Environmental Policy Analyses Peter Knoepfel, 2007-10-05. Having had the opportunity of receiving considerable public money mainly from the Swiss National Science Foundation for numerous environmental policy studies in Switzerland and abroad during the last 25 years, I have decided to put the results published mainly in German and French but also in English in many scientific journals, monographs, and book sections in a single book on behalf of my students younger scholars interested in policy analysis dating from the period of the first environmental policies and my friends teaching this subject in Switzerland and abroad. The criteria used to select the fifteen contributions were their impact on the scientific debate at the time of their publication, their validity for present conceptualizations of policy analysis in the field of the environment, and their contribution to the development of policy analysis as a whole. Moreover, the selected contributions mainly focus on empirical applications in the field of environmental policies or the interface between environmental and non-environmental policies. Some have led to concrete policy recommendations of which most have been partly implemented since at least within my own country. This research also sometimes addressed regional political administrative arrangements leading to administrative reforms and new strategic directions of implementing agencies.
