tell us about the minds of young humans In this fascinating introduction to the study of primate minds Juan Carlos Gomez identifies evolutionary resemblances and differences between human children and other primates He argues that primate minds are best understood not as fixed collections of specialized cognitive capacities but more dynamically as a range of abilities that can surpass their original adaptations In a lively overview of a distinguished body of cognitive developmental research among nonhuman primates Gomez looks at knowledge of the physical world causal reasoning including the chimpanzee like errors that human children make and the contentious subjects of ape language theory of mind and imitation Attempts to teach language to chimpanzees as well as studies of the quality of some primate vocal communication in the wild make a powerful case that primates have a natural capacity for relatively sophisticated communication and considerable power to learn when humans teach them Gomez concludes that for all cognitive psychology s interest in perception information processing and reasoning some essential functions of mental life are based on ideas that cannot be explicitly articulated Nonhuman and human primates alike rely on implicit knowledge Studying nonhuman primates helps us to understand this perplexing aspect of all primate minds

Nakagawa, Yasuhiro Go, Hiroo Imai, Masaki Tomonaga, 2012-10-20 tentative What bring about biodiversity are not always genes As is the case with humans cultural diversity of non human animals has also been found Most of well known examples of animal cultures are those of food acquisition behaviors such as sweet potato washing by Japanese macaques and nut cracking by chimpanzees First author Naofumi Nakagawa introduces cultural diversity of social behaviors in wild Japanese macaques such as the embracing behaviors between adult females in a wild group in each population of Yakushima Kinkazan and Shimokita The subtle local difference in embracing can be identified as the first evidence for social customs in wild Japanese macaques The next author Michael A Huffman introduces the self medicative behavior in non human primates

which is a relatively new study in primatology Parasites cause a variety of diseases that affect the behavior and reproductive fitness of an individual He classifies health maintenance and self medicative behaviors observed in non human primates into four levels Not only humans but also apes and monkeys are maintaining their health The third authors Hiroo Imai Masaki Tomonaga and Yasuhiro Go are promoting comparative cognitive sciences of primates including human and chimpanzees Recently human personal genome projects progresses as related to the phenotypes including cognition while there was no similar project for non human primates They started personal genome and transcriptome projects of chimpanzees in Primate Research Institute Kyoto University years ago They introduce recent progresses of the project and related results based on the primate genome sciences **Primates** Xist Publishing,2012 Monkey see monkey do This ebook features colorful photos of monkeys apes and other primates Babies and toddlers will love flipping through the colorful pictures and older children will enjoy seeing familiar gorillas chimps and baboons and new favorites *Monkeys* Tom Jackson,2015 This picture packed book for 8 to 12 year olds investigates the lives of monkeys and other small simians and explores how they live *Primates Face to Face* Agustín Fuentes,Linda D.
