Graff, Yelena Rakic, 2013 The exhibition Beyond Babylon Art Trade and Diplomacy in the Second Millennium B C held in 2008 2009 at The Metropolitan Museum of Art demonstrated the cultural enrichment that emerged from the intensive interaction of civilizations from western Asia to Egypt and the Aegean in the Middle and Late Bronze Ages During this critical period in human history powerful kingdoms and large territorial states were formed Rising social elites created a demand for copper and tin as well as for precious gold and silver and exotic materials such as lapis lazuli and ivory to create elite objects fashioned in styles that reflected contacts with foreign lands This quest for metals along with the desire for foreign textiles was the driving force that led to the establishment of merchant colonies and a vast trading network throughout central Anatolia during the early second millennium B C Texts from palaces at sites from Hattusa modern Bogazk y in Hittite Anatolia to Amarna in Egypt attest to the volume and variety of interactions that took place some centuries later creating the impetus for the circulation of precious goods stimulating the exchange of ideas and inspiring artistic creativity Perhaps the most dramatic evidence for these far flung connections emerges out of tragedy the wreckage of the oldest known seagoing ship discovered in a treacherous stretch off the southern coast of Turkey near the promontory known as Uluburun Among its extraordinary cargo of copper glass and exotic raw materials and luxury goods is a gilded bronze statuette of a goddess perhaps the patron deity on board who failed in her mission to protect the ship To explore the themes of the exhibition art trade and diplomacy viewed from an international perspective a two day symposium and related scholarly events allowed colleagues to explore many facets of the multicultural societies that developed in the second millennium B C Their insights which dramatically illustrate the incipient phases of our intensely interactive world are presented largely in symposium order beginning with broad regional overviews and examination of particular archeological contexts and then drawing attention to specific artists and literary evidence for interconnections In this introduction however their contributions are viewed from a somewhat more synthetic perspective one that focuses attention on the ways in which ideas in this volume intersect to enrich the ongoing discourse on the themes elucidated in the exhibition      *The Architecture, Stratification, and Pottery of Lerna III* Martha Heath Wiencke, 2000 211 figs 24 pls 37 tbls 32 plans 29 sections      *Cutting-edge Technologies in Ancient Greece* Marina Panagiotaki, Ilias Tomazos, Fotios Papadimitrakopoulos, 2020-04-30 This volume examines materials produced with the use of fire and mostly by use of the kiln metals plasters glass and glaze aromatics The technologies based on fire have been considered high tech technologies and they have contributed to the evolution of man throughout history Papers highlight technical innovations of the technician artist pyrotechnologist that lived in the Aegean mainland Greece and the islands during the Bronze Age the Classical and the Byzantine periods      Excavations at Sissi III Jan Driessen, 2012 Vol 2 Since 2007 the Belgian School at Athens has undertaken excavations on the Kefali or Buffo hill east of the village of Sissi on the north coast of Crete where a Minoan site was occupied approximately between 2500 and 1200 BC This volume is the follow up of an earlier one on the

Betancourt, Costis Davaras, 2012-12-31 The publication of the Hagia Photia Cemetery is planned in three volumes The first volume which has already been published Davaras and Betancourt 2004 presented the tomb groups and the architecture The second volume about the excavation of the Hagia Photia cemetery focuses on the pottery The third volume will present the obsidian stone finds metal objects and other discoveries The Early Minoan I tombs at Hagia Photia included the largest assemblage of vessels in Cycladic style known from Crete as well as vases from production workshops in Crete The pottery is extremely important for several reasons including the definition of the EM I ceramic styles that were being used as funerary offerings in this part of Crete the establishment of the chronological synchronisms between Crete and the Cyclades and information on the history of the Minoan pottery industry When compared with other deposits from EM I Crete the pottery helps to establish a better understanding of the ceramic development within the first Minoan time period *Penelope's Bones* Emily Hauser, 2025-06-13 Weaving together literary and archaeological evidence Emily Hauser illuminates the rich intriguing lives of the real women behind Homer's Iliad and Odyssey Achilles Agamemnon Odysseus Hector The lives of these and many other men in the greatest epics of ancient Greece have been pored over endlessly in the past three millennia But these are not just tales about heroic men There are scores of women as well complex fascinating women whose stories have gone unexplored for far too long In *Penelope's Bones* award winning classicist and historian Emily Hauser pieces together compelling evidence from archaeological excavations and scientific discoveries to unearth the richly textured lives of women in Bronze Age Greece the era of Homer's heroes Here for the first time we come to understand the everyday lives and experiences of the real women who stand behind the legends of Helen Briseis Cassandra Aphrodite Circe Athena Hera Calypso Penelope and more In this captivating journey through Homer's world Hauser explains era defining discoveries such as the excavation of Troy and the decipherment of Linear B tablets that reveal thousands of captive women and their children more recent finds like the tomb of the Griffin Warrior at Pylos whose tomb contents challenge traditional gender attributes DNA evidence showing that groups of warriors buried near the Black Sea with their weapons and steeds were in fact Amazon like female fighters a prehistoric dye workshop on Crete that casts fresh light on women's work of dyeing spinning and weaving textiles and a superbly preserved shipwreck off the coast of Turkey whose contents tell of the economic and diplomatic networks crisscrossing the Bronze Age Mediterranean Essential reading for fans of Madeline Miller or Natalie Haynes this riveting new history brings to life the women of the Bronze Age Aegean as never before offering a groundbreaking reassessment of the ancient world **Greek Archaeology** Christopher Mee, 2011-04-18 Christopher Mee presents an extensive examination of the material culture of the Greek world from its
