Making Of Urban Japan Cities And Planning From Edo To The Twenty First Century:

The Making of Urban Japan André Sorensen, 2005-08-19 During the twentieth century Japan was transformed from a poor primarily rural country into one of the world's largest industrial powers and most highly urbanised countries. Interestingly while Japanese governments and planners borrowed carefully from the planning ideas and methods of many other countries Japanese urban planning urban governance and cities developed very differently from those of other developed countries Japan's distinctive patterns of urbanisation are partly a product of the highly developed urban system urban traditions and material culture of the pre modern period which remained influential until well after the Pacific War. A second key influence has been the dominance of central government in urban affairs and its consistent prioritisation of economic growth over the public welfare or urban quality of life. Andr Sorensen examines Japan's urban trajectory from the mid nineteenth century to the present paying particular attention to the weak development of Japanese civil society local governments and land development and planning regulations.

The Oxford Handbook of Cities in World History Peter Clark, 2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns. Becoming globally urban has been one of mankind

s greatest collective achievements over time and raises many questions How did global city systems evolve and interact in the past How have historic urban patterns impacted on those of the contemporary world And what were the key drivers in the roller coaster of urban change over the millennia market forces such as trade and industry rulers and governments competition and collaboration between cities or the urban environment and demographic forces This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day The Oxford Handbook of Cities in World History explores not only the main trends in the growth of cities and towns across the world in Asia and the Middle East Europe Africa and the Americas and the different types of cities from great metropolitan centres to suburbs colonial cities and market towns but also many of the essential themes in the making and remaking of the urban world the role of power economic development migration social inequality environmental challenge and the urban response religion and representation cinema and urban creativity Split into three parts covering Ancient cities the medieval and early modern period and the modern and contemporary era it begins with an introduction by the editor identifying the importance and challenges of research on cities in world history as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present *Living Cities in Japan* André Sorensen, Carolin Funck, 2007 Over the last fifteen years local citizens movements have spread rapidly throughout Japan This volume examines the growth and nature of civil society participation in local urban and environmental governance *Cities Beyond Borders* Nicolas Kenny, Rebecca Madgin, 2016-05-23 Drawing on a body of research covering primarily Europe and the Americas but stretching also to Asia and Africa from the mid eighteenth century to the present this book explores the methodological and heuristic implications of studying cities in relation to one another Moving fluidly between comparative and transnational methods as well as across regional and national lines the contributors to this volume demonstrate the necessity of this broader view in assessing not just the fundamentals of urban life the way cities are occupied and organised on a daily basis but also the urban mindscape the way cities are imagined and represented In doing so the volume provides valuable insights into the advantages and limitations of using multiple cities to form historical inquiries **The Great Kantō Earthquake and the Chimera of National Reconstruction in Japan** J. Charles Schencking, 2013-07-02 In September 1923 a magnitude 7.9 earthquake devastated eastern Japan killing more than 120 000 people and leaving two million homeless Using a rich array of source material J Charles Schencking tells for the first time the graphic tale of Tokyo's destruction and rebirth In emotive prose he documents how the citizens of Tokyo experienced this unprecedented calamity and explores the ways in which it rattled people's deep seated anxieties about modernity While explaining how and why the disaster compelled people to reflect on Japanese society he also examines how reconstruction encouraged the capital's inhabitants to entertain new types of urbanism as they rebuilt their world Some residents hoped that a grandiose metropolis reflecting new values would rise from the ashes of disaster ravaged Tokyo Many however desired

a quick return of the city they once called home Opportunistic elites advocated innovative state infrastructure to better manage the daily lives of Tokyo residents Others focused on rejuvenating society morally economically and spiritually to combat the perceived degeneration of Japan Schencking explores the inspiration behind these dreams and the extent to which they were realized He investigates why Japanese citizens from all walks of life responded to overtures for renewal with varying degrees of acceptance ambivalence and resistance His research not only sheds light on Japan's experience with and interpretation of the earthquake but challenges widespread assumptions that disasters unite stricken societies creating a blank slate for radical transformation National reconstruction in the wake of the Great Kanto Earthquake Schencking demonstrates proved to be illusive *Kenzo Tange and the Metabolist Movement* Zhongjie Lin, 2010-02-25 Metabolism the Japanese architectural avant garde movement of the 1960s profoundly influenced contemporary architecture and urbanism This book focuses on the Metabolists utopian concept of the city and investigates the design and political implications of their visionary planning in the postwar society At the root of the group's urban utopias was a particular biotechnical notion of the city as an organic process It stood in opposition to the Modernist view of city design and led to such radical design concepts as marine civilization and artificial terrains which embodied the metabolists ideals of social change Tracing the evolution of Metabolism from its inception at the 1960 World Design Conference to its spectacular swansong at the Osaka World Exposition in 1970 this book situates Metabolism in the context of Japan's mass urban reconstruction economic miracle and socio political reorientation This new study will interest architectural and urban historians architects and all those interested in avant garde design and Japanese architecture [The Routledge Handbook of Placemaking](#) Cara Courage, Tom Borrup, Maria Rosario Jackson, Kylie Legge, Anita Mckeown, Louise Platt, Jason Schupbach, 2020-12-30 This Handbook is the first to explore the emergent field of placemaking in terms of the recent research teaching and learning and practice agenda for the next few years Offering valuable theoretical and practical insights from the leading scholars and practitioners in the field it provides cutting edge interdisciplinary research on the placemaking sector Placemaking has seen a paradigmatic shift in urban design planning and policy to engage the community voice This Handbook examines the development of placemaking its emerging theories and its future directions The book is structured in seven distinct sections curated by experts in the areas concerned Section One provides a glimpse at the history and key theories of placemaking and its interpretations by different community sectors Section Two studies the transformative potential of placemaking practice through case studies on different places methodologies and theoretical frameworks It also reveals placemaking's potential to nurture a holistic community engagement social justice and human centric urban environments Section Three looks at the politics of placemaking to consider who is included and who is excluded from its practice and if the concept of placemaking needs to be reconstructed Section Four deals with the scales and scopes of art based placemaking moving from the city to the neighborhood and further to the individual practice It juxtaposes the voice of the practitioner and professional alongside
