Dominant Elites in Latin America Liisa L. North,Timothy D. Clark,2017-08-18 This volume examines the ways in which the socio economic elites of the region have transformed and expanded the material bases of their power from the inception of neo liberal policies in the 1970s through to the so called progressive pink tide governments of the past two decades The six case study chapters on Chile Brazil Ecuador Colombia El Salvador and Guatemala variously explore how state policies and even United Nations peace keeping missions have enhanced elite control of land and agricultural exports banks and insurance companies wholesale and import commerce industrial activities and alliances with foreign capital Chapters also pay attention to the ways in which violence has been deployed to maintain elite power and how international forces feed into sustaining historic and contemporary configurations of power **Remoteness Reconsidered** Christopher Rossi,2021-07-06

Much of our understanding of the world is framed from the perspective of a dominant power center or from standard readings of historical events The architecture of international information distribution academic centers and the lingua franca of international scholarly discourse also shape these stories Remoteness Reconsidered employs the idea of remoteness as an analytical tool for viewing international law s encounter with the Americas from the unusual peripheral perspective of the Atacama Desert The Atacama is one of the most remote places on Earth although that less than accurate perspective

comes from standard historical accounts of the region accounts that originate from the center Changing the usual frame of reference leads to a reconsideration of the idea of remoteness and of the subsequent marginalization of historical narratives that influence hemispheric international relations in important ways today Lessons about international law s encounters with neoliberalism indigenous and human rights and the management and extraction of mineral resources take on new significance by following a spatial turn toward the idea of remoteness as applied to the Atacama Desert

Developing Country Debt and the World Economy Jeffrey D. Sachs, 2007-12-01 For dozens of developing countries the financial upheavals of the 1980s have set back economic development by a decade or more Poverty in those countries have intensified as they struggle under the burden of an enormous external debt In 1988 more than six years after the onset of the crisis almost all the debtor countries were still unable to borrow in the international capital markets on normal terms Moreover the world financial system has been disrupted by the prospect of widespread defaults on those debts Because of the urgency of the present crisis and because similar crises have recurred intermittently for at least 175 years it is important to understand the fundamental features of the international macroeconomy and global financial markets that have contributed to this repeated instability Developing Country Debt and the World Economy contains

nontechnical versions of papers prepared under the auspices of the project on developing country debt sponsored by the National Bureau of Economic Research. The project focuses on the middle income developing countries particularly those in Latin America and East Asia although many lessons of the study should apply as well to other poorer debtor countries. The contributors analyze the crisis from two perspectives that of the international financial system as a whole and that of individual debtor countries. Studies of eight countries Argentina Bolivia Brazil Indonesia Mexico the Philippines South Korea and Turkey explore the question of why some countries succumbed to serious financial crises while other did not. Each study was prepared by a team of two authors a U S based research and an economist from the country under study. An additional eight papers approach the problem of developing country debt from a global or systemic perspective. The topics they cover include the history of international sovereign lending and previous debt crises the political factors that contribute to poor economic policies in many debtor nations the role of commercial banks and the International Monetary Fund during the current crisis the links between debt in developing countries and economic policies in the industrialized nations and possible new approaches to the global management of the crisis.
