Barack Obama's Post-American Foreign Policy Robert Singh, 2012-06-07 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com After one of the most controversial and divisive periods in the history of American foreign policy under President George W Bush the Obama administration was expected to make changes for the better in US relations with the wider world Now international problems confronting Obama appear more intractable and there seems to be a marked continuity in policies between Obama and his predecessor Robert Singh argues that Obama's approach of strategic engagement was appropriate for a new era of constrained internationalism but it has yielded modest results Obama's search for the pragmatic middle has cost him political support at home and abroad whilst failing to make decisive gains Singh suggests by calibrating his foreign policies to the emergence of a post American world the president has yet to preside over a renaissance of US global leadership Ironically Obama's policies have instead hastened the arrival of a post American world *Medieval Scandinavia* Phillip Pulsiano, 1993 With full page maps and supplementary photos this encyclopedia covers every aspect of Scandinavia during the Middle Ages including rulers and saints overviews of the countries religion education politics and law culture and material life history literature and art **Resources in Education**, 1992 *Data Mining and Knowledge Management* Yong Shi, Weixuan Xu, Zhengxin Chen, 2005-01-18 criteria linear and nonlinear programming has proven to be a very useful approach Knowledge management for enterprise These papers address various issues related to the application of knowledge management in corporations using various techniques A particular emphasis here is on coordination and cooperation Risk management Better knowledge management also requires more advanced techniques for risk management to identify control and minimize the impact of uncertain events as shown in these papers using fuzzy set theory and other approaches for better risk management Integration of data mining and knowledge management As indicated earlier the integration of these two research fields is still in the early stage Nevertheless as shown in the papers selected in this volume researchers have endeavored to integrate data mining methods such as neural networks with various aspects related to knowledge management such as decision support systems and expert systems for better knowledge management September 2004 Yong Shi Weixuan Xu Zhengxin Chen CASDMKM 2004 Organization Hosted by Institute of Policy and Management at the Chinese Academy of Sciences Graduate School of the Chinese Academy of Sciences International Journal of Information Technology and Decision Making Sponsored by Chinese Academy of Sciences National Natural Science Foundation of China University of

This disturbing but very important book makes clear we must dig deeper than the normal solutions we are offered Yvon Chouinard founder of Patagonia Works Bright Green Lies exposes the hypocrisy and bankruptcy of leading environmental groups and their most prominent cheerleaders The best known environmentalists are not in the business of speaking truth or even holding up rational solutions to blunt the impending ecocide but instead indulge in a mendacious and self serving delusion that provides comfort at the expense of reality They fail to state the obvious We cannot continue to wallow in hedonistic consumption and industrial expansion and survive as a species The environmental debate Derrick Jensen and his coauthors argue has been distorted by hubris and the childish desire by those in industrialized nations to sustain the unsustainable All debates about environmental policy need to begin with honoring and protecting not the desires of the human species but with the sanctity of the Earth itself We refuse to ask the right questions because these questions expose a stark truth we cannot continue to live as we are living To do so is suicidal folly Tell me how you seek and I will tell you what you are seeking the German philosopher Ludwig Wittgenstein said This is the power of Bright Green Lies It asks the questions most refuse to ask and in that questioning that seeking uncovers profound truths we ignore at our peril Chris Hedges Pulitzer Prize winning journalist and author of America The Farewell Tour Native North American Spirituality of the Eastern Woodlands Elisabeth Tooker, 1979 This work makes available for the first time in a single volume a representative collection of the major spiritual texts from the Native American Indian peoples of the East Coast Elisabeth Tooker professor of anthropology at Temple University and and editor of The Handbook of North American Indians presents the sacred traditions of the Iroquois Winnibego Fox Menominee Delaware Cherokee and others Included here are cosmological myths thanksgiving addresses dreams and visions speeches of the shamans teachings of parents puberty fasts blessings healing rites stories songs ceremonials for fires hunting wars feasts and the rituals of various spiritual societies
