Taruvinga, 2022-08-25 Stakeholder Perspectives on World Heritage and Development in Africa argues that World Heritage Sites WHS across the African continent should adopt practical innovative creative and alternative management approaches

that bring greater socio economic benefits to society whilst protecting their Outstanding Universal Value Drawing on empirical evidence gathered in conversation with stakeholders at WHS across Africa the book explores the challenges involved in implementing conservation and socio economic development as a stakeholder driven process Demonstrating that heritage can no longer be viewed as totally separate from its socio economic context Pascall argues that decisions about the management of heritage need to make sense at the local level if they are to be supported by stakeholders As the book shows heritage is still viewed and managed through systems approaches and strategies inherited from the colonial period despite the increasing availability of inclusive governance systems Stakeholders offer alternative creative and innovative approaches that capitalize on the potential of World Heritage to contribute to socio economic development whilst ensuring that its credibility and integrity are maintained Stakeholder Perspectives on World Heritage and Development in Africa offers unique insights into local perspectives on World Heritage and development in Africa The book will be essential reading for academics students development partners and practitioners around the world who are interested in museums and heritage conservation development and the African continent Also the book will be useful in the preparation of nomination dossiers management plans development plans and in disaster risk management at WHS Management Planning for Cultural Heritage Ken Taylor, Giulio Verdini, 2021-12-30 Management Planning for Cultural Heritage challenges traditional perceptions of and about the heritage planning process while also presenting a comprehensive analysis of the ever widening field of Cultural Heritage Conservation Drawing on the authors experience in teaching and involvement in international practice the book examines the changes that are taking place in modes of thinking about heritage as part of increasingly complex urban transformations and considers how these must engage with and inform professional practice The book also acknowledges that international best practice has developed a great deal over the last 40 years and needs to be adapted applied and refined through the recognition and application of regional values tangible and intangible based on cultural attitudes and practices Emphasising the critical role of heritage planning and management in guiding change Taylor and Verdini argue that this is especially critical if we are to safeguard values identity and significance In this sense heritage is understood not only as a technical process but also as a social construct The book therefore promotes a people centred approach to cultural heritage management Management Planning for Cultural Heritage will be of interest to students scholars and practitioners working in heritage studies and conservation While the text has professional application it also sets out to present a sound theoretical foundation relevant to the body of knowledge associated with management of cultural heritage places Archaeological Heritage Conservation and Management Brian J. Egloff, 2019-01-31 Archaeological heritage conservation is all too often highly conflicted Economic interests are often at the forefront of management decision making with heritage values given lesser if any consideration but when heritage places are managed with international principles in mind the sites stand out as evidencing superior outcomes UNESCO, Cultural Heritage, and Outstanding

Universal Value Sophia Labadi, 2013 This book explores the international legal framework developed by UNESCO to identify and protect world heritage and its implementation at the national level Drawing on close policy analysis of UNESCO's major documents extensive professional experience at UNESCO as well as in depth analyses of case studies from Asia Europe and Latin America Sophia Labadi offers a nuanced discussion of the constitutive role of national understandings of a universalist framework The discussion departs from considerations of the World Heritage Convention as Eurocentric and offers a more complex analysis of how official narratives relating to non European and non traditional heritage mark a subversion of a dominant and canonical European representation of heritage It engages simultaneously with a diversity of discourses across the humanities and social sciences and with related theories pertaining not only to tangible and intangible heritage conservation and archaeology but also political science social theory tourism and development studies economics cultural and gender studies In doing so it provides a critical review of many key concepts including tourism development sustainability intangible heritage and authenticity

**Archaeology and Heritage Management** Usman Ali, 2021 This volume reconsiders the World Heritage Guidelines to manage cultural and natural heritage sites effectively The study approaches this in two ways The first is by evaluating and analyzing the fundamental theories and practice of heritage with comparison to World Heritage prescribed parameters for effective management particularly authenticity and the second is about to rereview the international legislation in the context of authenticity of heritage practice as a part of understanding and developing new parameters for conservation preservation and management     **Cultural Tourism** Hilary du Cros, Bob McKercher, 2014-12-05 Cultural Tourism remains the only book to bridge the gap between cultural tourism and cultural and heritage management The first edition illustrated how heritage and tourism goals can be integrated in a management and marketing framework to produce sustainable cultural tourism The current edition takes this further to base the discussion of cultural tourism in the theory and practice of cultural and heritage

management CM and CHM under the understanding that for tourism to thrive a balanced approach to the resource base it uses must be maintained An umbrella approach to cultural tourism represents a unique feature of the book proposing solutions to achieve an optimal outcome for all sectors Reflecting the many important developments in the field this new edition has been completely revised and updated in the following ways New sections on tangible and intangible cultural heritage and world heritage sites Expanded material on cultural tourism product development the cultural tourism market and consumer behaviour planning and delivery of exceptional experiences New case studies throughout drawn from cultural attractions in developing countries such as Southeast Asia China South Africa and the Pacific as well as from the developed world particularly the United States Britain Japan Singapore Australia and Canada Written by experts in both tourism and cultural heritage management this book will enable professionals and students to gain a better understanding of their own and each other's roles in achieving sustainable cultural tourism It provides a blueprint for producing top quality long term cultural tourism products
