgado-Caicedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the

norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People s Republic of China India Brazil or South Africa in the decision making process in today s world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives

The State of the American Mind: Stupor and Pathetic Docility Volume Ii Amechi Okolo, 2010-06-11 This book The State of the American Mind Stupor and Pathetic Docility Volume One begins to unravel some of the most obvious perplexing embarrassing and enduring problems and contradictions of American history and sociology viz how could the American revolution that started with the most ringing and most inspiring Declarations of human equality in world history end up establishing the most vicious exploitative society the world ever knew Black chattel slavery and only ten percent white enfranchisement etc Further how could men of such great wisdom and intellect like George Washington James Madison Thomas Jefferson and others who were Enlightenment scholars and clearly knew that slavery was despicable and evil because they had variously experienced white servitude and slavery themselves collude to establish and institutionalize the horrible system of Negro chattel slavery in America and also disenfranchised over 90 percent of people of their own race actions that racism could not explain The structural institutional slavery system they established and the resultant consequent racism hobbles America today as it did in the past and forced Eric Holder the Attorney General to declare that America is a nation of cowards when it comes to race discussions Thus this book starts with serious critical discussions of race in America and reveals what no textbook has ever done viz that most early American whites and Blacks were slaves an uncomfortable fact that would shock most Americans because it contradicts the orthodoxy or the dominant narrative that only Blacks were brought here in chains Further the book also shows the year

Black slavery started something almost all textbooks got wrong It also shows who was the first Black slave in America something no textbook ever mentions It also shows when and how racism started in America and many other very sensitive and embarrassing but necessary issues that America avoids but must be frankly discussed for America to move forward This book therefore shatters the two dominant themes of Americas history and sociology that Blacks were brought into America in chains as slaves while whites came to America in search of freedom as Harvard educated President Obama famously told us in his race speech Thus the crowning lesson of this book in addition to discussing some critical policy issues like education health care etc is that it discovers the centripetal force of the American society that eluded contemporary Americans because American bosses have laboriously concealed the facts from the public the scary but clearly healthy uniting fact that most Americans are united by their common ancestry their universal history and experience of servitude bond indentures and slavery Nothing is more universal more common and more shared in American history and sociology than the fact that most of our ancestors black and white were servants bond indentures and slaves who were dominated and super exploited by few overlords Colonial America was the preferred dumping ground for British outcasts rejects criminals masterless class vagabonds bond indentures slaves etc until 1776 when Australia replaced America as the British dump for its rejects and surplus citizens Thus that America was a nation founded by British rejects and losers is inherently more rational than the prevailing orthodoxy or the Obama theory of Americas founders that they were great honorable men who journeyed across the ocean for freedom because of the obvious reason that good powerful achieving citizens do not normally emigrate to new uncharted lands

Changing Societies, Changing Party Systems Heather Stoll, 2013-11-25 This book studies how society shapes democratic political competition with a focus on the number of political parties This stands in contrast to the prevailing approach of explaining cross national and longitudinal differences in political competition with political institutions such as the electoral system The book develops the most general theory about how society shapes the number of parties to date as well as the most extensive measures of social heterogeneity which it uses to test its hypotheses
