## **Making Of Stonehenge:**

The Making of Stonehenge Rodney Castleden, 2002-11 Castleden suggests that there is no one meaning or purpose for Stonehenge that from its very beginning it has filled a variety of needs The Making of Stonehenge Rodney Castleden, 2002-11-01 Every generation has created its own interpretation of Stonehenge but rarely do these relate to the physical realities of the monument Rodney Castleden begins with those elements which made possible the building of this vast stone circle the site the materials and the society that undertook the enormous task of transporting and raising the great vertical stones then capping them all to a carefully contrived plan What emerges from this detailed examination is a much fuller sense of Stonehenge both in relation to all the similar sites close by and in terms of the uses to which it was put Castleden suggests that there is no one meaning or purpose for Stonehenge that from its very beginning it has filled a variety of needs The Romans saw it as a centre of resistance the antiquaries who rediscovered it in the seventeenth century saw a long line of continuity leading back into the nation's past The archaeologists see it as a subject for rational scientific investigation The National Trust and English Heritage view it as an unfailing magnet for visitors UNESCO has declared it a World Heritage Site the cultural property of the whole of humanity Lost to view amid competing interests over the millennia are the uses it has served for those who live within its penumbra for whom Stonehenge has never been lost or rediscovered It exists in local myth and legend stretching back beyond history **How to Build Stonehenge** Mike Pitts, 2022-02-17 Icon of the New Stone Age sculptural and engineering marvel symbol of national pride there is nothing quite like Stonehenge These great sarsen and bluestone slabs arranged with simple graphic genius attract visitors from across the world The monument stands silent in the face of the questions its unlikely existence raises who built it Why How There has been endless speculation about why Stonehenge was built inspiring theories ranging from the academically credible to the improbable but far less investigation into how In the millennia since its creation pieces of Stonehenge have been knocked over by heavy machinery found their way to Florida and back again and been exposed to radioactive sodium but the seemingly impossible endeavour of raising the stones with Neolithic technology has remained inexplicable until now In the past decade ground breaking discoveries made possible by cutting edge scientific techniques have traced the precise provenance of the bluestones in Wales but can we plot their journeys to the Salisbury Plain And how might teams of labourers lacking machinery or even pack animals have dragged them 150 miles to the site How did they carve joints into the sarsen boulders among the hardest stones in the world and then raise them into place Mike Pitts draws on a lifetime's study to answer these questions revealing how Stonehenge stood not in austere isolation as we see it today but as part of a wider world the focus of a megalithic cosmology of belief ritual and creativity Making Sense of Monuments Michael J. Kolb, 2019-11-06 Stonehenge Machu Picchu Confederate statues Egyptian pyramids and medieval cathedrals these are some of the places that are the subject of Making Sense of Monuments an analysis of how the built environment molds human experiences and

perceptions via bodily comparison Drawing from recent research in cognitive neuroscience psychology and semiotics Michael J Kolb explores the mechanics of the mind the material world and the spatialization process of monumental architecture Three distinct spatial cognitive metaphors time movement and scale comprise strands of knowledge that when interwoven create embodied contours of meaning of how human interact with monumental spaces Comprehensive lucidly written and thoroughly illustrated Making Sense of Monuments is a vibrant extraordinary journey of the monuments we have constructed and inhabited The Making of the British Landscape Francis Pryor,2010-06-03 This is the changing story of Britain as it

Pearson,2023-04-06 Stonehenge is one of the world's most famous monuments Who built it how and why are questions that have endured for at least 900 years but modern methods of investigation are now able to offer up a completely new understanding of this iconic stone circle Stonehenge's history straddles the transition from the Stone Age to the Bronze Age though its story began long before it was built Serving initially as a burial ground it evolved over time into a sacred place for gathering feasting and building and was remodelled several times as different peoples arrived in the area along with new technologies and customs In more recent centuries it has found itself the centre of excavations political protests and even conspiracy theories embedding itself in the consciousness of the modern world In this book Mike Parker Pearson draws on two decades of research the results of recent excavations and cutting edge scientific analyses to uncover many of the secrets that this prehistoric stone circle has kept for 5 000 years In doing so he paints the most comprehensive picture yet of the history of Stonehenge from its origins up to the 21st century and reveals how in some ways trying to explain its power of attraction in the present is harder than explaining its purpose in the ancient past *Northern Europe* Trudy Ring,Noelle

Morrissey, 1999 Visiting Britain in the mid 18th century Andre Rouquet wrote that in England more than in any other country every man would fain be his own architect Not surprisingly then several of the most important 18th century British authors were also practicing architects John Vanbrugh a playwright designed Blenheim Palace the poet Alexander Pope offered architectural drawings for redesigning the houses of friends and Horace Walpole claimed that the home he renovated Strawberry Hill inspired his Novel The Castle of Otranto The work of John Milton and Thomas Gray also exhibits an abiding interest in architecture By examining the connections between literature and architecture in the work of these writers and by viewing architecture in literary terms Lee Morrissey traces a narrative of cultural change in the Augustan age and beyond A literary scholar with a strong background in architectural theory and practice Morrissey examines architectural references made by these authors and architectural publications familiar to them Each chapter establishes a connection with architecture in the careers of an author and then describes how a principal text Paradise Lost The Provoked Wife An Essay on Man Elegy Written in a Country Churchyard and The Castle of Otranto focuses the literary and historical issues of the period in architectural terms While some 20th century architectural theorists have worried that treating architecture in literary terms robs it of its social function Morrissey argues that architecture can be a language and still participate in political and social contexts because language itself is political and social The fruit of his argument is a unique intellectual history of late 17th and early 18th century Britain of use to scholars of architectural history and landscape architecture as well as of literature
