Manitoba Law Journal Volume 42:2 -- Special Issue on Chief Justice Robson (2019) Darcy MacPherson, The Manitoba Law Journal is a peer reviewed journal founded in 1961 The MLJ s current mission is to provide lively independent and high caliber commentary on legal events in Manitoba or events of special interest to our community *Regulating Infrastructure* José A. Gómez-Ibáñez, 2003-09-15 This wide ranging study of urban infrastructure offers a series of fascinating arguments in favor of market oriented approaches to regulation Times Higher Education Supplement In the 1980s and 90s many countries turned to the private sector to provide infrastructure and utilities such as gas telephones and highways with the idea that market based incentives would control costs and improve the quality of essential services But high profile failures have since raised troubling questions about privatization This book addresses one of the most vexing of these how can government fairly and effectively regulate natural monopolies those infrastructure and utility services whose technologies make competition impractical Mapping out various approaches to regulation Jos G mez Ib ez draws on a wealth of case studies as well as history politics and economics He makes a strong case for favoring market oriented and contractual approaches over those that grant more discretion to government regulators He shows how contracts can provide stronger protection for infrastructure customers and suppliers and greater opportunities to tailor services to their mutual advantage At the same time he highlights scenarios where alternative schemes may be needed Curing the Addiction to Profits Cynthia Callard, Neil Collishaw, Dave Thompson, Canadian Centre for Policy Alternatives, 2005 *Monopoly's Moment* Christopher Armstrong, 1986 *Blue Skies and Boiler Rooms* Chris Armstrong, 1997-12-15 Blue Skies and Boiler Rooms describes the evolution of the securities market in Canada from the onset of trading through the boom of the 1920s and the depression of the 1930s to the outbreak of the Second World War The book documents the problems of fraud misrepresentation and manipulation of prices which plagued the securities industry from the outset and which eventually led to market regulation first by the stock exchanges and later after the First World War by governments Some people argued that regulation to prevent abuses should be modelled on the American blue sky legislation so named after the promises of smooth talking con men in fly by night operations who victimized the unwary with sales pitches offering shares in virtually anything Even the blue sky above Such legislation became necessary as shady types marketed shares of doubtful value through boiler rooms which used high pressure mail and telephone selling methods to separate people from their money This is a tale well told with a splendid cast of crooks and raffish characters It is also an in depth study based on extensive primary research that captures the distinctiveness of the development of the Canadian securities market Armstrong s book shows that today s Bre X saga is only the latest in a series of episodes in which investors have fixed their hopes for quick and easy profits on speculative mining stock It will be welcomed by students and scholars of financial business and economic history
