Pipeline Politics The Complex Political Economy Of East West Energy Trade:

Pipeline Politics Bruce W. Jentleson, 1986 **Pipeline Politics** Bruce W. Jentleson, The Political Economy of the New Asian Industrialism Frederic C. Deyo, 2018-08-06 The newly industrializing countries NICs of East Asia have undergone rapid economic expansion over the past twenty years Unlike NICs elsewhere in the Third World those in the Pacific basin South Korea Taiwan Singapore and Hong Kong have managed to achieve almost full employment a relatively egalitarian distribution of income and the virtual elimination of poverty In this collection of essays nine development specialists explore the Asian NICs exceptional ability to capitalize on the favorable economic environment of the 1960s and then to adapt flexibly to worsening conditions in the 1970s and 1980s **Controlling East-West Trade and Technology Transfer** Gary K. Bertsch, 1988 Western efforts to control trade and technological relations with communist countries affect many interests and political groups in both Eastern and Western blocs Although there is general agreement within the Western alliance that government imposed controls are necessary to prevent material having military importance from falling in the hands of the Soviet Union and its Warsaw Pact allies there is considerable controversy over the specifics the exact definition of militarily significant material how the Western nations should administer controls the implications of glasnost and other matters

National Diversity and Global Capitalism Suzanne Berger, Ronald Dore, 2018-10-18 How does globalization change national economies and politics Are rising levels of trade capital flows new communication technologies and deregulation forcing all societies to converge toward the same structures of production and distribution Suzanne Berger and Ronald Dore have brought together a distinguished group of experts to consider how the international economy shapes and transforms domestic structures Drawing from experience in the United States Europe and Asia the contributors ask whether competition imitation diffusion of best practice trade and financial flows are reducing national diversities The authors seek to understand whether the sources of national political autonomy are undermined by changes in the international system Can distinctive varieties of capitalism that incorporate unique and valued institutions for achieving social welfare survive in a global economy The contributions to the volume present a challenge to conventional views on the extent and scope of globalization as well as to predictions of the imminent disappearance of the nation state's leverage over the economy *Business and the State in Developing Countries* Sylvia Maxfield, Ben Ross Schneider, 2018-09-05 Much of the debate about development in the past decade pitted proponents of unfettered markets against advocates of developmental states Yet in many developing countries what best explains variations in economic performance is not markets or states but rather the character of relations between business and government The studies in *Business and the State in Developing Countries* identify a range of close collaborative relations between bureaucrats and capitalists that enhance elements of economic performance and defy conventional expectations that such relations lead ineluctably to rent seeking corruption and collusion All based on extensive field research the essays contrast collaborative and collusive relations in a wide range of developing countries mostly in Latin

America and Asia and isolate the conditions under which collaboration is most likely to emerge and survive The contributors highlight the crucial roles played by capable bureaucracies and strong business associations **Governing Ideas J.**

Nicholas Ziegler,2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany s strengths stem directly from what Ziegler calls an ethos of competence whereas France s strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups Export Pipelines from the CIS Region Andreas,2014-04-15 This timely collection offers fresh perspectives to the analysis of the New Great Game the fight for access to the Caspian Sea region s energy resources To date the export of the Caspian crude oil and natural gas has only been assessed geopolitically which oversimplifies the political dynamics of the region and neglects to acknowledge the Caspian countries as actors in their own right **North Atlantic Treaty Organization** Phil Williams,2024-11-01 This volume consists of major books written in the English language on NATO as well as an extensive listing of journal articles that deal with various aspects of the Alliance All the major debates that have taken place over the last forty years are discussed *International Governance* Oran R. Young,2018-05-31 How can the global environment be safeguarded in the absence of a world government In the vanguard of efforts to address this critical question Oran R Young draws on environmental issues to explore the nature of international governance Young s analysis invokes the distinction between governance a social function involving the management of interdependent individuals or groups and government a set of formal organizations that makes and enforces rules **National Interests in International Society** Martha Finnemore,1996 How do states know what they want Asking how interests are defined and how changes in them are accommodated Martha Finnemore shows the fruitfulness of a constructivist approach to international politics She draws on insights from sociological institutionalism to develop a systemic approach to state interests and state behavior by investigating an international structure not of power but of meaning and social value An understanding of what states want she argues requires insight into the international social structure of which they are a part

States are embedded in dense networks of transnational and international social relations that shape their perceptions and their preferences in consistent ways Finnemore focuses on international organizations as one important component of social structure and investigates the ways in which they redefine state preferences She details three examples in different issue areas In state structure she discusses UNESCO and the changing international organization of science In security she analyzes the role of the Red Cross and the acceptance of the Geneva Convention rules of war Finally she focuses on the World Bank and explores the changing definitions of development in the Third World Each case shows how international organizations socialize states to accept new political goals and new social values in ways that have lasting impact on the conduct of war the workings of the international political economy and the structure of states themselves *The Oxford Handbook of International Business* Alan M. Rugman, 2009-01-15 As globalization explodes so has international business scholarship This second edition of the Oxford Handbook of International Business synthesises all the relevant literature of the last 40 years in 28 original chapters by the world's most distinguished scholars Reflecting the changes and development in the field since the first edition this new edition has a changed structure all the chapters have been updated to take account of the latest scholarship and five new chapters freshly written The Handbook is divided into six major sections providing comprehensive coverage of the following areas History and Theory of the Multinational Enterprise The Political and Regulatory Environment Strategy and International Management Managing the MNE Area Studies Methodological Issues These state of the art literature reviews will be invaluable references for students in business schools social sciences law and area studies

Export Controls in Transition Gary K. Bertsch, Steven Elliott-Gower, 1992 Like many cold war artifacts the West's export control policies and institutions are being reevaluated after the tumult in the communist world at the end of the 1980s Policymakers and scholars are being forced to reexamine the premises of export control policy and the very concept of export controls as a tool of national security and foreign policy This volume brings together expert scholars and government officials who provide contrasting perspectives and address the prospects for export controls The contributors discuss the role and function of export control policies from a variety of perspectives security commerce diplomacy the European region and that of the newly industrialized countries Among the topics covered are the problems the United States and the Western export regime will face in the 1990s in light of changing international political alliances and dependencies in defining strategic exports in enforcing export controls and the role of the Coordinating Committee for Multilateral Export Controls Contributors Sumner Benson Beverly Crawford Richard t Cupitt Dorinda G Dallmeyer Paul Freedenberg Martin J Hillenbrand Hanns Dieter Jacobsen Bruce W Jentleson Kevin J Lasher William J Long Janne Haaland Matlary Jere W Morehead Henry R Nau Han S Park Kevin F F Quigley Alen B Sherr Christine Westbrook

Handbook of Energy Transitions Muhammad Asif, 2022-10-14 The global energy scenario is undergoing an unprecedented transition In the wake of enormous challenges such as increased population higher energy demands increasing greenhouse gas emissions

depleting fossil fuel reserves volatile energy prices geopolitical concerns and energy insecurity issues the energy sector is experiencing a transition in terms of energy resources and their utilization This modern transition is historically more dynamic and multidimensional compared to the past considering the vast technological advancements socioeconomic implications and political responses and ever evolving global policies and regulations Energy insecurity in terms of its critical dimensions access affordability and reliability remains a major problem hindering the socioeconomic progress in developing countries The Handbook of Energy Transitions presents a holistic account of the 21st century energy transition away from fossil fuels It provides an overview of the unfolding transition in terms of overall dimensions drivers trends barriers policies and geopolitics and then discusses transition in terms of particular resources or technologies such as renewable energy systems solar energy hydropower hydrogen and fuel cells electric vehicles energy storage systems batteries digitalization smart grids blockchain and machine learning It also discusses the present energy transition in terms of broader policy and developmental perspectives Further it examines sustainable development the economics of energy and green growth and the role of various technologies and initiatives like renewables nuclear power and electrification in promoting energy security and energy transition worldwide Key Features Includes technical economic social and policy perspectives of energy transitions Features practical case studies and comparative assessments Examines the latest renewable energy and low carbon technologies Explains the connection between energy transition and global climate change Democracy and Markets John R. Freeman,1989 Events of the 1970s and 1980s have provoked intense controversy about the desirability of existing political and economic institutions On the basis of an analysis of social welfare in varying types of market systems and in certain democratic political systems Democracy and Markets illuminates alternative directions for institutional reform Examining in detail the experiences of several democratic European countries John R Freeman considers whether a mixed ownership structure is preferable to a private ownership structure and whether a pluralist type of democratic politics is preferable to a corporatist type Freeman compares the benefits of the two economic and two political systems separately and then analyzes the workings of four basic political economies This analysis yields a welfare taxonomy for alternative forms of democratic capitalism and more specifically a characterization of the blends of collective gain and distributional equity that can be achieved in the four systems Freeman demonstrates the validity of this taxonomy through an empirical investigation of the political economies of Britain Austria Sweden and Italy Under current conditions he concludes the corporatist mixed system produces the most desirable blend of welfare outcomes **Union of Parts** Kathleen Thelen,2018-05-31 Union of Parts examines one of the central puzzles in the economic and political successes of West Germany FRG In the decades between world war and reunification with the East the FRG provided a model for combining high rates of unionization and substantial labor peace indeed for collaboration between organized labor and organized capital as both groups faced the dislocations involved in adjusting to a changing global marketplace **The Paradox of Continental Production** Barbara

Jenkins,2018-09-05 Should national governments regulate foreign investment The question is hotly contested in today s international trade debates Barbara Jenkins here addresses this complex issue in a timely account of market relationships among North American nations Jenkins provides up to date detailed analyses of foreign investment regulations and policies in Canada Mexico and the United States She identifies inherent contradictions in the general tactic that all three countries have pursued simply relying on the pressures of the market rather than planning active strategy and she assesses the likely effects on foreign investment of the recently concluded Canada U S Free Trade Agreement and the potential North American free trade agreement Free trade and the absence of adjustment policy she argues expose key political actors such as business and labor too broadly to market forces The result is a projectionist reaction on the part of these domestic actors which ultimately defeats efforts to liberalize trade and investment relations In current approaches to foreign investment regulation Jenkins detects divergent trends among the three countries while Ottawa and Mexico City continue to liberalize their investment strategies Washington is growing more interventionist She shows however that the interventionism of the United States reflects a nationalistic trend rather than a commitment to a coherent strategy Cautioning that the conclusion of a North American free trade agreement will only exacerbate the inadequacies of current policies Jenkins concludes by offering recommendations for future action The Paradox of Continental Production will be stimulating reading for policymakers political economists and other observers of Canadian Mexican and U S politics

The Fruits of Fascism

Simon Reich,2018-08-06 The West German economic miracle Simon Reich suggests may be best understood as a result of the discriminatory economic policies of the Nazi regime Reich contends that ideological and institutional characteristics originating under fascism were sustained despite Germany s return to democracy and heavily influenced the economic success of its automobile industry By contrast the liberal economic policies of the British state led in time to the decline of an industrial sector that in 1930 had closely resembled its German counterpart Through detailed comparative histories of German and British automobile firms Reich challenges traditional explanations of the divergent performances of the two nations economies and sheds new light on the relationship between state policy and economic success in pre and postwar Europe Liberal nondiscriminatory British policies favorable to multinational investment contributed significantly to the decline of domestic firms he argues so that eventually multinationals could threaten the health of the entire British economy by investing elsewhere The Nazi state however thwarted the development of American subsidiaries and fostered a core of producers government officials bankers and labor union leaders

The Politics of International Economic Relations

Jeffrey A. Hart,Joan Edelman Spero,2013-06-17 The first and definitive book of its kind Joan Spero s The Politics of International Economic Relations has been fully updated to reflect the sweeping changes in the international arena With the expertise of co author Jeffrey Hart the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War economic polarization in developing nations and the roots of economic decline in centrally planned

economies A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy Ideal as a supplement to the International Relations course or as the core text in International Political Economy Spero and Hart s The Politics of International Economic Relations continues to give students the breadth and depth of scholarship needed to understand the politics of world economy European Integration and the Atlantic Community in the 1980s Kiran Klaus Patel, Kenneth Weisbrode, 2013-09-02 This unique collection of essays lays the groundwork for the study of the intersection of European integration and transatlantic relations in the 1980s With archives for this period only recently being opened scholars are beginning to analyse and understand what some have called a peak moment in the European project and others have called the Second Cold War How do these moments intersect and relate to one another These essays by prominent scholars from Europe and the United States examine these and related questions while challenging the 1980s itself as a useful demarcation for historical analysis
