conquest and sport into the public sphere on a global scale But as a metaphor for the pinnacle of human achievement mountaineering remains the preserve of traditional white male heroism False Summit unpacks gender politics in the expedition narratives and memoirs of mountaineers in the Himalayas and the Karakoram Why are women still a minority in the world's highest places Julie Rak proposes that the genre has itself reached a false summit a peak that proves not to be the pinnacle and that mountaineering is not ready to welcome other ways of climbing or other kinds of climbers For more than two centuries mountaineering as an activity and as an ideal has helped shape how the self is understood within the context of conquest adventure and proximity to risk As climbing shows signs of becoming more diverse Rak asks why change is so hard to achieve and why gender bias and other inequities exist in climbing at all Exploring classic and lesser known expedition accounts from Everest K2 and Annapurna False Summit helps us understand why mountaineering remains one of the most important ways to articulate gender identities and politics The Phaselock Code Roger Hart, 2008-02-06 ONE MAN S REMARKABLE SEARCH FOR THE ULTIMATE TRUTHS OF OUR WORLD For Professor Roger Hart life truly began after he almost lost his in a horrific fall off the slopes of Mount Everest that he miraculously survived This near death experience sparked a desire in him to devote his studies to the very nature of human consciousness in order to unlock the code of reality that binds our world On an adventure of discovery that would take him around the world Hart would experience life altering transcendental events in Tibet Morocco and Tierra del Fuego opening the door to a true understanding of the nature of man In this groundbreaking volume he explores the participation of consciousness in the creation of reality challenging the traditional scientific view of time space and objectivity and describing in detail his own metaphysical journey which has involved synchronicity precognition and telekinesis It is an exploration of the very things that make us human and a quest that touches upon the meaning of life itself The Other Side of Everest Matt Dickinson, 2011-10-05 May 1996 began like most other climbing seasons on Mount Everest The arrival of spring brought the usual pre monsoon period with teams of hopeful mountaineers ready to reach for the roof of the world Among the dozens of climbers were Jon Krakauer and Anatoli Boukreev who would both later write their own accounts of what followed and Matt Dickinson But on May 10 with ten different expeditions strung out along the mountain the usual turned deadly Suddenly the temperature dropped from merely frigid to 40 degrees below zero A killer storm with howling winds swept in and climbers were soon blinded in white out conditions Before it was over the blizzard would claim a dozen lives the worst loss of life in the modern history of climbing on Everest Dickinson an adventure filmmaker was part of an expedition challenging the treacherous North Face of Everest on the Tibetan side Of the nearly 700 people who have scaled Everest since the first ascent in 1953 barely 230 have managed to ascend via the colder and technically more difficult route up the North Face In addition to climbing through the storm which would test him beyond his imagining Dickinson also filmed the ascent He and his team watched in awe as violent clouds gathered over the mountain and swept them all up in a frightening white force

Dickinson was a relative novice who had never climbed at this crushing altitude and the storm preyed on his mind throwing into question his entire mission Despite this uncertainty and the treacherous conditions Dickinson and his partner Alan Hinkes continued their climb compelled to reach the summit Dickinson's first person narrative the only account of the killer storm written by a climber who was on the North Face places the reader amid the swirl of the catastrophe while providing rare insight into the very essence of mountaineering The Other Side of Everest is a portrait of personal triumph set against the most disastrous storm to ever befall the world mountaineering community Anyone who has ever pushed beyond familiar limits of physical and psychological endurance will cherish this book Grasping for Heaven Frederic V. Hartemann, Robert Hauptman, 2014-01-10 Operating in some of the most challenging and dangerous conditions on earth mountain climbers are uniquely driven men and women In these interviews 15 well known climbers and three leading historians of the sport all native to or living in North America recount experiences shared by only a tiny portion of humanity They discuss all aspects of international climbing including physical conditioning high summit ascension the ethics and environmental concerns of the sport the risks and rewards of mountaineering and a number of their famed expeditions and first ascents Seven Steps from Snowdon to Everest Mark Horrell, 2016-02-29 As he teetered on a narrow rock ledge a yak s bellow short of the stratosphere with a rubber mask strapped to his face a pair of mittens the size of a sealion's flippers and a drop of two kilometres below him it s fair to say Mark Horrell wasn t entirely happy with the situation he found himself in He had been an ordinary hiker who had only read books about mountaineering When he signed up for an organised trek in Nepal with a group of elderly ladies little did he know that ten years later he would be attempting to climb the world's highest mountain But as he travelled across the Himalayas Andes Alps and East Africa following in the footsteps of the pioneers he dreamed up a seven point plan to gain the skills and experience which could turn a wild idea into reality Funny incisive and heartfelt his journey provides a refreshingly honest portrait of the joys and torments of a modern day Everest climber Glorious Failures Mountaineers Books (Firm), 2001 Glorious Failures Volume 1 is an engaging collection of the most famous and infamous almost summits Each of these early attempts often rival the first successful ascent in fame and notoriety The story of the 1956 American expedition to K2 which came tantalizingly close to the summit only to be forced back by illness and weather is told in fascinating detail by Jim Curran The Alpine Journal ,1925
