Miseducation David Elkind,1987-11-12 David Elkind s new book is designed to help parents avoid the miseducation of young children that is on the increase today Across the country in schools and in homes educational programs intended for school age children are being misappropriated for the instruction of preschoolers Books lectures and the media propagate the idea that only a superkid can grow up to compete successfully in the adult world thereby encouraging parents to teach infants and young children academic and athletic skills Yet there is considerable evidence that early instruction can do lasting harm that young children subjected to this kind of pressure are in fact at psychological and physical risk Dr Elkind shows us the very real difference between the mind of a preschool child how it works and that of a school age child He makes clear how much young children can and do learn when they are presented with developmentally appropriate parenting practices and education He shows us how healthy education supports and encourages the spontaneous learning process through which young children explore and understand their immediate world and how miseducation ignores it attempting to teach the wrong things at the wrong time And in turn we see how early miseducation can cause permanent damage to a child s self esteem the loss of the positive attitude a child needs for learning the blocking of natural gifts and potential talents Finally Dr Elkind discusses what parents should look for when deciding upon the initial stages of their children s education and what preschool programs are the most considerate of the individual child In a special section he answers the most common questions he s heard from parents

Time to Write John Sylvester Lofty,2015-02-10 Analyzes interviews with students teachers and administrators to develop a new set of literacies essential for student success in the digital age To read John s work is to take on the role of a patient listener A book like a piece of music is scored for time and I feel Time to Write is scored adagio I believe that Time to Write can be read as a critique of the time chopping approach to education and an argument for presence for being fully open to experience for being there To do good work we must enter something like island time or what John calls existential time or what is

sometimes called flow when we lose at least temporarily a sense of clock time from the Foreword by Thomas Newkirk Twenty five years ago John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community For the new edition of *Time to Write* Lofty returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences including technology social media and the influx of new residents from urban areas Building on the ethnographic findings of the original study the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school based literacy Lofty examines the new literacies now essential for students in a technologically connected world both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland
