Sage Encyclopedia Of Social Science Research Methods:

The SAGE Encyclopedia of Social Science Research Methods Michael Lewis-Beck, Alan E Bryman, Tim Futing Liao, 2004

This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels. As a teaching resource, it will be useful to instructors and students alike and will become a standard reference source. Essential for general and academic collections. CHOICE. Appreciative users of this volume will be students, faculty, and researchers in academic special and large public libraries for whom it is recommended. LIBRARY JOURNALS. SAGE Reference is proud to announce *The SAGE Encyclopedia of Social Science Research Methods*, a three-volume resource that is a first of its kind developed by the leading publisher of social science research methods books and journals. This unique multi-volume reference set offers readers an all-encompassing education in the ways of social science researchers. Written to be accessible to general readers, entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods. The Encyclopedia features two major types of entries: definitions consisting of a paragraph or two provide a quick explanation of a methodological term and topical treatments or essays discussing the nature, history, application, example, and implication of using a certain method. Also included are suggested readings and references for future study. To help provide a more complete explanation than is often achieved within the scope of a single article, key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere. In addition to epistemological issues that influence the nature of research questions and assumptions, *The SAGE Encyclopedia of Social Science Research Methods* tackles topics not normally viewed as part of social science research methodology, from philosophical issues such as poststructuralism to advanced statistical techniques. In covering the full range of qualitative and quantitative data analyses, this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way, stimulating both interest and new perspectives. One example is the entry *Econometrics* by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process: from economic theory to data and models to analysis, once in principle and a second time with an example. In using the ordinary process of economic research to achieve an extraordinary impact, he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics.

Topics Covered: Analysis of Variance, Association and Correlation, Basic Qualitative Research, Basic Statistics, Causal Modeling, Structural Equations, Discourse, Conversation Analysis, Econometrics, Epistemology, Ethnography, Evaluation, Event History Analysis, Experimental Design, Factor Analysis, Related Techniques, Feminist Methodology, Generalized Linear Models, Historical Comparative, Interviewing in Qualitative Research, Latent Variable Model, Life History Biography, Loglinear Models, Categorical Dependent Variables, Longitudinal Analysis, Mathematics and Formal Models, Measurement Level, Measurement Testing, Classification, Multiple Regression.

Self-Construction in a Transcultural Context Yijia Zuo, 2022-07-16 This book explores the ways in which individuals construct and integrate self positions in a transcultural context by adopting a pluralist theoretical and methodological approach that includes both Western post modern viewpoints and ancient Chinese philosophical ideas The book starts with stories of two second generation Chinese young people and their mothers life experiences in the UK which can be seen as an epitome of individuals living in the modern and complex environment of the time Using social constructionist viewpoints it then analyzes the overt interaction between the individual and outside environment and interprets the recessive interaction such as the individual's psychological response to the outside environment which might be unknown to him or herself using the psychodynamic approach based on object relations theory and other psychoanalytic concepts such as defense mechanisms The book uses Confucian philosophy to show how Chinese people think about the relation between other people and themselves and also integrates different and even opposing theories and viewpoints from Taoist philosophy This creative book provides a theoretical and practical approach to explore the conception of self and the way in which individuals construct their self positions in a complex context Combining cutting edge Western psycho social viewpoints and ancient Chinese philosophy it appeals to readers interested in self psycho social approaches psychoanalytic viewpoints and Chinese philosophy **Routledge Handbook of Research Methods in Military Studies** Joseph Soeters, Patricia M. Shields, Sebastiaan Rietjens, 2014-06-27 This volume offers an overview of the methodologies of research in the field of military studies As an institution relying on individuals and resources provided by society the military has been studied by scholars from a wide range of disciplines political science sociology history psychology anthropology economics and administrative studies The methodological approaches in these disciplines vary from computational modelling of conflicts and

surveys of military performance to the qualitative study of military stories from the battlefield and veterans experiences. Rapidly developing technological facilities, more powerful hardware, more sophisticated software, digitalization of documents and pictures render the methodologies in use more dynamic than ever. The Routledge Handbook of Research Methods in Military Studies offers a comprehensive and dynamic overview of these developments as they emerge in the many approaches to military studies. The chapters in this Handbook are divided over four parts: starting research, qualitative methods, quantitative methods, and finalizing a study, and every chapter starts with the description of a well published study illustrating the methodological issues that will be dealt with in that particular chapter. Hence this Handbook not only provides methodological know how but also offers a useful overview of military studies from a variety of research perspectives. This Handbook will be of much interest to students of military studies, security and war studies, civil military relations, military sociology, political science, and research methods in general.

Distributive and Procedural Justice Kjell Törnblom, Riël Vermunt, 2016-05-23. This interdisciplinary and cross national volume brings together theory and research by prominent scholars within the areas of distributive and procedural justice, not only featuring work within each area separately as is commonly done but also showing how combinations of the two justice orientations might operate to affect justice judgments and guide behaviour. Chapters cover various levels of analysis from intra personal to interpersonal to group and societal levels. The volume is divided into four sections: distributive justice, procedural justice, distributive and procedural justice, and methodological issues. Each section is subdivided into two parts: basic research and applied research, re current and important societal issues. Each chapter contains an overview of theoretical and empirical research on a particular topic. The volume is designed for use on courses in social psychology, psychology, sociology, political philosophy, and law.

Qualitative Research Methods in Psychology: Combining Core Approaches 2e Nollaig Frost, 2021-06-18. This second edition textbook provides invaluable guidance on carrying out qualitative research in psychology using methods both individually and in combination. Suitable for researchers at all stages of their development, the book provides a go to resource for students who are just starting out as well as for experienced qualitative researchers planning to carry out research pluralistically. Key features include: A new chapter on Thematic Analysis. Updated chapters on four other widely used qualitative methods: grounded theory, interpretative phenomenological analysis, discourse analysis, and narrative analysis. Discussions of the theoretical foundations of qualitative methods employed singly and pluralistically. Consideration of ethical and quality issues pertinent to different methods when used separately and in conjunction. Inclusion of the use of visual and other non textual data. Problem based questions. Reflections on practice from experienced researchers. The book has been updated throughout to reflect current developments in and research examples from the full breadth of the discipline including from health, social counselling, and sports and exercise psychology. Studies carried out as part of both academic and professional practice are included alongside discussion of ways in which researchers from both settings can work together effectively. This book opens
