*Optimization and Decision-Making in the Renewable Energy Industry* Baló, Figen, Topal, Ayşe, Demir, Ezgi, Ulutaş, Alptekin, 2022-03-11 With immense consumption of resources increased global warming and environmental pollution the energy sector has inevitably embraced sustainability Countries are releasing plans and programs to shift their fossil fuel dependent energy sectors into clean energy sectors and projections show that renewable energy will be a significant part of nations energy mixes in the near future Optimization and decision making techniques have been commonly used in the energy sector as problems encountered in this sector are complex and therefore need comprehensive techniques to solve them With the uncertainty and high cost issues of renewable resources the complexity increases in the sector and requires optimization and decision making techniques Optimization and Decision Making in the Renewable Energy Industry analyzes renewable energy sources using current mathematical methods and techniques and provides advanced knowledge on key opportunities and challenges The book discusses current and trending mathematical methods tests their validity and verification and considers their practical application in the field Covering topics such as urban sustainability and renewable energy systems this reference work is ideal for practitioners academicians industry professionals researchers scholars instructors and students

The Political Economy of Electricity Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250

years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today s electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach

*Telecommunications Policy for the 1990s and Beyond* Walter G. Bolter, James W. McConnaughey, Fred J. Kelsey, 1990 This book analyzes the development of the telecommunications industry since the AT T divestiture The reference work examines the technological revitalization of the telecommunications industry from the perspective of global markets and from these trends considers the implications for regulatory policy in the future

**Multinational Federalism in Bosnia and Herzegovina** Soeren Keil, 2016-04-15 In 1995 none of the political parties representing the peoples of Bosnia preferred a federal option Yet Bosnia became a federal state highly decentralised and with a complex institutional architecture This solution was imposed on them by international actors as a result of peace negotiations following the Yugoslav wars Political parties in post war Bosnia were not willing to identify with or accept the federation The international community intervened taking over key decisions and so Bosnia and Herzegovina became the first state to experience a new model of federalism namely imposed federalism and a new model of a federal state that of the internationally administered federation By combining comparative politics conflict analysis and international relations theory Soeren Keil offers a unique analysis of federalism in post Dayton Bosnia and Herzegovina By exploring this model of imposed federalism not only does this study greatly contribute to the literature on developments in Bosnia and Herzegovina it also re evaluates comparative federalism in theory and practice This study also offers important conclusions for similar cases both in

the Western Balkans region and the wider world where international involvement and federalism as a method of conflict resolution in diverse societies becomes ever more prevalent and important

**Natural Gas Regulation and the Trans-Alaska Pipeline** United States. Congress. Joint Economic Committee,1972 Meeting of the Canada-United States Interparliamentary Group United States. Congress. House. Delegation to the Canada-United States Interparliamentary Group,1983 Infrastructure Regulation: What Works, Why And How Do We Know? Lessons From Asia And Beyond Darryl S L Jarvis,M Ramesh,Xun Wu,Eduardo K Araral, Jr,2011-06-08 Regulation of public infrastructure has been a topic of interest for more than a century Providing public goods securing their financing maintenance and improving the efficiency of their delivery has generated a voluminous literature and series of debates More recently these issues have again become a central concern as new public management approaches have transformed the role of the state in the provision of public goods and the modalities by which the financing of infrastructure and its operation are procured Yet despite the proliferation of new modalities of regulating infrastructure little is known about what works and why Why do certain regulatory regimes fail and others succeed What regulatory designs and institutional features produce optimal outcomes and how And why do regulatory forms of governance when transplanted into different institutional contexts produce less than uniform outcomes This book addresses these questions exploring the theoretical foundations of regulation as well as a series of case studies drawn from the telecommunications electricity and water sectors It brings together distinguished scholars and expert practitioners to explore the practical problems of regulation regulatory design infrastructure operation and the implications for infrastructure provision

**Powering China:Reforming the Electric Power Industry in China** Xu Yi-chong,2018-02-05 This title was first published in 2002 This study of the Chinese electric power industry examines the ownership and the restructuring of the industry The reform of the electric power industry is also seen as part of the wider economic development that has been taking place in China thus providing fresh perspectives on the changes taking place in both the economy and society more generally Presenting a wealth of extensive research on the subject the book elucidates the power struggle between political and bureaucratic elite and explains the sensitive and volatile relationship between the central and provincial government against an increasingly complex global background
