Make The Connection:

Making the Connection Marilyn Paula Carlson, Chris Rasmussen, 2008 The chapters in this volume convey insights from mathematics education research that have direct implications for anyone interested in improving teaching and learning in undergraduate mathematics This synthesis of research on learning and teaching mathematics provides relevant information for any math department or individual faculty member who is working to improve introductory proof courses the longitudinal coherence of precalculus through differential equations students mathematical thinking and problem solving abilities and students understanding of fundamental ideas such as variable and rate of change Other chapters include information about programs that have been successful in supporting students continued study of mathematics The authors provide many examples and ideas to help the reader infuse the knowledge from mathematics education research into mathematics teaching practice University mathematicians and community college faculty spend much of their time engaged in work to improve their teaching Frequently they are left to their own experiences and informal conversations with colleagues to develop new approaches to support student learning and their continuation in mathematics Over the past 30 years research in undergraduate mathematics education has produced knowledge about the development of mathematical understandings and models for supporting students mathematical learning Currently very little of this knowledge is affecting teaching practice We hope that this volume will open a meaningful dialogue between researchers and practitioners toward the goal of realizing improvements in undergraduate mathematics curriculum and instruction

comprehensive professional development course for grades 6-8 science teachers provides all the necessary ingredients for building a scientific way of thinking in teachers and students focusing on science content inquiry and literacy. Teachers who participate in this course learn to facilitate hands-on science lessons, support evidence-based discussions, and develop students' academic language and reading and writing skills in science along with the habits of mind necessary for sense making and scientific reasoning.

Energy for Teachers of Grades 6-8 consists of five core sessions: Session 1: What is Energy; Session 2: Potential Energy; Session 3: Heat Energy; Session 4: Conservation of Energy; Session 5: Energy in Ecosystems. The materials include everything needed to effectively lead this course with ease: Facilitator Guide with extensive support materials and detailed procedures that allow staff developers to successfully lead a course; Teacher Book with teaching science and literacy investigations along with a follow-up component; Looking at Student Work designed to support ongoing professional learning communities; CD with black line masters of all handouts and charts to support group discussion and sense making; course participation certificates; student work samples; and other materials that can be reproduced for use with teachers.

Guiding Readers by Lori Jamison Rog, 2012, Discover a model for guided reading instruction that fits the 18-minute time frame and is purposeful, planned, and focused. This practical book introduces a range of specific reading strategies and processes that lead students to access increasingly sophisticated text. It includes collections of lessons for emergent, early developing, and fluent readers as well as struggling readers in the upper grades. Detailed and comprehensive, the book champions an integrated system of guiding readers that involves both fiction and nonfiction as well as the texts that surround students in and out of school. Websites, directions, instructions, schedules, signs, and more. New and experienced teachers will both find a wealth of valuable reproducible techniques, tips, and strategies that will help them put the tools for independent reading into the hands of every student.
