Insanity and Genius Harry Eiss,2014-06-02 In his book about the discovery of the structure of DNA James Watson wrote So we had lunch telling ourselves that a structure this beautiful just had to exist Indeed the quest most often asked by scientists about a scientific theory is Is it beautiful Yes beauty equals truth Scientists know mathematicians know But the beauties the truths of mathematics and science were not the truths that inspired the author as a child and he intuitively knew that the truths he needed come from a different way of knowing a way of knowing not of the world of logic and reason and explanation though they have a value but rather a way of knowing that is of the world expression a world that enters the truths beyond the grasp of logic That is what this book is all about It is an exploration of the greatest minds of human existence struggling to understand the deepest truths of the human condition This second edition updates the previous one incorporating new publications on Van Gogh recent discoveries in neurology psychology and the rapid developments in understanding DNA and biotechnology We've come a long way already from that original discovery by Watson and his coauthor Francis Crick

Gülen Joshua D. Hendrick,2013-08-12 The Hizmet Service Movement of Fethullah Gülen is Turkey's most influential Islamic identity community Widely praised throughout the early 2000s as a mild and moderate variation on Islamic political identity the Gülen Movement has long been a topic of both adulation and conspiracy in Turkey and has become more controversial as it spreads across the world In Gülen Joshua D Hendrick suggests that when analyzed in accordance with its political and economic impact the Gülen Movement despite both praise and criticism should be given credit for playing a significant role in Turkey's rise to global prominence Drawing on 14 months of ethnographic fieldwork in Turkey and the U S Hendrick examines the Gülen Movement's role in Turkey's recent rise as well as its strategic relationship with Turkey's Justice and Development Party led government He argues that the movement's growth and impact both inside and outside Turkey position both its leader and its followers as indicative of a post political turn in twenty first century Islamic political identity in general and as illustrative of Turkey's political economic and cultural transformation in particular Joshua D Hendrick is Assistant Professor of Sociology and Global Studies at Loyola University Maryland in Baltimore

Lino Camprubi,2014-05-02 How engineers and agricultural scientists became key actors in Franco s regime and Spain s forced modernization In this book Lino Camprub argues that science and technology were at the very center of the building of Franco s Spain Previous histories of early Francoist science and technology have described scientists and engineers as working under Francoism subject to censorship and bound by politically mandated research agendas Camprub offers a different perspective considering instead scientists and engineers active roles in producing those political mandates Many scientists and engineers had been exiled imprisoned or executed by the regime Camprub argues that those who remained made concrete the mission of redemption that Franco had invented for himself This gave them the opportunity to become key actors and mid level decision makers within the regime Camprub describes a series of projects across Spain undertaken by the civil engineers and agricultural scientists who placed themselves at the center of their country s forced modernization These include a coal silo built in 1953 viewed as an embodiment of Spain s industrialized landscape links between laboratories architects and the national Catholic church and between technology and authoritarian control vertically organized rice production and research on genetics river management and the contested meanings of self sufficiency and the circulation of construction standards by mobile laboratories as an engine for European integration Separately each chapter offers a fascinating microhistory that illustrates the coevolution of Francoist science technology and politics Taken together they reveal networks of people institutions knowledge artifacts and technological systems woven together to form a new state **The Review of Policy Research** ,2005 *Their Kingdom Come* Robert Hutchison,1999-06-23 A secretive Catholic organization that can easily provoke the old prejudices against Catholics involving secrecy and conspiracies Opus Dei God s Work a small little known but powerful lay organization within the Catholic church that includes the operation of a media network as large as Rupert Murdoch s immense financial support of the Church and the preparation for a new Crusade against Islam *The Emergence of a New Turkey* M Hakan Yavuz,2006-05-29 Explains the social economic and historical origins of the ruling Justice and Development Party offering keen insight into one of the most successful transformations of an Islamic movement in the Muslim world **Peter Berger and the Study of Religion** Paul Heelas,David Martin,Linda Woodhead,2013-07-04 Peter Berger is the most influential contemporary sociologist of religion This collection of essays is the first in depth study of his contribution to the field providing a comprehensive introduction to his work and to current thought in the study of religion Themes addressed include Berger on religion and theology Religion spirituality and the discontents of modernity Secularization and de secularization A postscript by Peter Berger responding to the essays completes this

Gu non spoke of the anti tradition the forces of materialism and secular humanism finally giving way to the counter tradition the satanic inversion of true spirituality leading to the regime of Antichrist The anti tradition weakens and dissolves traditional spiritualities after which the counter tradition sets up a counterfeit in their place Since Gu non s time as is well known anti traditional forces have greatly advanced worldwide It is less well known that counter traditional movements have also made great strides and now stand closer to the centers of global political and religious power than ever before The counter tradition is making inroads on the political and cultural Right as much as it is doing on the Left False Dawn painstakingly documents these trends and speculates on their future development In so doing the author takes investigative reporting to the threshold of prophecy and gives us a stunningly plausible picture of the global religious landscape of the 21st century This extraordinary project is the literary equivalent of turning over a flat rock There is much to be seen and learned here all of it unsettling disquieting occasionally downright scary William Murchison Radford Distinguished Professor Baylor University When a bishop of a Christian church happily worships alongside a Wiccan invoking other gods something has gone horribly wrong In False Dawn Lee Penn has produced a comprehensive and critical history of the United Religions Initiative This book sounds a clear warning Anyone who makes theological truth subservient to utopianism denigrates all religions Douglas LeBlanc Editor GetReligion.org

Latin Fascist Elites Paul H. Lewis, 2002-12-30 Many dictatorships are short lived but a few manage to stay in power for decades Lewis takes three Latin fascist tyrants Mussolini Franco and Salazar and shows how they perpetuated their rule through the careful recruitment and circulation of top echelon subordinates to carry out their orders Long established dictatorships have to respond to political and social pressures surrounding them just as democracies do but it is harder to study them because they are closed systems One possible way of viewing their internal processes is by observing who they recruit into top leadership positions Every dictator however powerful must delegate some authority to an elite stratum just below him By watching which kinds of men are recruited how long they are kept in power and whether different skills are sought at different times it may be possible to chart the evolution of a 20 or 30 year regime The Mussolini Franco and Salazar regimes all fit the criteria of being long established Mussolini ruled for almost 21 years Franco for over 37 and Salazar for 36 Moreover all three shared a family resemblance as being fascist Comparing them affords the additional advantage of adding to our understanding of the Latin variant of fascism as contrasted to the Central and Eastern European A provocative work for scholars students and other researchers involved with European Politics Modern European History and fascist regimes
