Making Argument Work Knowing And Applying Basic Argument Strategies:

Making Argument Work Chris B. Crawford, James Doepke, 2007 **Argumentation in Multi-Agent Systems** Peter McBurney, Iyad Rahwan, Simon D. Parsons, Nicolas Maudet, 2010-05-10 This book constitutes the thoroughly refereed proceedings of the 6th International Workshop on Argumentation in Multi Agent Systems held in Budapest Hungary in May 2009 in association with the 8th International Conference on Autonomous Agents and Multi Agent Systems AAMAS 2009 The 18 revised full papers were carefully reviewed and selected from numerous submissions and are organized in four topical sections on practical reasoning and argument about action persuasion and negotiation argumentation theory and applications and emotions **Argument Tactics** Xena Mindhurst, AI, 2025-01-31 Argument Tactics presents a groundbreaking approach to understanding and mastering the art of argumentation by uniquely combining psychological insights with philosophical principles This comprehensive guide explores the intricate relationship between logical construction and psychological dynamics demonstrating how effective arguments rely on both rational structure and understanding human cognitive processes The book progresses systematically through three main sections beginning with the fundamental architecture of arguments including premises conclusions and inferential relationships It then delves into the psychological elements of argumentation examining cognitive biases and decision making patterns that influence how people process and respond to different forms of reasoning The final section bridges theory with practice through real world case studies from law business negotiation and academic discourse What sets this work apart is its evidence based methodology drawing from cognitive science formal logic and communication studies to create a practical framework for argument construction Rather than simply focusing on traditional debate techniques it teaches readers how to recognize and counter logical fallacies while understanding the psychological factors that influence persuasion This balanced approach makes it particularly valuable for professionals in fields requiring strong analytical skills and students developing their critical thinking abilities offering both theoretical understanding and practical application strategies **Rhetoric Basics** Harrison Stewart, AI, 2025-05-06 Rhetoric Basics explores the art of persuasion through language teaching readers how to craft compelling and effective communications Understanding rhetoric empowers individuals to become discerning consumers of information and skilled communicators in academic professional and civic settings The book breaks down core rhetorical concepts like ethos credibility logos logic and pathos emotion demonstrating how these elements influence audiences For example understanding pathos can help one recognize emotional manipulation in advertising The book progresses logically by first introducing the history and core concepts of rhetoric before delving into detailed analyses of ethos logos and pathos individually It uses real world examples from literature speeches and contemporary media to show how these techniques work Rhetoric Basics uniquely emphasizes the practical application of rhetorical principles in everyday communication providing actionable strategies to analyze and construct persuasive messages This textbook is designed for

students of language arts and anyone seeking to improve their communication skills With its accessible style the book avoids jargon and offers examples exercises and assessment tools to facilitate learning By mastering the art of rhetoric readers can enhance their ability to effectively communicate in all aspects of their lives from writing persuasive essays to delivering impactful presentations

Computational Models of Argument S. Modgil,K. Budzynska,J. Lawrence,2018-09-06 In its classical form the study of argumentation focuses on human oriented uses of argument such as whether an argument is legitimate or flawed engagement in debate or the rhetorical aspects of argumentation In recent decades however the study of logic and computational models of argumentation has emerged as a growing sub area of AI This book presents the Seventh International Conference on Computational Models of Argument COMMA 18 held in Warsaw Poland from 12 to 14 September 2018 Since its inception in 2006 the conference and its related activities have developed alongside the steady growth of interest in computational argumentation worldwide and the selection of 25 full papers and 17 short papers out of a total of 70 submissions and 15 demonstration abstracts included here reflect the broad multidisciplinary nature of argumentation and the increasing body of work which establishes the relevance of computational models to various disciplines and real world applications Subjects covered include algorithm development innovative applications argument mining argumentation based models of dialogue abstract argument frameworks and structured argumentation Representing an overview of current developments in the field this book will appeal to all those with an interest in computational models of argument
