the International UFO Congress Annual Symposium held at the We Ko Pa Resort and Conference Center in Fountain Hills Arizona I had to wonder could there really be something to this tale Keep in mind scientists believe there are one hundred billion stars in our galaxy and ten trillion galaxies in the observable universe That means there are about 1 000 000 000 000 000 000 000 000 a thousand quintillions or one sextillion stars out there It is believed that 7 6% of those are Class G stars like our own sun That s important because it is estimated that almost all Class G stars support at least one planet in which life must exist The Universe is believed to be teeming with life If that is such couldn t there be other life forms like E T out there somewhere And If so why is it so fundamentally insane to suppose they ve been coming to Earth since the beginning of mankind to manipulate our DNA hunt or live among us
