Making A Community Work:

The Making of Community Work David N. Thomas, 2024-11-01 Originally published in 1983 The Making of Community Work is the outcome of a two year study of community work in the United Kingdom The main purpose of the study was to review the development of community work and to suggest some of the issues in practice and training that might be important in the 1980s Much of the first part of the book is taken up with the emergence of community work as an occupation David Thomas tries to clarify its contribution to a number of political and social processes and to define community work in a way which distinguishes it from other kinds of interventions The second part of the book deals with training research literature and employment in community work it includes a review of college and field based training opportunities and a critical discussion of the state of theory and ideology in the occupation It was hoped it would be an important source of ideas and inspiration for the years ahead It was the first major review of community work since its re discovery in the 1960s it will still be of interest to all those involved in community work or wishing to understand its influence on other professions The book was intended for fieldworkers administrators policy makers trainers and students in community work and in related occupations and disciplines Thomas presents his ideas clearly and his ability to look critically at some of the basic assumptions in community work makes for stimulating and enjoyable reading

Volunteer Work, Informal Learning and Social Action Fiona Duguid, Karsten Mündel, Daniel Schugurensky, 2013-06-12

Since most research on work focuses on paid work and most literature on education concentrates on schools it is not surprising that studies on the relations between work and learning emphasize the relations between paid employment and organized education This unique book deals with an area that has been rarely covered in the literature on work and education the connections between volunteer work and informal learning Through a variety of examples ranging from the Red Cross to teacher labourers from cooperatives to social housing and from participatory democracy to environmental social movements this volume examines the learning dimension of volunteer work in different contexts It also considers the special case of volunteerism among recent immigrants The case studies analyze three basic types of voluntary organizations those providing social services representing local communities and mobilizing for social change The chapters include profiles of the actual work their members do and detailed accounts of the learning practices they are engaged in during their work and the impact of such learning on their personal and professional development The concluding chapter offers a comparative analysis practical recommendations and steps for further research
