**Microplanning manual to guide implementation of preventive chemotherapy to control and eliminate neglected tropical diseases** World Health Organization, 2022-09-05 Neglected tropical diseases NTDs affect more than 1 billion people globally causing serious long term health effects Timely effective interventions such as preventive chemotherapy which involves the regular administration of safe effective medicines to a defined population irrespective of its infection status reduce morbidity and mortality The new NTD road map advocates preventive chemotherapy as a core intervention to reduce the burden of NTDs Effective administration of preventive chemotherapy relies largely on operational planning which addresses the need for programmes to reach all eligible people and maximize community demand for the intervention Local bottom up planning microplanning fosters effective implementation and monitoring of public health programmes Originally public health implementers developed microplanning for use in vaccination campaigns but various programmes including those for control and elimination of NTDs now use it This manual is based on these and other country experiences in microplanning of preventive chemotherapy for NTDs It describes the basic concepts of microplanning and provides steps and examples of tools to develop and implement a microplan Since microplanning originates at the lowest level of implementation and is a bottom up process the main target audience of this manual is individuals who are responsible for oversight of preventive chemotherapy against NTDs

**The Spacemaker's Guide to Big Change** Nabeel Hamdi, 2014-06-05 This book gives definition to participatory practice as a necessary form of activism in development planning for cities It gives guidance on how practice can make space for big and lasting change and for new opportunities to be discovered It points to ways of building synergy and negotiating our way in the social and political spaces in between conventional and often competing ideals public and private interests top down and bottom up formal and informal the global agendas which outsiders promote and the local needs of insiders for example It offers guidance on process designed to close gaps and converge worlds which we know have become divisive and discriminatory working from the detail of everyday life in search of beginnings that count building out and making meaningful locally the abstractions of the global causes we champion poverty alleviation environmental sustainability resilience Practice the collective process by which decisions are negotiated plans designed and actions taken in response to needs and aspirations locally and globally we will see is not just about being practical but more Its purpose is to give structure to our understanding of the order and disorder in our cities today then to disturb that order when it has become inefficient or inequitable even change it It is to add moral value to morally questionable planning practice and so build a social economy for the satisfaction of human need Practice in these spaces in between redraws the boundaries of expectation of disciplinary work and offers a new high ground of moral purpose from which to be more creative more integrated more relevant more resourceful more strategic
