Population Disaster:

World Disasters Report International Federation of Red Cross and Red Crescent Staff CP, 1993-04-29 Disaster response has been described as the last resort of the amateur an unkind assessment but not without a grain of truth Disaster generates an emotional response and new disaster organisations are born with each new disaster Lessons of the past on disaster management have to be learned anew The need to increase the professionalism of disaster response is evident All the more so as in disaster terms the world is getting worse not better Disasters become more complex frequently involving the interaction of a disaster event politics and technology The last few years have also seen a growth in research into the area of disaster response Too often however disaster researchers and disaster organisations have gone their separate ways There is a need for these two groups to get together to devise more practical and professional approaches to disaster response The *World Disasters Report* produced by the International Federation of Red Cross and Red Crescent Societies with the Centre for Research on the Epidemiology of Disasters is a contribution to this effort of professionalisation It provides facts and statistics analysis and an exploration of trends to dispel a number of myths about disasters and to define and advocate good practice This is the first volume of Annual Reports which will become a vital tool for all those involved in the area of disaster response

The Public Health Consequences of Disasters Eric K. Noji, 1996-11-14 Natural and man made disasters earthquakes floods volcanic eruptions industrial crises and many others have claimed more than 3 million lives during the past 20 years adversely affected the lives of at least 800 million people and caused more than 50 billion dollars in property damages A major disaster occurs almost daily in some part of the world Increasing population densities in flood plains along vulnerable coastal areas and near dangerous faults in the earth's crust as well as the rapid industrialization of developing economies are factors likely to make the threat posed by natural disasters much bigger in the future Illustrated with examples from recent research in the field this book summarizes the most pertinent and useful information about the public health impact of natural and man made disasters It is divided into four sections dealing with general concerns geophysical events weather related problems and human generated disasters The author starts with a comprehensive discussion of the concepts and role of surveillance and epidemiology highlighting general environmental health concerns such as sanitation water shelter and sewage The other chapters based on a variety of experiences and literature drawn from both developing and industrialized countries cover discrete types of natural and technological hazards addressing their history origin nature observation and control Throughout the book the focus is on the level of epidemiologic knowledge on each aspect of natural and man made disasters Exposure disease and health event surveillance are stressed because of the importance of objective data to disaster epidemiology In addition Noji pays particular attention to prevention and control measures and provides practical recommendations in areas in which the public health practitioner needs more useful information He advocates stronger epidemiologic awareness as the basis for better understanding and control of disasters A

comprehensive theoretical and practical treatment of the subject The Public Health Consequences of Disasters is an invaluable tool for epidemiologists disaster relief specialists and physicians who treat disaster victims

WHO guidance on research methods for health emergency and disaster risk management, revised 2022 World Health Organization, 2022-10-13. The WHO website has an introductory description for the Guidance. It states that the WHO Guidance on Research Methods for Health Emergency and Disaster Risk Management (Health EDRM) was developed to address the need to promote high quality research methods to those who commission and conduct research on Health EDRM. The intended audience includes decision makers, practitioners, and community actors who need for evidence based policy and practice to implement the Health EDRM Framework. Sendai Framework on Disaster Risk Reduction 2015-2030, the International Health Regulations 2005, the United Nations Sustainable Development Goals (SDGs) and other relevant global, regional, and national frameworks. Chapters have been written by more than 100 international authors with practical experience and expertise in a wide range of areas including research practice and policy making. The unique collection of chapters provides straightforward and practical guidance on how to plan, conduct, and report a wide variety of studies that can answer quantitative and qualitative questions in different emergency settings. Case studies of direct relevance to Health EDRM provide real life examples of research to illustrate the methods and their impact. The book was revised in 2022 with an additional chapter on how to use this book in the context of COVID-19 pandemic.

Disaster Public Health and Older People Emily Ying Yang Chan, 2019-08-23. Disaster Public Health and Older People introduces professionals, students, and fieldworkers to the science and art of promoting health and well-being among older people in the context of humanitarian emergencies with a particular focus on low and middle income country settings. Older people face specific vulnerabilities in physical, mental, and social well-being during disasters. They are likely to experience socio-economic marginalisation, isolation, inaccessible information, and a lack of relevant post-emergency support services. Meanwhile, although older people can also

significantly contribute to disaster preparedness response and recovery their capacities are often under utilised Drawing on a range of global case studies this book provides readers with a theoretical underpinning while suggesting actions at the individual community and national levels to reduce the health risks to older people posed by the increasing frequency and intensity of disaster in particular those resulting from natural hazards Topics covered range from the health impact of disasters on older people and response to their post disaster health needs to disaster preparedness disease prevention healthy ageing global policy developments and the contributions of older people in disaster contexts This book draws on lessons learnt from previous disasters and targets students and professionals working in disaster medicine disaster public health humanitarian studies gerontology and geriatrics
