The Visioneers W. Patrick McCray, 2012-12-09 The story of the visionary scientists who invented the future In 1969 Princeton physicist Gerard O Neill began looking outward to space colonies as the new frontier for humanity s expansion A decade later Eric Drexler an MIT trained engineer turned his attention to the molecular world as the place where society s future needs could be met using self replicating nanoscale machines These modern utopians predicted that their technologies could transform society as humans mastered the ability to create new worlds undertook atomic scale engineering and if truly successful overcame their own biological limits The Visioneers tells the story of how these scientists and the communities they fostered imagined designed and popularized speculative technologies such as space colonies and nanotechnologies Patrick McCray traces how these visioneers blended countercultural ideals with hard science entrepreneurship libertarianism and unbridled optimism about the future He shows how they built networks that communicated their ideas to writers politicians and corporate leaders But the visioneers were not immune to failure or to the lures of profit celebrity and hype O Neill and Drexler faced difficulty funding their work and overcoming colleagues skepticism and saw their ideas co opted and transformed by Timothy Leary the scriptwriters of Star Trek and many others Ultimately both men struggled to overcome stigma and ostracism as they tried to unshackle their visioneering from pejorative labels like fringe and pseudoscience The Visioneers provides a balanced look at the successes and pitfalls they encountered The book exposes the dangers of promotion oversimplification misuse and misunderstanding that can plague

exploratory science But above all it highlights the importance of radical new ideas that inspire us to support cutting edge research into tomorrow s technologies Fountains of Youth Editors of Ronin Publishing,1996-06-25 Shows how to extend life expectancy through nutrition stress reduction fasting megavitamins proteins hormone replacement herbs and new anti aging pharmaceuticals and includes a directory of supply sources publications and organizations Original National ad promo
