Makers of the United States Air Force John L. Frisbee, 1989 Om 12 ledere der repr senterer forskellige sider af lederskabet og udfordringerne i udviklingen af det amerikanske flyvev ben gennem et halvt rhundrede Makers of the United States Air Force: USAF Leaders and Pioneers of Military Aviation - Foulois, Kenney, Vandenberg, Twining, Schriever, Davis, Quesada, George, Risner, Wright Brothers Department of Defense, U. S. Air Force (USAF), U. S. Government, 2018-01-15 This is an indispensable reference work for anyone interested in the history of the United States Air Force and particularly in the role that key individuals have played in its evolution Many of the individuals profiled in this book are well known to students of air and space power Most had notable combat careers Others were organizers men who shaped the service according to far seeing vision They are a diverse bunch of over achievers many of whom were strongly opinionated even about each other But all of them were dedicated to an ideal to produce a new form of military force a force that would achieve victory in war by exploitation and dominance of the third dimension In this they were totally and uncompromisingly unified a band of brothers who took this vision from the ground and brought it with devastating force to the skies of America s enemies

Makers of the United States Air Force USAF Chapter 1 Introduction Men with a Mission Chapter 2 Benjamin D Foulois In the Beginning Chapter 3 Frank M Andrews Marshall s Airman Chapter 4 Harold L George Apostle of Air Power Chapter 5 Hugh J Knerr The Pen and the Sword Chapter 6 George C Kenney The Great Innovator Chapter 7 William E Kepner All the Way To Berlin Chapter 8 Elwood R Quesada Tac Air Comes of Age Chapter 9 Hoyt S Vandenberg Building the New Air Force Chapter 10 Benjamin O Davis Jr History on Two Fronts Chapter 11 Nathan F Twining New Dimensions a New Look Chapter 12 Bernard A Schriever Challenging the Unknown Chapter 13 Robinson Risner The Indispensable Ingredient In a relative sense compared to the several thousand years of evolution in ground and sea warfare air power developed very rapidly When Benny Foulois retired from his post as Chief of the Air Corps at the close of 1935 the B 17 Flying Fortress of World War II fame had completed its test flights and in January 1936 a contract for the first 13 Fortresses was signed by the Army General Foulois died in 1967 just 6 decades after the Army s Aeronautical Division was formed At the time of his death the United States Air Force which he had helped to create was equipped with supersonic fighters bombers with a range of 8 000 miles or more intercontinental ballistic missiles and thermonuclear weapons But an air force is more than an agglomeration of aircraft bombs and bullets It needs several other elements a clear understanding of its purpose or mission a body of ideas concepts and doctrine governing in broad terms how it will carry out its mission strategy and tactics for the efficient use of its equipment a system for supplying its material and human needs a research and development organization to keep ahead of potential enemies experienced leaders and sound organization to

coordinate and direct its activities These elements were lacking when the Army's only aviation unit first took to the field on March 15 1916 commanded by Capt Benny Foulois The 1st Aero Squadron was ordered to help Brig Gen John J Pershing scout out the bandit Pancho Villa and bring him back from Mexico dead or alive The squadron's unarmed underpowered Curtiss JN 2 biplanes could not make it over the mountains or cope with the strong winds of northern Mexico By April 20 only two of its eight planes were in commission

Office of Air Force History, 1987 Makers of the United States Air Force Office of Air Force History, U S Air Force, 2015-02-26 The fiftieth anniversary of the United States Air Force offers us an opportunity to recognize and appreciate the role that a number of gifted military and aviation pioneers played in shaping the world's only global air and space force This book a joint product of the Air Force History and Museums Program and the Air Force Historical Foundation was first published in 1987 It has proven an indispensable reference work for anyone interested in the history of the service and particularly in the role that key individuals have played in its evolution Many of the individuals profiled in this book are well known to students of air and space power Most had notable combat careers Others were organizers men who shaped the service according to far seeing vision They are a diverse bunch of over achievers many of whom were strongly opinionated even about each other But all of them were dedicated to an ideal to produce a new form of military force a force that would achieve victory in war by exploitation and dominance of the third dimension In this they were totally and uncompromisingly unified a band of brothers who took this vision from the ground and brought it with devastating force to the skies of America's enemies On this the Air Force's Golden Anniversary all Americans owe them our grateful appreciation The development of ballistic missiles in the United States Air Force 1945-1960 , *Monthly Catalog of United States Government Publications* , 1994 *Air Force History Publications* Air Force History and Museums Program (U.S.), 2008 **Building a Strategic Air Force** Walton S. Moody, 1996 **Revolt of the Admirals** Jeffrey G. Barlow, 1994 Chronicles in compelling detail the historic showdown between the U S Air Force and the Navy over the role of carrier aviation in the national security framework of the United States **To Hanoi And Back: The United States Air Force And North Vietnam 1966-1973 [Illustrated Edition]** Dr Wayne Thompson, 2014-08-15 Includes 3 maps and 40 photographs No experience etched itself more deeply into Air Force thinking than the air campaigns over North Vietnam Two decades later in the deserts of Southwest Asia American airmen were able to avoid the gradualism that cost so many lives and planes in the jungles of Southeast Asia Readers should come away from this book with a sympathetic understanding of the men who bombed North Vietnam Those airmen handled tough problems in ways that ultimately reshaped the Air Force into the effective instrument on display in the Gulf War This book is a sequel to Jacob Van Staaveren's *Gradual Failure The Air War over North Vietnam 1965 1966* which we have also declassified and are publishing Wayne Thompson tells how the Air Force used that failure to build a more capable service a

service which got a better opportunity to demonstrate the potential of air power in 1972 Dr Thompson began to learn about his subject when he was an Army draftee assigned to an Air Force intelligence station in Taiwan during the Vietnam War He took time out from writing To Hanoi and Back to serve in the Checkmate group that helped plan the Operation Desert Storm air campaign against Iraq Later he visited Air Force pilots and commanders in Italy immediately after the Operation Deliberate Force air strikes in Bosnia During Operation Allied Force over Serbia and its Kosovo province he returned to Checkmate Consequently he is keenly aware of how much the Air Force has changed in some respects how little in others Although he pays ample attention to context his book is about the Air Force He has written a well informed account that is both lively and thoughtful

Collateral Damage And The United States Air Force Major Patrick M. Shaw, 2014-08-15

Minimization of collateral damage is an objective of the United States Air Force USAF whenever it conducts hostile operations While the USAF has often expressed concern about causing collateral damage its actions have not always reflected a consistent level of commitment This essay explores the evolution of USAF concerns about collateral damage and examines the causes and effects of this unfortunate by product of airpower It concludes that the concerns harbored about causing collateral damage reduce the military effectiveness of airpower This loss of effectiveness is not always important For example when a resource rich coalition conducts an air campaign against an inferior adversary that coalition can discriminate in its application of airpower by allocating great effort to the avoidance of collateral damage In a different context such asymmetry may not exist Commanders then might have to focus on achieving objectives while paying little attention to the possibility of collateral damage In either case collateral damage will likely occur varying only in degree The USAF can take actions which will help alleviate some of the causes of collateral damage Improvements in the areas of planning and technology provide certain relief but ultimately political and military leaders must accept that collateral damage is an inevitable part of airpower
