Mystical Moments And Unitive Thinking:

Mystical Moments and Unitive Thinking Daniel Merkur, 1999-01-01 Building on the psychoanalytic object relations theory that the self is always in relationship with an object Merkur argues that the solipsism of some varieties of mystical union always implies unconscious ideas of a love object who is transcendent [Integral Ecology](#) Sean Esbjörn-Hargens, Michael E. Shamanic Trance in Modern Kabbalah Jonathan Garb,2011-04-15 Bringing to light a hidden chapter in the history of modern Judaism Shamanic Trance in Modern Kabbalah explores the shamanic dimensions of Jewish mysticism Jonathan Garb integrates methods and models from the social sciences comparative religion and Jewish studies to offer a fresh view of the early modern kabbalists and their social and psychological contexts Through close readings of numerous texts some translated here for the first time Garb draws a more complete picture of the kabbalists than previous depictions revealing them to be as concerned with deeper states of consciousness as they were with study and ritual Garb discovers that they developed physical and mental methods to induce trance states visions of heavenly mountains and transformations into animals or bodies of light To gain a deeper understanding of the kabbalists shamanic practices Garb compares their experiences with those of mystics from other

traditions as well as with those recorded by psychologists such as Milton Erickson and Carl Jung Finally Garb examines the kabbalists relations with the wider Jewish community uncovering the role of kabbalistic shamanism in the renewal of Jewish tradition as it contended with modernity

Relating to God, Dan Merkur, 2013-11-21 In Relating to God Clinical Psychoanalysis Spirituality and Theism Dan Merkur conceptualizes religious discourse within psychoanalysis He proposes that God be treated as a transference figure whose analysis leads to a reduction of the parental content that is projected onto God Merkur notes that religious conversion experiences regularly involve theological intuitions that are either rational or owing to morbid complications have undergone displacement into irrational symbolism Analysis renders the religiosity more wholesome Traditionally psychoanalytic thought has been dismissive of religion Freud is on record however as having called psychoanalysis a neutral procedure He argued that religion with its dependency on a providential God who punishes disobedience imagines spirituality on the model of human parents and fails to approach spirituality in an appropriately scientific manner He wrote little of spiritual phenomena but mentioned both the rationality of the universe and the parapsychological occurrence of thought transference Occasionally later psychoanalysts used different language in order to contrast wholesome and morbid forms of religion Erich Fromm distinguished authoritarian and humanistic religions while D W Winnicott condemned fetishistic behavior while approving of playful illusions that require belief in These formulations constructed a middle position for clinicians neither categorically opposed to religion as classical psychoanalysis was nor do they embrace cultural relativity as spiritually oriented psychotherapists are currently advocating What sorts of spiritual practices does psychoanalysis find unobjectionable As examples of humanistic religion Fromm named Zen Buddhism

Buddhist mindfulness meditation and the via negativa or way of negating that some Christian and Jewish mystics have followed Because the Bible based approaches are little known Merkur discusses their histories procedures and psychoanalytic understanding **Philosophy of Mysticism** Richard H. Jones,2016-03-23 This work is a comprehensive study of the philosophical issues raised by mysticism Mystics claim to experience reality in a way not available in normal life a claim which makes this phenomenon interesting from a philosophical perspective Richard H Jones s inquiry focuses on the skeleton of beliefs and values of mysticism knowledge claims made about the nature of reality and of human beings value claims about what is significant and what is ethical and mystical goals and ways of life Jones engages language epistemology metaphysics science and the philosophy of mind Methodological issues in the study of mysticism are also addressed Examples of mystical experience are drawn chiefly from Buddhism and Advaita Vedanta but also from Christianity Judaism Islam and Daoism **Abraham Abulafia's Esotericism** Moshe Idel,2020-10-12 This book focuses on Abraham Abulafia s esoteric thought in relation to Maimonides Maimonideans and Islamic thought in the line of Leo Strauss theory of the history of philosophy A survey of Abulafia s sources leads into an analysis of the esoteric meaning on the famous parable of the three rings considering also the possible connection between this parable which Abulafia inserted into a book dedicated to his student the 13th century rabbi Nathan the wise and the Lessing s Play Nathan the Wise The book also examines Abulafia s universalistic understanding of the nature of the Bible the Hebrew language and the people of Israel or the Sinaic revelation The universal aspects of Abulafia s thought have been put in relief against the more widespread Kabbalistic views which are predominantly particularistic A number of texts have also been identified here for the first time as authored by Abulafia

Psychoanalytic Approaches to Myth Daniel Merkur,2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company *Miracles* J. Harold Ellens,2008-07-30 Can science psychology and biology explain miracles This three volume set attempts to answer that question presenting the latest as well as classic thinking and research regarding miracles from fields that include psychology psychiatry theology biology and history We have all heard of what seem miraculous events which have surfaced across history They range from stigmata and bleeding icons to deadly tumors that disappear and healers who succeed just by laying hands on the afflicted from people who can predict unexpected events to so called mediums and those who can allegedly see and speak with the dead These books led by an eminent scholar who serves as series editor for the Praeger series Psychology Religion and Spirituality examine miracles of body mind and spirit presenting the most recent research and writing on these uncommon events aiming to bring hard science to some of the most persistent and peculiar phenomena associated with the human race Can science psychology and biology explain miracles This three volume set attempts to answer that question presenting the latest as well as classic thinking and research regarding miracles from fields that include psychology psychiatry theology biology and history From news of a crippled woman who left her wheelchair and walked after an evangelist prayed over her to stories of people who died on the operating

table only to be revived to tell of bright lights and the pathway to the afterlife we've all heard of what seem miraculous events. They have surfaced across history. They range from stigmata and bleeding icons to deadly tumors that disappear and healers who succeed just by laying hands on the afflicted from people who can predict unexpected events to so-called mediums and those who can allegedly see and speak with the dead. Some miracles are intricately tied to religious beliefs but there are millions of people who ascribe to no particular religion yet still believe that things happen that defy all laws of nature and thus defy scientific explanation. In these books, eminent scholar J. Harold Ellens and his team of expert contributors examine miracles of body, mind, and spirit, presenting the most recent research and writing on these uncommon events as they aim to bring hard science to some of the most persistent and peculiar phenomena associated with the human race.

Mysticism, 2021-09-06. Although very different and coming from a range of academic backgrounds, the contributors are nevertheless united in their attempts to understand more about mysticism from a perspective that puts the human being in the center.

Early Israel Alex Shalom Kohav, 2022-11-29. Early Israel offers the most sweeping reinterpretation of the Pentateuch since the nineteenth century Documentary Hypothesis. Engaging a dozen plus modern academic disciplines from anthropology, biblical studies, Egyptology, and semiotics to linguistics, cognitive poetics, and consciousness studies from religious studies, Jewish studies, psychoanalysis, and literary criticism to mysticism studies, cognitive psychology, phenomenology, and philosophy of mind, it wrests from the Pentateuch an outline of the heretofore undiscovered ancient Israelite mystical initiatory tradition of the First Temple priests. The book effectively launches a new research area: Pentateuchal esoteric mysticism, akin to a center or organizing principle discussed in biblical theology. The recovered priestly system is discordant vis-à-vis the much later rabbinical project. This volume appeals to a diverse academic community from Biblical and Jewish studies to literary studies, religious studies, anthropology, and consciousness studies.

דפנה ארבל, Andrei A. Orlov, 2011. This collection of essays is a tribute to Rachel Elior's decades of teaching, scholarship, and mentoring. If a Festschrift reflects the individuality of the honoree, then this volume offers insights into the scope of Rachel Elior's interests and scholarly achievements in the study of the Dead Sea Scrolls, Jewish apocalypticism, magic, and mysticism from the Second Temple period to the later rabbinic and Hekhalot developments. The majority of articles included in the volume deal with Jewish and Christian apocalyptic and mystical texts constituting the core of the experiential dimension of these religious traditions.

A Dream in the World Robin van Löben Sels, 2004-03. How can science and religion co-exist in the modern discipline of psychotherapy? *A Dream in the World* explores the interfaces between religious experience and dream analysis. At the heart of this book is a selection of dreams presented by the author's patient during analysis, which are compared with the dreams of Hadewijch, a thirteenth-century woman mystic. The patient's dreams led the modern woman to an unanticipated breakthrough encounter with the divine, her experience of soul. The experience reoriented and energized her life and became her dream in the world. Following Jung's idea that the psyche has a religious instinct, Robin van Löben

Sels demonstrates that the healing process possible through psychotherapy can come from beyond the psyche and can not be explained by our usual theories of scientific psychology Written in flowing easily read language A Dream in the World details a classical Jungian analysis of a woman s dreams and searches the relationship between religious encounter psyche and soul

Autobiography and the Psychological Study of Religious Lives Jacob Adrianus Belzen,2008 This volume positions itself on the cutting edge of two fields in psychology that enjoy rapidly increasing attention both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences Ever since the beginning of the psychology of religion autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity In this volume a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory
