Cash on Delivery Nancy Birdsall, William D. Savedoff, Ayah Mahgoub, Katherine Vyborny, 2010 Foreign aid has no shortage of critics Some argue that it undermines development and inherently does more harm than good others insist that aid must be seriously reformed to work properly Cash on Delivery COD Aid proposes serious reform to make aid work well by forcing accountability aligning the objectives of funders and recipients and sharing information about what works Public and private aid can improve lives in poor countries but the willingness of taxpayers and private funders to finance aid programs depends more than ever on showing results COD Aid is a funding mechanism that hinges on results At its core is a contract between funders and recipients that stipulates a fixed payment for each unit of confirmed progress toward an agreed upon goal Once the contract is struck the funder takes a hands off approach allowing the recipient the freedom and responsibility to achieve the goal on its own Payment is made only after progress toward the goal is independently verified by a third party At all steps a COD Aid program is remarkably transparent the contract the amount of progress made and the payment are disseminated publicly to highlight the credibility of the arrangement and improve accountability to the public COD Aid is a new approach to foreign aid but one that complements other aid programs and would ultimately encourage funders and recipients to use existing resources more efficiently Cash On Delivery Aid A New Approach to Foreign Aid explains the approach in detail and investigates its application in one sector education More

specifically the authors show how foreign aid agencies could use COD Aid to help developing countries achieve universal primary school education The example illustrates how to deal with potential challenges of the approach challenges that are no greater than those of traditional aid and includes model term sheets for contracts that could be used for any COD Aid agreement OECD Health Policy Studies Pharmaceutical Innovation and Access to Medicines OECD,2018-11-29 This report reviews the important role of medicines in health systems describes recent trends in pharmaceutical expenditure and financing and summarises the approaches used by OECD countries to determine coverage and pricing Reinventing Foreign Aid William R. Easterly,2008-05-09 Top experts in the field discuss how to improve the effectiveness of foreign aid proposing practical solutions to specific problems rather than a utopian master plan The urgency of reducing poverty in the developing world has been the subject of a public campaign by such unlikely policy experts as George Clooney Alicia Keyes Elton John Angelina Jolie and Bono And yet accompanying the call for more foreign aid is an almost universal discontent with the effectiveness of the existing aid system In Reinventing Foreign Aid development expert William Easterly has gathered top scholars in the field to discuss how to improve foreign aid These authors Easterly points out are not claiming that their ideas will to invoke a current slogan Make Poverty History Rather they take on specific problems and propose some hard headed solutions Easterly himself in an expansive and impassioned introductory chapter makes a case for the searchers who explore solutions by trial and error and learn from feedback over the planners who throw an endless supply of resources at a big goal as the most likely to reduce poverty Other writers look at scientific evaluation of aid projects including randomized trials and describe projects found to be cost effective including vaccine delivery and HIV education consider how to deal with the government of the recipient state work through it or bypass a possibly dysfunctional government examine the roles of the International Monetary Fund a de facto aid provider and the World Bank and analyze some new and innovative proposals for distributing aid Contributors Abhijit Banerjee Nancy Birdsall Craig Burnside Esther Duflo Domenico Fanizza William Easterly Ruimin He Kurt Hoffman Stephen Knack Michael Kremer Mari Kuraishi Ruth Levine Bertin Martens John McMillan Edward Miguel Jonathan Morduch Todd Moss Gunilla Pettersson Lant Pritchett Steven Radelet Aminur Rahman Ritva Reinikka Jakob Svensson Nicolas van de Walle James Vreeland Dennis Whittle Michael Woolcock *Innovation + Equality* Joshua Gans,Andrew Leigh,2020-12-08 How to get more innovation and more equality Is economic inequality the price we pay for innovation The amazing technological advances of the last two decades in such areas as artificial intelligence genetics and materials have benefited society collectively and rewarded innovators handsomely we get cool smartphones and technology moguls become billionaires This contributes to a growing wealth gap in the United States the wealth controlled by the top 0.1 percent of households equals that of the bottom ninety percent Is this the inevitable cost of an innovation driven economy Economist Joshua Gans and policy maker Andrew Leigh make the case that pursuing innovation does not mean giving up on equality precisely the opposite In this book they outline ways that society can become both more entrepreneurial and more

egalitarian All innovation entails uncertainty there s no way to predict which new technologies will catch on Therefore Gans and Leigh argue rather than betting on the future of particular professions we should consider policies that embrace uncertainty and protect people from unfavorable outcomes To this end they suggest policies that promote both innovation and equality If we encourage innovation in the right way our future can look more like the cheerful techno utopia of Star Trek than the dark techno dystopia of The Terminator

Experimental Conversations Timothy N. Ogden,2024-03-19

Discussions of the use and limits of randomized control trials considering the power of theory external validity gaps in knowledge and what issues matter The practice of development economics has undergone something of a revolution as many economists have adopted new methods to answer perennial questions about the effectiveness of anti poverty programs In this book prominent development economists discuss the use and impact of one of the most significant of these new methods randomized control trials RCTs and field experiments In extended interviews conducted over a period of several years they explain their work and their thinking and consider the broader issues of how we learn about the world and how we can change it for the better These conversations offer specialists and nonspecialists alike a unique opportunity to hear economists speak in their own words free of the confines of a particular study or econometric esoterica The economists describe how they apply research findings in the way they think about the world revealing their ideas about the power of theory external validity gaps in knowledge and what issues matter Also included are interviews with RCT observers critics sponsors consumers and others Each interview provides a brief biography of the interviewee Thorough annotations offer background and explanations for key ideas and studies referred to in the conversations Contributors Abhijit Banerjee Nancy Birdsall Chris Blattman Alex Counts Tyler Cowen Angus Deaton Frank DeGiovanni Esther Duflo Pascaline Dupas Xavi Gine Rachel Glennerster Judy Gueron Elie Hassenfeld Dean Karlan Michael Kremer David McKenzie Jonathan Morduch Lant Pritchett Jonathan Robinson Antoinette Schoar Dean Yang

The Power of Pills Jillian Clare Cohen,Patricia Illingworth,Udo Schuklenk,2006-10-20 Why does one third of the global population not have access to essential medicines What drives new drug research priorities How do we manage the ethical legal and social challenges associated with improving drug access Answering these questions and more this book is one of the first comprehensive and critical guides to global pharmaceutical policy issues This multidisciplinary book covers core issues in clear short chapters It is a one stop resource for students policy makers and academics Bringing together the insights of over thirty different specialists from around the world this book discusses current regulation of the industry ethical issues in developing and distributing drugs how it prices and markets drugs recommendations on how to improve pharmaceutical policy the importance of pharmaceuticals the structure of the pharmaceutical industry what drugs are needed on a world wide scale

Getting Better Charles Kenny,2012-12-04

As the income gap between developed and developing nations grows so grows the cacophony of voices claiming that the quest to find a simple recipe for economic growth has failed Getting Better in sharp contrast reports the good news about

global progress Economist Charles Kenny argues against development naysayers by pointing to the evidence of widespread improvements in health education peace liberty and even happiness Kenny shows how the spread of cheap technologies such as vaccines and bed nets and ideas such as political rights has transformed the world He also shows that by understanding this transformation we can make the world an even better place to live That s not to say that life is grand for everyone or that we don t have a long way to go But improvements have spread far and according to Kenny they can spread even further
