Lancaster Leo

McKinstry,2009-09-03 The Spitfire and the Lancaster were the two RAF weapons of victory in the Second World War but the glamour of the fighter has tended to overshadow the performance of the heavy bomber Yet without the Lancaster Britain would never have been able to take the fight to the German homeland Highlights the scale of the bomber s achievements including the famous Dambusters attacks With its vast bomb bay ease of handling and surprising speed the mighty Lancaster transformed the effectiveness of the Bomber Command Whilst addressing the political controversy surrounding the bombing offensive against Germany Leo McKinstry also weaves individual tales into this compelling narrative Rich characters are brought to life such as Roy Chadwick the designer who taught himself engineering at night school and Sir Arthur Harris the austere head of the Bomber Command This is a rich saga a story of triumph over disaster and the history of an iconic plane

Baling Out Robert Jackson, 2006-09-18 To bale out of

a stricken airplane is a pilot's or aircrew's final chance to escape death. It is a traumatic and hazardous exercise that is only practiced in extremis and is in itself full of danger with no guarantee of survival. Many struggled free of a flaming and spinning aircraft only to see their parachute alight above them; some were machine-gunned to death by their opponents as they drifted to earth; some landed in mine fields and were blown apart; and many landed in forests and died suspended from the treetops. And yet many survived, some to fight again and some to become prisoners of war. This book relates the experiences of many airmen who survived to tell the tale, some quite remarkable because of pure good luck, some because of ingenuity, and some through pure determination to survive at all costs. This book includes escapes from crippled German, British, and US aircraft; stories of the first pilots to use parachutes in WW1; amazing escapes from aircraft in the interwar years.

The Bomber Command War Diaries Martin Middlebrook, Chris Everitt, 2014-04-02

The essential WWII historical reference detailing RAF Bomber Command's extensive campaign of strategic bombings across occupied Europe. The Royal Air Force Bomber Command's strategic bombing campaign started on the first day of the Second World War and ended five and a half years later with the final victory in Europe. It was a campaign of such enormous scale that historians have only recently begun to piece together the finer details of the individual raids. Aviation historian Martin Middlebrook and his research colleague Chris Everitt were the first to compile a complete review of all the raids and their background stories. *The Bomber Command War Diaries* not only documents every Bomber Command operation but also details their effects on the ground, drawing on local archives from Germany, Italy, and the occupied countries. It is a groundbreaking work on historical research bringing together the two sides of Bomber Command's war. This edition includes retrospective observations and a new appendix.
