The Making of the Modern University Julie A. Reuben, 1996-09-15 Based on extensive research at eight universities Harvard Yale Columbia Johns Hopkins Chicago Stanford Michigan and California at Berkeley Reuben examines the aims of university reformers in the context of nineteenth century ideas about truth She argues that these educators tried to apply new scientific standards to moral education but that their modernization efforts ultimately failed *Edmund J. David Hoeveler, 2024-11-12 In 1904 Edmund J James inherited the leadership of an educational institution in search of an identity His sixteen year tenure transformed the University of Illinois from an industrial college to a major state university that fulfilled his vision of a center for scientific investigation Winton U Solberg and J David Hoeveler provide an account of a pivotal time in the university s evolution A gifted intellectual and dedicated academic reformer James began his tenure facing budget battles and antagonists on the Board of Trustees But as time passed he successfully campaigned to address the problems faced by women students expand graduate programs solidify finances create a university press reshape the library and faculty and unify the colleges of liberal arts and sciences Combining narrative force with exhaustive research the authors illuminate the political milieu and personalities around James to draw a vivid portrait of his life and times The authoritative conclusion to a four part history Edmund J James and the Making of the Modern University of Illinois 1904 1920 tells the story of one man s mission to create a university worthy of the state of Illinois *The Decline of the Secular University* C. Côté, Sarah Pickard, 2022-03-21 Higher education has come under increasing public scrutiny in recent years assailed with demands for greater efficiency accountability cost reduction and above all job training Drawing upon examples from across the world with an emphasis on Anglo American higher education systems this handbook employs sociological approaches to

address these pressing concerns The second edition is thoroughly updated and adds several new chapters to shed further light on the transformations wrought by the interrelated processes of massification vocationalization and marketization that have swept through universities in the wake of neoliberal reforms introduced by governments since the 1980s The handbook explores recent developments in higher education systems and policy as well as the everyday experiences of students and staff and ongoing problems of inequality and diversity within universities In doing so the chapters address a number of current issues concerning the legitimacy of higher educational credentials from the continuing debate regarding traditional pedagogies and the role of universities in social class reproduction to more recent concerns about standards in mass systems Collectively this handbook demonstrates that the sociology of higher education has the potential to play a leadership role in improving the myriad higher education systems around the world that are now part of an interrelated set of subsystems replete with both persistent problems and promising prospects This book is therefore necessary reading for a variety of stakeholders within academia as well as professionals and policy makers interested in understanding higher education and the acute challenges it faces

A Report from the Front Lines Michael Shahan, 2009 In tribute to the ongoing influence of Robert Benne director of the Center for Religion and Society at Roanoke College fourteen of his friends and colleagues have produced A Report from the Front Lines in which they consider the role of theology in the public arena at this turn of the twenty first century They speak powerfully to the cultural paralysis of the Western world where educated leaders claim that morality must not interfere with science or public policy by showing the relevance of orthodox Christianity to humanity s most pressing problems The constant theme weaving through the volume is Benne s own conviction that Christians can and must engage in the public square with positions forged out of their religious commitments using arguments whose presuppositions allow room for special revelation but whose resultant logic is translated into a shared universal rationality Book Jacket

The Lure of Literacy Michael Harker, 2014-12-03 Examines proposals for freshman composition's abolition and reform while providing a new model for courses The Lure of Literacy promises to transcend the stale and unproductive debate on freshman composition that has gripped English studies for more than a century It is the first book to chart the origin of the discussion from the early twentieth century to the advent of the New Literacy Studies Michael Harker recontextualizes proposals to abolish compulsory composition and reimagines pedagogical conditions in English studies in order to present a different model for first year writing This new model for compulsory composition programs focuses on students' attitudes about composition and interrogates the very idea of literacy itself Harker clearly builds on current scholarship and brings his inquiries down to the very pragmatics of the classroom In a field full of critiques but little substance his voice is refreshing in that what he has been arguing about is fully fleshed out in his lesson plans at the end William H Thelin author of Writing without Formulas The Lure of Literacy presents an incredibly accessible account of New Literacy Studies scholarship which serves the book's larger purpose i.e. to propose a First Year Literacy Studies curriculum extremely well Unlike a lot of books that rush through a discussion of an assignment or course that illustrates the pedagogical impact of the theory or historical research this book presents a carefully thought out course complete with identifiable outcomes and lessons that really does seem to have the potential to address the persistent misconceptions of literacy that fuel the abolition debate Chris Warnick College of Charleston

The Learned Practice of Religion in the Modern University Donald Wiebe, 2019-11-14 In these essays Donald Wiebe unveils a significant problem in the academic study of religion in colleges and universities in North America and Europe that studies almost always exhibit a religious bias To explore this issue Wiebe looks at the religious and moral agendas behind the study of religion showing that the boundaries between the objective study of religion and religious education as a tool for bettering society have become blurred As a result he argues religious studies departments have fostered an environment where religion has become a learned or scholarly practice rather than the object of academic scrutiny This book provides a critical history of the failure of 20th and 21st century scholars to follow through on the 19th century ideal of an objective scientific study of religious thought and behaviour Although emancipated from direct ecclesiastical control and to some extent from sectarian theologizing Wiebe argues that research and scholarship in the academic department of religious studies has failed to break

free from religious constraints He shows that an objective scientific study of religious thought and practice is not only possible but the only appropriate approach to the study of religious phenomena Cultivating Virtue in the University Jonathan Brant,Edward Brooks,Michael Lamb,2022 Historically character education has been an important aim of many universities Yet while the last few decades have witnessed increased interest in character education among children and adolescents much less attention has been given to the formation of university students in the midst of a crucial period of intellectual and ethical development Cultivating Virtue in the University offers insights into why educating character might be an important aim for universities and how institutions might integrate it in an increasingly global and pluralistic age The book will interest scholars faculty staff and administrators considering whether they might want to integrate character into their institutions as well as public audiences eager to explore the purpose of the university at a time when the future of higher education is under intense debate **Education and Social Change** John L. Kinnison,2011-08-08 Whatever happened to America s small private residential undergraduate Liberal Arts Colleges Will they survive the present contest with pragmatic publicly supported community colleges and the secular mega universities The story of Wittenberg one of the best of Ohio s many good Liberal Arts Colleges provides answers to such questions It looks at this critical period in their history giving hope that the very best of them will prosper They are an endangered national resource that should be preserved and no more of them are being started The book is written both for the casual reader and for historians and professional educators *American Educational History Journal* J. that deals substantively with questions of educational history **Catholic Higher Education** Melanie Morey, John Piderit, 2010-05-28 Today Catholic colleges and universities are dealing with critical questions about what constitutes Catholic collegiate identity Based on their research Morey and Piderit describe the present situation and offer concrete suggestions for enhancing Catholic identity culture and mission at all Catholic colleges and universities The authors define the critical issues and analyze and address them by using the rich construct of culture particularly organizational culture and they provide four different models of how Catholic colleges and universities can operate and successfully compete as religiously distinctive institutions in the higher education market
