frequently from external sources changes in the nature of markets in the technology of the industry or even cultural beliefs about the proper rewards of work and behavior for employers and employees This book is concerned with the process of change by which organizations achieve their purposes and meet the needs of their individual and group contributors Lawrence s study is centered on a medium sized supermarket chain in which several important management functions were being shifted from the home office to newly created store managers The origin and reasoning behind these organizational changes the methods of introducing them the process of shifting the roles of key individuals and the consequences of the changes are considered in detail The author s inquiry proceeds from four essential research questions What is the nature of the basic behavior patterns in this organization What are the key factors involved in changing those patterns Did significant measurement change occur If so how was it accomplished This volume first published in 1958 broke new ground in devising techniques to measure changes in behavior patterns of individuals in focusing attention on the behavior patterns of individuals at the management levels of an organization and in clarifying the stubborn facts of human behavior involved in changing administrative patterns The book will be of continuing interest to managers and administrators concerned with making key changes in customary supervisory practices and to sociologists for the way the book addresses the general issue of the conflicts between the shifting demands of large organizations and the integrity of the individual The new 1990 introduction by the author nicely illustrates his belief that the process of organizational change remains a central issue for American society
