

MYSTICISM, LANGUAGE AND TRUTH

George Karuvelil*

1. Introduction

Ever since Friedrich Schleiermacher addressed the “cultured despisers” of his time¹ by turning to religious experience, experience has come to occupy a central place (if not the central place) in philosophy of religion. He attempted to show that the truth of religion does not consist in the externals that they despised but in an inner experience. With the linguistic turn of philosophy in the twentieth century, the linguistic dimension of experience came to the forefront. But there is a palpable tension between these linguistic and truth dimensions of religious experience such that any overemphasis on one puts the other in jeopardy. This is clearly seen in the philosophy of Steven Katz who emphasizes language, and thereby putting religious truth at risk. The opposite tendency is seen in Walter Stace. Examining their theories will show that a theory of religious experience, if it is to hold on to both these dimensions, must be such as to make religious experiences logically identifiable and the theory of experience empirically adequate. Together, I shall call them the experiential imperatives.²

I shall not define religious experience since the first principle has to do with the identity of religious experience itself. But this much needs to be said that ‘mysticism’ or ‘mystical experience’ is understood as a class of ‘religious experience’. ‘Identifiability’ is a logico-ontological principle that has come down to us in the form of the famous slogan, “There is no entity without identity” which P. F. Strawson has helpfully explicated as “There is nothing you can sensibly talk about without knowing, at least in principle, how it might be identified.”³ He goes on to say that the principle

Mysticism And Language:

Mysticism and Language Steven T. Katz, 1992 Taken collectively the original essays in this new collection make up the most important exploration of mysticism and language to appear in many years Written from diverse perspectives on a wide variety of religious and mystical traditions ranging from Judaism and Christianity to Zen Buddhism and Hinduism all the essays exhibit great erudition a mastery of the original mystical sources and philosophical and hermeneutical sophistication Further all recognize the inadequacy of treating the questions surrounding this subject a contextually outside of their historic intellectual and sociological circumstances As such these studies deepen the on going revisionist contextualist study of mysticism so powerfully and influentially inaugurated by two previous collections also edited by Steven Katz *Mysticism and Philosophical Analysis* and *Mysticism and Religious Traditions* Like its predecessors the present collection includes work by some of the world s leading authorities on mysticism including Moshe Idel William Alston Bernard McGinn Ewert Cousins Bimal Matilal Carl Ernst and Steven Katz It is sure to become essential reading for everyone interested in mysticism as well as those who study religion comparative religion philosophy and history *Language Mysticism* Shira Wolosky, Shira Wolosky Weiss, 1995 *Language Mysticism* explores the place granted to language within metaphysical and theological hierarchies traditional to Western culture Within these hierarchies language represents embodiment division and historical differentiation whereas silence points to an eternal unity beyond linguistic form and limitation But this reflects a deeply embedded ambivalence in the Western tradition toward material and temporal conditions in general The author uses the writings of T S Eliot Samuel Beckett and Paul Celan to show how far reaching and immediate this history of ambivalence remains in its influence and consequences In each of these writers theological traditions inform and situate linguistic imagery and practices albeit in quite different ways The author argues that the stances toward language of these three writers register values not only fundamental to their work but general to our culture Language is the sign of body of history of difference and a negative attitude toward language therefore implies a displacement of value away from concrete historical condition The approach to language of Eliot Beckett and Celan therefore inscribes their struggle to define and locate the values that endow our lives with meaning and the possibility of translating these values into historical reality

University of Wisconsin Studies in Language and Literature, 1927 *Mysticism* Winfried Corduan, 2009-07-01 Mysticism is a controversial topic that all too frequently receives one sided coverage On the one hand there are many enthusiasts who are willing to defend mysticism at almost any cost including sacrificing logical and theological integrity On the other hand there are philosophers and theologians who see mysticism as not much more than an evil to be stamped out This book takes a careful look at the philosophical and theological questions involved and attempts to locate a modest place for mysticism within a genuine evangelical framework Questions addressed in this book include such matters as Is mysticism a perennial philosophy that appears in different guises but is always the same underneath Can we argue for an objective reality behind all mystical experience How can we understand the fact that mystics talk about something that they say is beyond language How has mysticism shown up in various Christian traditions Can we reconcile mysticism with the New Testament The conclusion of this book is based on an understanding of mysticism as an unmediated link to an absolute In that sense there is a form of mysticism taught in the New Testament but it is a mysticism that does not require ecstatic experience and does not constitute a separate source of revelation Nevertheless this New Testament mysticism describes an integral part of biblical spirituality

Between Rationality and Irrationality Mordechai Rotenberg, 2017-09-29 Jewish Scriptural interpretation entails a potential therapeutic bridge between the rational material and the irrational mystic in the world of psychotherapy PaRDeS as this system is known is derived from the following concepts P denotes peshat the plain interpretation of the text which translates into a rational interpretation of life R symbolizes remez hinting at a related religious concept which becomes a symbolic view of life D stands for derash the homiletic way of interpreting a text or a narrative reading of life And S represents sod or the mystery behind an idea which in psychological terms becomes a mystic understanding of life Mordechai Rotenberg believes that it is by engaging readings in a dialogue with each other as in the Jewish hermeneutic tradition the psychology underlying one s existence may be more readily understood While Rotenberg acknowledges that it is legitimate to focus on one cognitive rational or one narrative storytelling therapeutic method in the course of therapy he argues that a comprehensive theory of psychotherapy should include treatment possibilities for both rational and irrational manifestations of behavior thereby engulfing all aspects of human behavior For Rotenberg a person s life becomes the text subject to being read and interpreted If that person wishes to change his or her behavior via psychotherapy then a hermeneutic system must be employed to understand that person s life However many systems interpret a person s life according to the particular theory espoused by the therapist Rotenberg in contrast introduces a

balanced theory bridging the rational and the irrational Between Rationality and Irrationality emphasizes that it is more important for a therapist to learn his client's own language than to impose his own doctrinaire interpretation This edition includes a new introduction by the author as well as an appendix explicating an original psychological interpretation of PaRDeS

The Unity of Mystical Traditions Randall Studstill, 2018-08-14 This book argues that mystical doctrines and practices initiate parallel transformative processes in the consciousness of mystics This thesis is supported through a comparative analysis of Tibetan Buddhist Dzogchen rdzogs chen and the medieval German mysticism of Eckhart Suso and Tauler These traditions are interpreted using a system cybernetic model of consciousness This model provides a theoretical framework for assessing the cognitive effects of mystical doctrines and practices and showing how different doctrines and practices may nevertheless initiate common transformative processes This systems approach contributes to current philosophical discourse on mysticism by 1 making possible a precise analysis of the cognitive effects of mystical doctrines and practices and 2 reconciling mystical heterogeneity with the essential unity of mystical traditions
