Phythian, 2013-07-18 This book critically analyses the concept of the intelligence cycle highlighting the nature and extent of its limitations and proposing alternative ways of conceptualising the intelligence process The concept of the intelligence cycle has been central to the study of intelligence As Intelligence Studies has established itself as a distinctive branch of Political Science it has generated its own foundational literature within which the intelligence cycle has constituted a vital thread one running through all social science approaches to the study of intelligence and constituting a staple of professional training courses However there is a growing acceptance that the concept neither accurately reflects the intelligence process

nor accommodates important elements of it such as covert action counter intelligence and oversight Bringing together key authors in the field the book considers these questions across a number of contexts in relation to intelligence as a general concept military intelligence corporate private sector intelligence and policing and criminal intelligence A number of the contributions also go beyond discussion of the limitations of the cycle concept to propose alternative conceptualisations of the intelligence process What emerges is a plurality of approaches that seek to advance the debate and as a consequence Intelligence Studies itself This book will be of great interest to students of intelligence studies strategic studies criminology and policing security studies and IR in general as well as to practitioners in the field
