King].** Alice King,1862 Diana, Princess of the Royal Forest of the Peak; From Domesday to Derbyshire with the Eyres, Fanshawes, Featherstonehaughs, and Fanchers Patrick Fancher,2013-03-27 The author draws upon Peak Forest legends to unite readers with Diana Eyre s spirit A phantom wind ushers the memory of Diana into the forest where she recounts her visits to the place of which the King had given authority to her ancestors She shares treading upon thoroughfares carved out by the Romans She recollects walks through the dark canopied forest of Hope Derwent Valley and Sherwood Forest the retreat of Robin Hood She gasps at thoughts of Henry VIII s doings during Reformation She recalls Eyre monuments in Hathersage Churchyard near Little John s grave and foresees Hathersage as the setting for the book Jane Eyre As Diana relives history and superstitious tales an elusive wolf lets out a chilling howl The story nears its close as the wolf s distant cry breaks the wind s spell and provokes it into fits of aggravated maneuverings Seemingly at the behest of nature s call the wind having sensed it s completed mission takes Diana s memories back to their former hidden realm The Mahabharata of Khrisna-Dwaipayana Vyasa; III. The Book of the Forest Part One Kisari Mohan Ganguli,2024-01-24 Reprint of the original first published in 1883 1896 Imagining the Forest John R. Knott,2012 How the meaning of the forest developed in the Great Lakes The Symbolic Design of Windsor-Forest Pat Rogers,2004 This is the first detailed exploration of one of the earliest major poems by Alexander Pope

Windsor Forest 1713 The book reveals how Pope used the artistic conventions of the Stuart court such as masque architecture allegorical painting and heraldry to create the last great Renaissance poem in English A coherent symbolic design is constructed around the themes of the river and the forest Pope organizes the structure and style of the poem to create a prophetic version of nationhood drawing on such sources as the plays of Ben Jonson the Whitehall paintings of Rubens the architecture of Inigo Jones the panegyric work of Dryden and the topographical poetry of Drayton The political dimensions of the poem are considered in relation to the foundation of the South Sea Company in 1711 with its foreshadowing of imperial issues to come The book will spark further interest in a poem that has been gaining increasing attention recently from writers such as E P Thompson and Laura Brown It shows the centrality of Windsor Forest in Pope's own career and the centrality of Pope in the debates of his time Pat Rogers is DeBartolo Professor in the Liberal Arts at the University of

Forest Policies and Social Change in England Sylvie Nail,2008-05-08 Forestry has been witness to some dramatic changes in recent years with several Western countries now moving away from the traditional model of regarding forests merely as sources of wood Rather these countries are increasingly recognizing their forests as multi purpose resources with roles which go far beyond simple economics In this innovative book Sylvie Nail uses England as a case study to explore the relationships between forests society and public perceptions raising important questions about forest policy and management both now and in the future Adopting a sociological approach to forest policy and management the book discusses the current validity of the two principles underlying forestry since the Middle Ages first that forestry should only exist when no better use of the land can be made and second that forestry itself should be profitable The author stresses how values and perceptions shape policies and conversely how policies can modify perceptions and also how policies can fail if they do not take perceptions into account She concludes that many of the issues facing English forestry in the 21st century from leisure health and amenity provision through education and rural as well as urban regeneration to biodiversity conservation go well beyond both national borders and the scope of forestry Indeed forestry in the 21st century seems to be less about planting and managing trees than about being a vector and a mirror of social change This novel synthesis provides a valuable resource for advanced students and researchers from all areas of natural resource studies including those interested in social history socio economics cultural geography and environmental psychology as well as those studying landscape ecology environmental history policy analysis and natural resource management
