know all about the joys of making a children's garden and gathering their own harvest for the first time in their lives. This book is going to tell you how you can add plenty of joy and interest in the lives of your family members especially when their children by helping them make their own children's garden. Of course the first step is not to make them feel that gardening is a duty and something which you have imposed on them. This is immediately going to put their backs up. My grandfather tried reverse psychology on us as kids to get us to water his large garden. He tried pretending that we were very delicate and we would catch colds if we were found playing about with his water pipes, sprinklers and hoses. Needless to say the moment he left for his club for the evening we were out in the garden watering the whole land merrily and getting thoroughly and enjoyably drenched in the bargain. And we roped in the help of our friends and playmates too whose own grandfathers were also very particular about the health of their own grandchildren when subjected to the close proximity of hosepipe water. Naturally this bit of inverse psychology worked equally well when he said that our hands were too little to do the weeding and we decided to prove that he was wrong. Naturally after finding the piles of weeds when he came back from his club he had to admit that he was wrong and asked grandma to reward us with extra helpings of chocolate cake for being such tireless little soldiers. So you could say that in the initial stages we did our share of gardening through not so altruistic motives but soon we got addicted to the feel of soil between our fingers. But then that was natural because man and the earth are bound together naturally.
