Seafood Ecolabelling Trevor Ward,Bruce Phillips,2009-01-28 SEAFOOD Ecolabelling Principles and Practice Edited by Trevor Ward and Bruce Phillips In recent years there have been some major developments and a greatly increased recognition of the importance of more sustainable and environmentally friendly fishing and fish farming methods Various

types of seafood eco endorsements have been introduced and these initiatives have now blossomed into an extensive range of types of product endorsement labels and systems. This volume comprehensively reviews the current eco endorsement systems for seafood products described in four main sections with contributions by leading experts from around the globe. A full description of the background and history of eco labels, ratings guides and choice systems. Seafood evaluation and certification including issues of quality, costs and benefits. Highly significant case studies in the use of eco labels including details of programs undertaken with species such as Pollock, Baja Red Spiny Lobster and Patagonian Toothfish. The future of sustainable seafood. Seafood Ecolabelling is an essential purchase for all those involved in fisheries and aquaculture management and product certification and ecolabelling throughout the world. Professionals including fishery scientists and managers, fish farm managers, marine biologists, environmental biologists, conservation biologists, ecologists, natural resource managers, civil society and sustainability governance practitioners and resource and environmental economists will find this book to be extremely valuable. Professionals involved in the seafood trade including those in production, packaging, reselling and seafood product labelling will find a great deal of commercial interest within this book. Libraries in all universities and research establishments where biological sciences, food science and fisheries are studied and taught should have copies of this important book on their shelves. Also available from Wiley Blackwell.

Beyond Blue Skies Chris Petty, 2020-11

Beyond Blue Skies examines the thirty year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space.

Beyond Just War D. Chan, 2016-06-01

Unlike most books on the ethics of war, this book rejects the just war tradition, proposing a virtue ethics of war to take its place. Like torture, war cannot be justified. It answers the question: If war is a very great evil, would a leader with courage, justice, compassion and all the other moral virtues ever choose to fight a war?

Beyond the Missouri Richard W. Etulain, 2006

This new historical overview tells the dramatic story of the American West from its prehistory to the present. A narrative history, it covers the region from the North Dakota to Texas states to the Pacific Coast and includes experiences and contributions of American Indians, Hispanics and African Americans.

Beyond One Health John A. Herrmann, Yvette J. Johnson-Walker, 2018-04-10

Tackling One Health from a multi-disciplinary perspective, this book offers in-depth insight into how our health and the health of every living creature and our ecosystem are all inextricably connected. Presents critical population health topics written by an international group of experts. Addresses the technical aspects of the subject. Offers potential policy solutions to help mitigate current threats and prevent additional threats from occurring.

G. Webster,2017-09-08 An analysis of how responsive governance has shaped the evolution of global fisheries in cyclical patterns of depletion and rebuilding dubbed the management treadmill The oceans are heavily overfished and the greatest challenges to effective fisheries management are not technical but political and economic In this book D G Webster describes how the political economy of fisheries has evolved and highlights patterns that are linked to sustainable transitions in specific fisheries Grounded in the concept of responsive governance Webster s interdisciplinary analysis goes beyond the conventional view of the tragedy of the commons Using her Action Cycle Structural Context framework she maps long running patterns that cycle between depletion and rebuilding in a process that she terms the management treadmill Webster documents the management treadmill in settings that range from small coastal fishing communities to international fisheries that span entire oceans She identifies the profit disconnect in which economic incentives are out of sync with sustainable use and the power disconnect in which those who experience the costs of overexploitation are politically marginalized She examines how these disconnects shaped the economics of expansion and documents how political systems failed to prevent related cycles of serial resource depletion Webster also traces the increasing use of restrictive management in response to worsening fisheries crises and the emergence of new noncommercial interests that demand greater management but also generate substantial conflict She finds that the management treadmill is speeding up with population growth and economic development and so concludes that sustainable fisheries can only exist within a sustainable global economic system
