grip Estrangement Dolan realized should be understood and embraced not shrouded in shame Drawing on his own suffering and healing as well as experts advice and the testimony of other courageous survivors Dolan first explains why abuse is much different and more prevalent than we may think how it harms us in childhood and beyond and why limiting or eliminating contact might be our best possible choice Then he walks readers through the steps of a successful positive estrangement how to take crucial time for yourself how to make sure no one can gaslight you into minimizing or forgetting how to set rules for your abuser and if they can't or won't respect your limits how to end a toxic relationship He also offers valuable counsel on how to ease the guilt and grief that often accompany parting and how to break the cycle of abuse that was likely passed down to you through many generations With a convincing blend of clarity and empathy Dolan encourages others to do what he ultimately did for himself determine whether the people in your life treat you with the care and concern you deserve and part ways with them if they don't

Problem Posing Stephen I. Brown, Marion I. Walter, 2014-01-14 As a result of the editors collaborative teaching at Harvard in the late 1960s they produced a ground breaking work *The Art Of Problem Posing* which related problem posing strategies to the already popular activity of problem solving It took the concept of problem posing and created strategies for engaging in that activity as a central theme in mathematics education Based in part upon that work and also upon a number of articles by its authors other members of the mathematics education community began to apply and expand upon their ideas This collection of thirty readings is a testimony to the power of the ideas that originally appeared In addition to reproducing relevant materials the editors of this book of readings have included a considerable amount of interpretive text which places the articles in the context of problem solving While the preponderance of essays focus upon mathematics and mathematics education some of them point to the relevance of problem posing to other fields such as biology or psychology In the interpretive text that accompanies each chapter they indicate how ideas expressed for one audience may be revisited or transformed in order to ready them for a variety of audiences
