Monsters and Monarchs Debbie Felton, 2021-07-27 Jack the Ripper Jeffrey Dahmer John Wayne Gacy Locusta of Gaul If that last name doesn't seem to fit with the others it's likely because our modern society largely believes that serial killers are a recent phenomenon Not so argues Debbie Felton in fact there's ample evidence to show that serial killers stalked the ancient world just as they do the modern one Felton brings this evidence to light in *Monsters and Monarchs* and in doing so forces us to rethink the assumption that serial killers arise from problems unique to modern society Exploring a trove of stories from classical antiquity she uncovers mythological monsters and human criminals that fit many serial killer profiles the highway killers confronted by the Greek hero Theseus such as Procrustes who tortured and mutilated their victims the Sphinx or strangler from the story of Oedipus child killing demons and witches which could explain abnormal infant deaths and historical figures such as Locusta of Gaul the most notorious poisoner in the early Roman Empire Redefining our understanding of serial killers and their origins *Monsters and Monarchs* changes how we view both ancient Greek and Roman society and the modern day killers whose stories still captivate the public today

Mapping an Atlantic World, circa 1500 Alida C. Metcalf, 2020-10-13 How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus's voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus's exploration In *Mapping an Atlantic World circa 1500* Alida C Metcalf argues that the earliest surviving maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then repeated on map

after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps
