Popular Errors Laurent Joubert,1989-05-30 Laurent Joubert was an important figure in the medical world of the French Renaissance Born in 1529 he became a doctor at age 29 and shortly thereafter was appointed personal physician to Catherine de Medici and later became physician to three French monarchs Joubert was an educator as well as a physician and he wrote several works of medical literature including his most controversial work *Erreurs populaires* While the work focuses on popular misconceptions concerning medicine and physicians in France in the 1500s it also represents a wealth of information on the social economic political and religious worldviews that framed and thus supported the development and conduct of medical science Gregory de Rocher s skill as a translator brings this highly readable and very funny book to life Many topics central to Joubert s thesis in the 1500s remain contemporary themes in the popular and scholarly literature of the 1980s

Errors, False Opinions and Defective Knowledge in Early Modern Europe Marco Faini ,Marco Sgarbi,2024 This volume offers a series

of insights into the fascinating topic of errors and false opinions in early modern Europe It explores the semantic richness of the category of error in a time when such category becomes crucial to European thought and culture During decades of increasing normativity in the social and religious sphere as well as in the epistemological status of disciplines recognizing and correcting error becomes an imperative task whose importance can hardly be overestimated The efforts at establishing religious political and scientific orthodoxy led philosophers doctors philologist scientist and theologians to reconsider the very foundations of knowledge in the attempt to dispel errors Spanning geographically from Italy to France England and Germany the articles here gathered provide stimulating glimpses into one of the most fascinating multifaceted and controversial aspects of early modern culture *Eating and Being* Steven Shapin,2024-11-20 What we eat who we are and the relationship between the two Eating and Being is a history of Western thinking about food eating knowledge and ourselves In modern thought eating is about what is good for you not about what is good Eating is about health not about virtue Yet this has not always been the case For a great span of the past from antiquity through about the middle of the eighteenth century one of the most pervasive branches of medicine was known as dietetics prescribing not only what people should eat but also how they should order many aspects of their lives including sleep exercise and emotional management Dietetics did not distinguish between the medical and the moral nor did it acknowledge the difference between what was good for you and what was good Dietetics counseled moderation in all things where moderation was counted as a virtue as well as the way to health But during the nineteenth century nutrition science began to replace the language of traditional dietetics with the vocabulary of proteins fats carbohydrates and calories and the medical and the moral went their separate ways Steven Shapin shows how much depended upon that shift and he also explores the extent to which the sensibilities of dietetics have been lost Throughout this rich history he evokes what it felt like to eat during another historical period and invites us to reflect on what it means to feel about food as we now do Shapin shows how the change from dietetics to nutrition science fundamentally altered how we think about our food and its powers our bodies and our minds The Dublin University Magazine ,1870
