Fr Dr James Bacik author of *Apologetics and the Eclipse of Mystery* The Nature of Love, Volume 3 Irving Singer, 2009-02-27 The final volume of Singer's trilogy discusses ideas about love in the work of writers ranging from Kierkegaard Nietzsche and Tolstoy to Freud Proust D H Lawrence Shaw and others in the contemporary world Irving Singer's trilogy *The Nature of Love* has been called majestic New York Times Book Review monumental Boston Globe one of the major works of philosophy in our century *Nous* wise and magisterial Times Literary Supplement and a masterpiece of critical thinking that is a timely eloquent and scrupulous account of what after all still makes the world go round Christian Science Monitor In the third volume Singer examines the pervasive dialectic between optimistic idealism and pessimistic realism in modern thinking about the nature of love He begins by discussing anti-Romantic Romantics focusing on Kierkegaard Nietzsche and Tolstoy influential nineteenth century thinkers whose views illustrate much of the ambiguity and self-contradiction that permeate thinking about love in the last hundred years He offers detailed studies of Freud Proust Shaw D H Lawrence and Santayana and he maps the ideas about love in Continental existentialism particularly those of Sartre and de Beauvoir Singer finally envisages a future of cooperation between pluralistic humanists and empirical scientists This last volume of Singer's trilogy does not pretend to offer the final word on the subject any more than do most of the philosophers he discusses but his masterful work can take its place beside their earlier investigations into these vast and complex questions

Collected Works of George Grant: 1951-1959 George Parkin Grant, 2000-01-01 A collection of all the important material from the 1950s when philosopher George Grant did his first teaching and writing at Dalhousie University *The Mystery of Being: Reflection and mystery.-2. Faith & reality* Gabriel Marcel, 1950 *Out of Control* Richard A. Cohen, 2016-05-09 After the end of superstitious religion what is the meaning of the world Baruch Spinoza's answer is truth Emmanuel Levinas's is goodness science versus ethics In *Out of Control* Richard A Cohen brings this debate to life providing a nuanced exposition of Spinoza and Levinas and the confrontations between them in ethics politics science and religion Spinoza is the control the inexorable defensive logic of administrative rationality where freedom is equated to necessity a

seventeenth century glimpse of Orwellian doublespeak and Big Brother Levinas is the way out transcendence not of God being and logic but of the other person experienced as moral obligation To alleviate the suffering of others nothing is more important Spinoza wagers everything on mathematical truth discarding the rest as ignorance and illusion for Levinas nothing surpasses the priorities of morality and justice to create a world in which humans can be human and not numbers or consumers drudges or robots Situating these two thinkers in today's context Out of Control responds to the fear of dehumanization in a world flattened by the alliance of positivism and plutocracy It offers a nonideological ethical alternative a way out and up in the nobility of one human being helping another and the solidarity that moves from morality to justice

Routledge History of Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchwork of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau-Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti-foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological tube of philosophical scientific and other cultural events

Becoming Apostolic Catherine Sexton, 2024-07-01 This book explores the experience and understanding of Roman Catholic sisters of their vocation to the apostolic form of religious life as they age Based on interviews with twelve religious women it draws on

the practice of Lectio Divina to explore how these women describe their call to service and activity at a time in life when these might be curtailed by physical diminishment and increasingly reduced social interaction and influence As the very institutions of religious life are themselves under threat the book identifies new emerging forms of ministry through presence to each other and to their carers *The Religious Existentialists and the Redemption of Feeling* Anthony Malagon, Abi Doukhan, 2019-06-27 Traditional philosophizing has generally depended upon reason as its primary access to truth Subjective experiences such as feelings the passions and emotions have typically been viewed as secondary to reason untrustworthy or both The Religious Existentialists and the Redemption of Feeling revisits how the movement of existentialism via the religious existentialists has contributed to a rethinking of the role of subjective experience in contrast to the rationalist and idealist traditions thus reframing the importance of feelings in general for the philosophical enterprise as a whole Through the considerations of a variety of thinkers this collection provides a fresh look at the contributions of twentieth century existentialists thereby re contextualizing the very notion of existentialism offering a powerful and genuine re evaluation of the significance of subjectivity and underscoring the continued relevance of the religious existentialists *Psychoanalysis as a Spiritual Discipline* Paul Marcus, 2021-04-26 The great existential psychiatrist Ludwig Binswanger famously pointed out to Freud that therapeutic failure could only be understood as the result of something which could be called a deficiency of spirit Binswanger was surprised when Freud agreed asserting Yes spirit is everything However spirit and the spiritual realm have largely been dropped from mainstream psychoanalytic theory and practice This book seeks to help revitalize a culturally aging psychoanalysis that is in conceptual and clinical disarray in the marketplace of ideas and is viewed as a theory in crisis no longer regarded as the primary therapy for those who are suffering The author argues that psychoanalysis and psychoanalytic psychotherapy can be reinvigorated as a discipline if it is animated by the powerfully evocative spiritual moral and ethical insights of two dialogical personalist religious philosophers Martin Buber a Jew and Gabriel Marcel a Catholic who both initiated a Copernican revolution in human thought In chapters that focus on love work faith suffering and clinical practice Paul Marcus shows how the spiritual optic of Buber and Marcel can help revive and refresh psychoanalysis and bring it back into the light by communicating its inherent vitality power and relevance to the mental health community and to those who seek psychoanalytic treatment **Phenomenology** Leonard Lawlor, 2014-09-03 After Husserl the study of phenomenology took off in different directions The ambiguity inherent in phenomenology between conscious experience and structural conditions lent itself to a range of interpretations Many existentialists developed phenomenology as conscious experience to analyse ethics and religion Other phenomenologists developed notions of structural conditions to explore questions of science mathematics and conceptualization Phenomenology Responses and Developments covers all the major innovators in phenomenology notably Sartre Merleau Ponty and the later Heidegger and the major schools and issues The volume also shows how phenomenological thinking encounters a limit a limit most apparent in the aesthetical and

hermeneutical development of phenomenology The volume closes with an examination of the furthering of the division between analytic and continental philosophy *The Things That Really Matter* Michael Hauskeller, 2022-05-10 While being rooted in the academic discourse *The Things That Really Matter* comprehensively explores the most fundamental aspects of human life in an accessible non technical language adding fresh perspectives and new arguments and considerations that are designed to stimulate further debate and in some cases a deliberate redirection of research interests in the respective areas It features a series of conversations about the things in our life that we all in one way or another wrestle with if we are at all concerned about what kind of world we live in and what our role in it is things like birth age and death good and evil the meaning of life the nature of the self and the role the body plays for our identity our gendered existence love and faith free will beauty and our experience of the sacred Situating abstract ideas in concrete experience *The Things That Really Matter* encourages the reader to participate in an open ended dialogue involving a variety of thinkers with different backgrounds and orientations Lively and accessible it shows thinking as an open ended process and a collaborative endeavour that benefits from talking to each other rather than against each other featuring real conversations where ideas are explored tested changed and occasionally dropped It is thinking in motion personal yet universal **The History of Continental Philosophy** Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume *History of Continental Philosophy* will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the *History* traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind *A History of Continental Philosophy* has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts *A History of Continental Philosophy* is destined to be the resource of first and last resort for students and scholars alike Cybernetic-Existentialism Steve Dixon, 2019-11-14 *Cybernetic Existentialism* Freedom Systems and Being for Others in Contemporary Arts and Performance offers a unique discourse and an original aesthetic theory It argues that fusing

perspectives from the philosophy of Existentialism with insights from the universal science of cybernetics provides a new analytical lens and deconstructive methodology to critique art In this study Steve Dixon examines how a range of artists works reveal the ideas of Existentialist philosophers including Kierkegaard Camus de Beauvoir and Sartre on freedom being and nothingness eternal recurrence the absurd and being for others Simultaneously these artworks are shown to engage in complex explorations of concepts proposed by cyberneticians including Wiener Shannon and Bateson on information theory and noise feedback loops circularity adaptive ecosystems autopoiesis and emergence Dixon s groundbreaking book demonstrates how fusing insights and knowledge from these two fields can throw new light on pressing issues within contemporary arts and culture including authenticity angst and alienation homeostasis radical politics and the human as system

An Ethics for an Ecological Age Brian Fay,2024-10-12 This book presents a comprehensive vision of human life ecology and theology inspired by Spinoza According to this vision human beings and all other natural entities are not independent substances but are rather modes of nature meaning that they are fleeting manifestations of nature s conatus By intuitively and not just intellectually recognizing ourselves to be modes of nature we can more fully realize ourselves To achieve this requires a radical rethinking of our world of ourselves and of God and a far richer understanding of ecology and an ethics grounded in ecology than those in current usage Brian Fay explores this rethinking and the result is a new far reaching vision of our world and how to be responsible thriving agents in it

Finding True Happiness Fr. Robert Spitzer, SJ, 2015-04-23 One of the hottest topics in contemporary culture is happiness so much so that the United Nations declared an International Happiness Day in response to the immense popularity of Pharrell Williams song Happy The explanation for this current fixation seems to lie in the contrary phenomenon unhappiness Despite the fact that we have tremendous access to every imaginable form of entertainment we experience a pervading sense of insecurity emptiness and malaise amid sporadic peak experiences The problem seems to lie less in the external environment than in the internal one We seem in the words of Viktor Frankl to be suffering from an absence of meaning that pervades both individuals and societies giving rise to a collective emptiness loneliness and alienation Finding True Happiness attempts to provide a way out of this personal and cultural vacuum by helping people to identify and then reach for happiness As Aristotle noted 2 400 years ago happiness is the one thing we can choose for its own sake everything else is chosen for the sake of happiness After an exhaustive investigation of philosophical psychological and theological systems of happiness author Fr Spitzer developed the Four Levels of Happiness which he based on the classical thinkers Plato Aristotle Augustine and Aquinas the contemporary philosophers Marcel Scheler Buber Ricoeur and Jaspers and the modern psychologists Maslow Frankl Erikson Seligman Kohlberg and Gilligan Finding True Happiness is both a philosophical itinerary and a practical guidebook for life's most important journey from the mundane and the meaningless to transcendent fulfillment No other book currently available combines such breadth of practical advice and such depth of philosophical psychological and spiritual wisdom
