aspects of the same problem at a much later point of time At times such a situation might lead to misconceptions Sometimes such misconceptions conceived by some renowned personalities are even considered to be very brilliant ideas and valuable achievements As a result heritage of falsified knowledge had been transferred several times in the past to at least next 3 4 generations This becomes possible because common man blindly follows renowned persons who are considered to be wise normally no one even bothers to verify the truth this is the greatest misfortune of the human kind Misjudging or regarding such misconceptions as valuable discoveries might cause science to divagate from its path to find out absolute truth a very long and valuable time might also be lost in elimination of such misconceptions **The Universal Mysteries** Ahmed
