Mystical Moments and Unitive Thinking Dan Merkur,1999-02-11 Merkur proposes an alternative to the traditional psychoanalytic explanation of mystical experiences as regression to the solipsism of earliest infancy He does this by viewing unitive thinking as a line of cognitive development and mystical moments as creative inspirations on unitive topics Utilizing classical self reports by Christian Jewish and Muslim mystics Patanjali's Yoga Sutras and modern Western peak experiences Merkur argues that experiences of mystical union are manifestations of a broader category of psychological processes that manifest in scientific and moral thought as well as in mysticism Unconscious as well as conscious unitive thinking is sometimes realistic and sometimes fantastic in patterns that are consistent with cognitive development in general Mystical moments of unitive thinking may be considered moments of creative inspiration that happen to make use of unitive ideas Building on the psychoanalytic object relations theory that the self is always in relationship with an object Merkur argues that the solipsism of some varieties of mystical union always implies unconscious ideas of a love object who is transcendent

Reality and Mystical Experience F. Samuel Brainard,2008-03-05 Responding to our modern disillusionment with any claims to absolute truth regarding morality or reality this book offers a conceptual approach for discussing absolutes without denying either the relevance of divergent religious and philosophical teachings or the

evidence supporting postmodern and poststructuralist critiques Case studies of mysticism within Advaita Ved _nta Hinduism M _dhyamika Buddhism and Nicene Christianity demonstrate the value of this approach and offer many fresh insights into the metaphysical presuppositions of these religions as well as into the nature and value of mystical experience Like Douglas Hofstadter s G _del Escher Bach this book finds ultimate reality to be rationally graspable only as an eternal fugue of pattern and paradox Yet it does not so much counter other philosophical views as provide a conceptual tool for understanding and classifying incommensurable views
